

All This for the Sake of a Carnival Ticket!

PIES, MUD, and water splattered Spring Carnival participants last night in the west parking area. At left, Ruth McNitt, Delta Delta Delta, shuts her eyes as she is dumped from her chair into the water at the Theta Chi-Tri Delt booth when a contestant made a direct hit with a ten-

nis ball. Martin Karn, center, winces as a juicy berry pie just misses him at the "Take a Throw at a Beta Sigma Rho" booth. He wasn't as lucky later on when the pie-throwers got more practice. Frank Finley, Chi Phi, right, seems happy as he slides into the mud-filled trough at the

"Fools Pool." Carnival-goers, better dressed than Frank was here, tried to avoid other Chi Phi's who were walking around, mud-laden, advertising the booth. Other booths at the carnival involved use of bow and arrows, raw eggs, and brute muscle (for the hit-the-bell machines).

Graduates' Instructions Released by Marshal

General instructions to graduating seniors for the commencement exercises June 9 were announced yesterday by David E. Bauer, acting College marshal.

Detailed mimeographed instructions should be ready for distribution through the schools and departments by Tuesday or Wednesday, he said.

If the weather permits, the graduation exercises will be held at 10:30 a.m. on Beaver Field for all the schools. Graduating members of the schools will assemble in the general vicinity of the Pattee Library by 9:45 a.m., Bauer said.

Indoor Schedules

In the event of rain, the ceremonies will be held at 10:30 a.m. and 2 p.m. in Recreation Hall. If the weather is such that doubt exists as to where the exercises will be held, announcements will be made at 8 a.m., 8:30 a.m., 9 a.m., and 9:30 a.m. over radio station WMAJ, Bauer added.

If indoor exercises are held, the Schools of Liberal Arts, Education, Home Economics, and Physical Education will be scheduled for 10:30 a.m. The Schools of Agriculture, Chemistry and Physics, Engineering, and Mineral Industries will be scheduled for 2 p.m. for the indoor exercises.

If it rains, graduating students should go directly to their seats in Recreation Hall. The deadlines for being seated are 10:20 a.m. and 1:50 p.m., Bauer explained.

Diplomas at Willard Hall

He said that the presence is required of all those graduating unless excused by President Milton S. Eisenhower. Requests for excuses must be turned in by June 2, Bauer added.

Diplomas can be obtained immediately after the commencement exercises until 5:30 p.m. at the recorder's office in Willard Hall. Identification in the form of a matriculation card will be required to get the diplomas, Bauer said.

Tickets Unnecessary

If the exercises are held in Recreation Hall, tickets for guests will be necessary. In order to be prepared, three tickets will be given (Continued on page eight)

Cheer Team To Be Cut Next Week

Cuts in the cheerleading squad will take place either Tuesday or Thursday, Thomas Hanna, head cheerleader, said yesterday.

The cuts were originally scheduled for this week, Hanna said, but the date was changed because of the unavailability of Harold R. Gilbert, graduate manager of athletics, who was out of town for several days.

Hanna said that the actual cuts will probably start about 7 p.m. on the chosen day in Schwab Auditorium, if it is available.

The plan, suggested by Hanna, will cut the squad from 20 to 14. Hanna explained that difficulty in arranging practice sessions and difficulty in the students' keeping together during cheers were two of the main reasons for the cuts.

The cuts have nothing to do with the College athletic budget, as the squad is not allotted any money for away trips, Gilbert emphasized.

Carl P. Schott, dean of the School of Physical Education and Athletics; Hummel Fishburn, professor of music education and a member of the Senate advisory committee on athletics; Eugene Wettstone, gymnastic coach; Gilbert; and Hannah are the committee in charge of the cutting.

Hall Elected President Of Architecture Group

Charles Hall has been elected president of Scarab, architecture honorary, for next year, David Margolf, retiring president, announced.

Other officers elected were Robert Gladys, vice president; John Goduscik, secretary; Harold Becker, treasurer; John Gilbert, historian; and Paul Kuhnle, student council representative.

Military Equipment To Be Demonstrated

The display of over 50 different types of equipment, models, and films, and an anti-aircraft firing training service demonstration will mark the observance of Armed Forces Day by the Army, Navy, and Air Force Reserve Officers Training Corps from 1 to 5 p.m. tomorrow in the Armory.

Pleasantly surprised by last year's turnout to the exhibit, military officials this year decided to provide one of the largest displays ever to be seen in the Armory. The exhibit will be held in conjunction with the Armed Forces Day parade at 2 p.m. tomorrow.

The infantry will exhibit several types of guns, grenades, and rocket launchers, as well as a terrain model kit. New types of bridges, a pneumatic raft, and mine detectors will be displayed by the engineers. Signal Corps personnel will demonstrate radios, switchboards, and communications systems. Exhibits of engines and animated airplane parts will be explained by staff members of the Air Force.

Included in the Navy's exhibit of machine guns and a contact mine will be the Mark XVIII torpedo. The torpedo, which will be included in the parade, was developed during World War II.

Entered by officials of the Ordnance Research Laboratory, the Mark XVIII is a submarine-launched torpedo propelled by

battery and an electric motor. It is approximately 21 feet long and 21 inches in diameter, and has a speed of about 33 miles per hour.

Officials of the laboratory said that development of this type of torpedo resulted in more efficient operation of America's submarines against enemy ships. It also enabled many submarines to escape detection.

Before this model was developed, officials said, steam propulsion was usually used to send a torpedo to its target. The steam trail often left a visible trail on the surface, enabling enemy ships to track the submarine.

Eisenhower to Speak

President Milton S. Eisenhower will speak on "Education for World Citizenship" at the meeting of the State College High School Parent Teacher Association at 8 tonight. The meeting will follow a brief business meeting at 7:30 p.m.

Civil Service To Administer Radar Exams

Men and women students interested in filling positions as radar instructors or radar instructor trainees at the Keesler Air Force Base, Biloxi, Miss., may take tests for these jobs, the Civil Service Commission has announced.

Applications must be filed with the executive secretary, Board of U.S. Civil Service Examiners for Keesler Air Force Base, Department of the Air Force, Biloxi, Miss.

Entrance salaries are \$3410 and \$4205 a year.

To qualify for the trainee positions, applicants must have had at least four years of responsible experience in radar or radio repair and maintenance, or in electronics research or closely allied fields.

College study in electrical engineering, or in courses which have included study in engineering, physics, mathematics, chemistry, or other related physical sciences may be substituted for all or part of the experience.

Full information and application forms may be obtained at first and second class post offices, from Civil Service regional offices, or from the U.S. Civil Service Commission, Washington, D.C.
