lead to 3-2 in the eighth. After George Shuba rammed a two out double to the wall in left center, old Casey brought on his super chief from the bullpen.

With the tying run on second and one out, Reynolds worked on Roy Campanella and poured a third strike past his swinging bat.

BROOKLYN — Speculation grew last night that rookie Tom Gorman would be a surprise starter for the New York Yankees tomorrow in the seventh and deciding game of the World Series against the Brooklyn Dodgers.

The Yankee ace, coming back after his brilliant four hit shut-out Saturday, also fanned pinch hitter Rocky Nelson to start the ninth. Then he weakened momentarily.

Carl Furillo walked on a 3-2 count and Andy Pafko ran it up to 3-1 before he popped to Phil Rizzuto. Reynolds squashed Dodger hopes by making Billy Cox roll to Gil McDougald for the final out.

The homers by Snider, Berra and Mantle brought the series' total to 14, high for any kind of a World Series.

Raschi pitched a brilliant game, striking out nine men before he weakened in the eighth and walking only one.

worst defeat in 54 years, 61-19. Princeton scored in every period.

Pitt battled a fine Oklahoma eleven to 21-13 deficit at half-time, but failed to out-manuever the Big Seven Conference champions. Oklahoma scored 14 points in each of the last two quarters to wallop Pitt, 49-20.

NOSE, THROAT,

and Accessory Organs not Adversely Affected by Smoking Chesterfields

FIRST SUCH REPORT EVER PUBLISHED ABOUT ANY CIGARETTE

A responsible consulting organization has reported the results of a continuing study by a competent medical specialist and his staff on the effects of smoking Chesterfield cigarettes.

A group of people from various walks of life was organized to smoke only Chesterfields. For six months this group of men and women smoked their normal amount of Chesterfields—10 to 40 a day. 45% of the group have smoked Chesterfields continually from one to thirty years for an average of 10 years each.

At the beginning and at the end of the six-months period each smoker was given a thorough

examination, including X-ray pictures, by the medical specialist and his assistants. The examination covered the sinuses as well as the nose, ears and throat.

The medical specialist, after a thorough examination of every member of the group, stated: "It is my opinion that the ears, nose, throat and accessory organs of all participating subjects examined by me were not adversely affected in the six-months period by smoking the cigarettes provided."
