

### Pollock Council Favors AIM Judicial Board

Pollock Council voted five to four in favor of setting up an AIM Judicial Board of Review at its bi-monthly meeting last night.

With three abstentions, the council approved the formation of the board which would hear cases of student offenders, and would recommend action to be taken by the dean of men or the dean of women.

The council also passed a motion to allow Blue Key Hat Society to sponsor a Christmas display contest to be held in the Nittany-Pollock area. Jack Flanagan represented the hat society. The judging date was set for next Wednesday.

A motion for separate housing for veterans in the Nittany-Pollock area was tabled until a poll could be taken among the veterans living in that area.

A report was also given informing the dorm presidents of the area that the College Physical Plant would provide Christmas trees to any dorm wishing one.

The cost of the tree would be \$2.50, and the Physical Plant would fireproof them at no extra charge, provided the requisitions for the trees are made by 5 p.m. today in the housing office, Nittany Dorm 20, it was announced.

### Soph Meeting Canceled

A sophomore class meeting scheduled for this week will not be held due to difficulties in securing a meeting room, according to Nancy Scofield, class secretary.

ONE COPY Larkin's Descriptive Geometry. Call John Thompoms, Bellefonte 6011.

1934 CHEVROLET coupe in good condition, very good tires. Price \$95. Call Harry Chafetz 7944.

### Hat Council Tables Action

Hat Society Council tabled the new women's hat society constitution last night after being unable to work out details in the document.

The constitution proposed 25 women in the original group and says members must be sixth or seventh semester women with a 1.5 All-College average who are outstanding in College activities.

The main topic under discussion was the restrictions to be placed upon potential members. Representatives of the women's hat societies on the council suggested that in order to be eligible for the new group, for which a name has not yet been found, candidate should not be a member of Cwens or Chimes. This would spread recognition more evenly and to those who have come to deserve recognition in later semesters at Penn State, they said.

### APHIO Chapter Has Largest Pledge Class

Alpha Beta chapter of Alpha Phi Omega, national service fraternity, has the largest pledge class of any chapter of the fraternity, according to the national office. The present pledge class numbers 48.

Initiation will take place Friday in the State College Hotel following a banquet honoring the pledges.

### MY QUESTION TO THE G-E STUDENT INFORMATION PANEL:

*"Are my opportunities for advancement as good in a large company, like G.E., as they are in a small firm?"*

... Allen E. Galson, Cornell University, 1953

Two answers to this question, presented at a student information meeting held in July, 1952, between G-E personnel and representative college students, are printed below. If you have a question you would like answered, or seek further information about General Electric, mail your request to College Editor, Dept. 221-6, General Electric Co., Schenectady, N. Y.

**M. M. BORING, Engineering Services Division . . .** I think your opportunities for advancement are as good, if not better, in a large company. There is one point which is often overlooked in making such a comparison. That is, that any large company, and especially one as diversified as General Electric, is really made up of a number of small companies, but with more opportunities than you find in a small firm. We are an organization of many businesses.

With many diverse fields there is greater opportunity for college men and women to find the work most suited to their desires, talents, and abilities. With a wider choice of jobs there is more opportunity to get into work you really enjoy.

The college graduate, working for G.E., will discover new fields opening up to him. He will probably discover that there is some activity in which he is particularly interested. There are no fixed paths for college graduates at G.E. The college man or woman who enters our Company does not commit himself irrevocably to one type of work. It's our tradition to encourage the newcomer to look around, try several different assignments, and find the work most satisfying to him and to which he can make the greatest contribution. In G.E. the college graduate can investigate many types of work before choosing his field. And, he can change jobs without having to leave the Company, or lose the advantages connected with length of service—an impossibility in many small firms.

**F. K. McCUNE, Engineering Services Division . . .** There is one Company function which, I believe, provides great opportunities for advancement in General

Electric. That is our system of training programs, designed to provide a continuous succession of young people to assume responsibilities for the Company's operation and management in the future. The principle of this training has been to develop men and women by providing them with productive employment, by giving them the opportunity to reveal their abilities, and by providing them with practical classroom study designed to broaden their understanding of the electrical industry and of business in general.

The most important contribution of the training programs has been in developing leaders for our Company. Many of the officers and executives in responsible key positions today are graduates of one or another of these programs.

Many small firms cannot afford to spend, either in time or money, the amount we do in preparing young people for better future positions. We believe, however, that these training programs are one of the best assurances that we will have men and women with qualities of ability, character, and leadership in our Company, prepared to cope with the problems and responsibilities of our complex society.

*You can put your confidence in—*
