# Early Arabic Glass On Exhibit in MI

Pieces of 8th-century inscribed Arabic glass weights—similar in composition to the kind used today in bottles, window panes, and plate glass—are on display in the Mineral Industries Building until Christmas.

The display is the work of Dr. Frederick R. Matson, professor of ceramics. He determined the composition of the ancient glass by chemical analysis.

The glass weights were the answer of the Moslem governors in Cairo to local chiselers, according to Dr. Matson. The chiselers liked to clip small pieces from the gold and silver coins that served as their currency. Then they would pass the clipped coins along at face value and also sell the clippings, or items made from the chips of metal, for a profit.

To counteract this fraudulent practice, Dr. Matson said, the governors had glass disks made exactly the same weight and approximate shape as the metal coins. A merchant could then weigh a metal coin against its glass duplicate on a balance scale; if the metal coin weighed less, he knew it had been clipped. Any attempt to meddle with the master weight would result in shattered glass, or an obviously chipped glass weight.

In line with his work, Dr. Matson became interested in making a chemical and microscopic analysis of these glass weights. He was hampered by the fact that they are rare, and can seldom be spared for research that would be destructive.

Finally, one glass weight turned up with its inscription so blurred that it was of little intrinsic worth. And just recently Dr. Matson was fortunate enough to get several others from Dr. George C. Miles, of the American Numismatic Society of New York.

Thus, Dr. Matson was able to chemically analyze the ancient glass, and discover the similarity of composition between it and present-day glass in bottles, window panes, and plate glass.

Dr. Matson believes his work will supplement that of archeologists like Dr. Miles, who reconstructed part of the preceding history concerning these weights.

### Ski Patrol to Meet

The Ski Patrol, a national organization affiliated with the Penn's Valley Ski Club, will meet at 7 tonight in 201 Willard. Sherman Fogg will instruct the patrol in first aid. Members are asked to bring a Red Cross first aid handbook.

### Vacation Cuts Illegal

The Council of Administration has recommended that deans remind faculty members that all classes are to be held as scheduled before and after the Christmas recess and that all students are expected to attend.

# WD Probe Of Meeting Dates Set

A proposed amendment to the West Dorm constitution that one regular meeting be held every second week instead of once a week was put to a committee at the council's meeting last night. The amendment was proposed by John Lyon.

A motion introduced by Ross Clark that students in the West Dorm area bring their food complaints to the council was passed. Lewis Goslin, foods committee chairman, asked the students to also present their complaints to him at 245 Hamilton Hall.

Lyon's motion that one woman from Thompson Hall sit in on the council's meeting with power to vote on questions before the social advisory committee was defeated. Also defeated by the council was a motion introduced by Joseph Poliner that the foods committee look into the possibility of having a dating dinner once a week.

The council passed motions that oppose leaving trays on the dining hall tables. It favored getting more washers and driers for the West Dorm area.

### Psych Club to Meet

Dr. Kendon R. Smith, associate professor of psychology, will speak to the Psychology Club at 7 tonight in 204 Burrows. The meeting is open to the public.
