

Judd to Speak To 3d Forum

"Problems America Faces Today at Home and Abroad" will be discussed by Dr. Walter H. Judd, Republican congressman from Minnesota, at the third Community Forum program at 8 tonight in Schwab Auditorium.

A nationally recognized authority on foreign affairs, Judd has interpreted the situation in the Far East from his own ten years' experience in the Orient.

Single reserved seat tickets for \$1.20 will be on sale until lecture time at the Student Union desk in Old Main.

A native of Rising City, Neb., Dr. Judd worked his way through high school and earned his education at the University of Nebraska Medical School by washing dishes, playing in bands, and teaching zoology at the University of Omaha. During World War I he served in the Army as a lieutenant in field artillery.

Mayo Clinic Fellowship

In 1925, Judd was sent to bandit and malaria infested South China as a medical missionary under the auspices of the foreign mission board of the Congregational Church. He survived the bandits and Communists, but repeated attacks of malaria forced his return to the United States.

After lecturing for several months in churches and colleges about the spreading threat of Communism and the Japanese military machine, Judd received a fellowship in surgery at the Mayo Clinic in Minnesota.

He returned to North China in 1934 to supervise a 125 bed hospital. With his staff he brought the hospital through a Communist revolution and Japanese invasion and at the same time improved its work from 33 to 83 per cent self-supporting.

Elected To House

When Japan's armies moved into North China he was forced to work under Japanese domination for five months. He returned home in 1938 and resumed his lecture tour to carry his tales of Japanese aggression to more than 1400 audiences in 46 states.

Judd was elected to the House of Representatives in 1942. He is now serving his fifth consecutive term. In Congress Judd campaigned for an international organization for peace before the United Nations was founded. Later he authorized legislation for the UN's World Health Organization Bill and the International Children's Emergency Fund.

Judd fathered the United States-Philippine Mutual Security Pact and attended the signing of the pact as a delegate of the United States.

More recently the congressman has authored legislation for a Pacific defense pact and a bill to remove racial discrimination from United States immigration laws.

Kale to Appear On Guild Show

Shrikrishna Kale of India will be interviewed by LaRue Fritz on "World at Our Door," sponsored by the Radio Guild and the Department of Speech, at 7:45 tonight over WMAJ.

Kale received his master's degree in psychology from Columbia University and is working on his doctorate from Columbia. He is at the College for special work in teaching language students through sound movies.

Marian Brodbeck will direct the program. Others in the cast are Donald Klinepeter, announcer; Patrick Runco, sound; and Allen Klein, engineer.

Engineering Students Eligible for Contest

The Heli-Coil Corporation of Danbury will offer cash awards totaling \$1750 to engineering students submitting the most original new uses for Heli-Coil thread inserts.

Applications for the student design award program may be obtained from Design Award Program, Heli-Coil Corporation, Danbury, Conn.

Directories Available

A limited number of student directories and faculty directories are still on sale in 4 Willard. Student directories are 35 cents, and faculty directories are 25 cents.

Dr. Walter H. Judd
3d Forum Speaker

College Plans New AFROTC Grad Course

Penn State is included among eight universities that will offer graduate work in meteorology to June Air Force ROTC graduates who have credits for one year of college physics and mathematics through integral calculus.

Men in this category may apply through their PAS&T immediately for this one year government-paid course and later assignment as an air weather officer. While in school they will hold the rank of second lieutenant and receive full pay and allowances.

Credits received during the course may be applied toward a master's degree.

Other schools to offer this course are Massachusetts Institute of Technology, New York University, University of California at Los Angeles, University of Chicago, University of Washington, Florida State University, and St. Louis University.

College to Aid Farm Exhibit

Largely through the School of Agriculture, the College will contribute to the 37th Pennsylvania Farm Show and the organization meetings to be held Monday through Friday in Harrisburg.

Dr. Lyman E. Jackson, dean of the School of Agriculture, and J. Martin Fry, director of agricultural and home economics extension, are members of the Farm Show Commission, which supervises the exhibition. Harold R. McCulloch, assistant director of agricultural extension, is secretary of the commission.

Many other members and former members of the College staff are serving as judges of the competitive exhibits or as speakers at farm organization meetings held during the Farm Show.

27 Students Withdraw

Twenty-seven students have withdrawn from the College, according to the Jan. 9 Faculty Bulletin. Reasons given for withdrawal were: personal 14, military service, four, financial two, illness, four, scholastic two, unknown one.

About 500 Expected To Graduate

Over 500 students are expected to receive degrees at the fall semester graduation exercises Jan. 27, it has been announced.

Of the graduates, 410 are scheduled to receive their bachelor degrees, 90 master's degrees, and 38 doctorates. Officials in the Office of the Registrar said, however, that names may be added or removed from the list of candidates before commencement. This is more true of candidates for master's and doctor's degrees, the spokesman said.

The School of Liberal Arts has the largest number of candidates for the B.A. degree, 131. The School of Engineering, with 76 candidates for graduation, has the most candidates for the B.S. degree.

The School of Education has eight candidates for B.A. degrees and 54 for B.S. degrees. Fifty-six from the School of Agriculture, 15 in the School of Chemistry and Physics, 23 in the School of Home Economics, 24 from the School of Mineral Industries, and nine from the School of Physical Education and Athletics are also candidates for B.S. degrees.

Eleven are candidates for M.A. degrees. Master of Science degrees are scheduled for 64, while 15 are listed for Master of Education degrees. One person is a candidate for Master of Mechanical Engineering degree.

Nine are slated for a doctor of education degree, and 29 are candidates for doctor of philosophy degrees.

Officials Approve Animal Disease Lab

Preliminary plans for the construction of a new concrete block Animal Disease Research Center have been approved by College officials.

A \$100,000 appropriation was made for this purpose by the last General Assembly. If the plans are completed bids may be opened sometime in March and construction may begin in the spring, John Miller, chief draftsman, has announced.

The new T-shaped, one story building is to be located to the rear of Orchard No. 3 on the College Farms, midway between the fruit storage and the old soil conservation experiment station. This site provides for any future expansion and is isolated from other poultry and livestock which could spread contagious diseases.

The main laboratories, and four offices for veterinarians, bacteriologists or pathologists, who will supervise the research studies, will be in the front part of the "T" which will be 60 by 30 feet.

The basement for the structure will be used for a heating plant and other utilities as well as an incinerator for disposing of diseased tissue and carcasses. This main building also houses an autopsy room which will accommodate any size animal.

A series of ten isolation pens will be located in the animal wing at the rear, which will be 30 by 80 feet. Each of the 10 by 12 feet isolation rooms will contain an entrance and exit and be equipped with an observation window where research workers

can observe conditions without entering the room.

A small dressing alcove will be included in each isolation room where workers will change clothes before entering the room itself to prevent the transfer of disease organisms. These pens, designed to meet specific conditions that could be envisaged with different diseases, will be patterned along modern units constructed recently in other states and will be equally adapted for use with poultry, swine, sheep, or cattle.

Two laboratories, planned near the office, have been designated for pathology work and virology and bacteriological studies.

Walter H. Wiegand, director of the department of physical plant, is working with the School of Agriculture administrators in planning the new unit, with a view to making it meet the needs of the entire livestock and poultry industry.

Draft Test Applications Available in Old Main

Applications for the Selective Service exemption examinations will be available in the Dean of Men's office, 109 Old Main, until March 9.

The next examination will be given April 23 in 121 Sparks.

Students who could not attend the last examination may take this one.

Library Opens Cartoon Exhibit

By EVIE KIELAR

Anybody want a good laugh? If you are one of those students who contemplates finals with the suspicion that you'll never laugh again, Profs. Harold E. Dickson and John Y. Roy invite you to amble through the Pattee library lobby any time beginning today through Jan. 20.

Professors Dickson and Roy, chairmen of the exhibits committee of the division of fine and applied arts, which is sponsoring a double-barrelled cartoonist show. The cartoonists are Penn State alumni, "Ed" Zern, class of '32, and John Morris Price, class of '39. Both are former art editors of Froth, campus humor magazine.

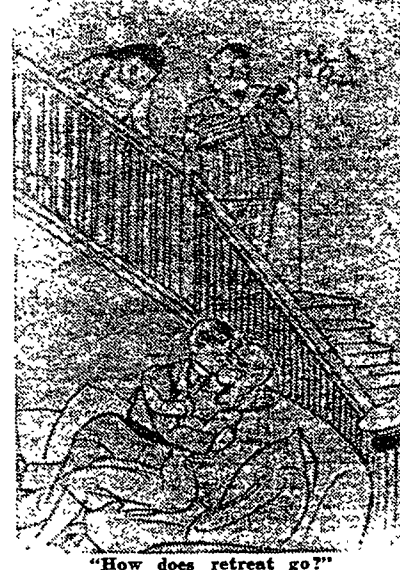

Edward Zern, who recently became vice president of Geyer Advertising, Inc., is the only advertising copy writer with a byline. That byline reads: By Ed Zern.

Went To California

The Nov. 7 issue of Printer's Ink caught a glimpse of Zern's impact upon the American family when they said: "Whether he's aware of it or not, Ed Zern has been on a crusade since his advertising career began back in 1934. His crusade has been to save what little humor is left in American advertising. He has managed to pull this feat off with agility, imagination, and with Stanislavskian grandeur."

Zern's record states that after leaving the Nittany valley, he was a merchant seaman. He then went into the advertising game, working first for N. W. Ayer & Sons. He left in 1943 to become advertising manager for Warner Bros. in California.

He next took his family to Florida for the fishing season. This move resulted in the publication of his first book of cartoons, "To Hell with Fishing." Succeeding books were "To Hell with Hunting," "How to Tell Fish

"How does retreat go?" from Fishermen," and his latest, "How to Catch Fishermen."

Zern is perhaps best known for his cartoon ads in sportsmen's magazines for Nash automobiles, in which he has caught the imagination the American public isn't supposed to have.

Sent 500 Cartoons

John Morris Price was the anonymous founder of a column for the Daily Collegian entitled "Old

Mania" during the school year 1931-32, according to Ridge Riley, alumni secretary.

Price's first commercially published cartoon was accepted by the Saturday Evening Post while Price was still at Penn State. He had sent in about 500 cartoons to various magazines by that time. Since then, his cartoons have been published in the New Yorker, Saturday Evening Post, Esquire, Colliers, and others.

After graduation, Price went to New York where he lived for a time in a \$3-a-week attic room. He later declared, "It had one attraction. I could crawl out the trap door onto the roof and look across a beautiful garden to Katherine Hepburn's balcony."

Cartoon Collection Available

"But the real thrill came a few years later, when, after having moved to slightly roomier quarters, I read in the papers that Greta Garbo had bought the house and had remodeled the attic into her private studio for painting pictures. To think of Garbo in my little den, wanting to be alone!"

Price's first collection of his cartoons is entitled "Don't Get Polite with Me." Price offers to autograph a copy for any Penn Stater who mails \$1 with ten cents postage to Price Enterprises, Riverside, Conn.
