## STAFF THIS ISSUE

Editorial Staff: Night editor, Gus Vollmer; Copy editors, Phil Austin, Lix Newell; Assistants, Craig Sanders, Don Shoemaker, Peggy McClain, Nancy Gray, Christa Novatka; Photographers, Arnie Rosenberg, Bob McCabe. Ad Staff: Clara Thiessen, Connie Anderson, Betty Schmidt.

## Chapel Funds Plan A Wise Decision

After much discussion and debate, the fate of the Chapel collection funds has been decided, and decided wisely. The recommendation that the funds go toward construction of a meditation chapel and scholarship aid to bring students from Silliman University in the Philippines to the College was reached by a student-faculty committee which has been studying the use of the funds for several months.

The committee was much impressed by the visit of Leopoldo T. Ruiz to the campus in December. Ruiz is at present the consul general of the Philippine Republic in Chicago and will become president of Silliman University April 1. When he appeared before the committee, he suggested that the funds could be used to provide for an instructor to spend a year studying here or scholarships for Silliman students to study here. He also said the money could be put toward the purchase of books, laboratory equipment, audio-visual aids, or other equipment needed at the university.

As for the chapel, not only will it be an asset to the campus, but it will perhaps improve the Christian morals of at least a few students here. While it may be some time before the chapel becomes an actuality, gifts from outside sources should provide the campus with one without necessitating student financial support.

The problem of what to do with the chapel funds arose when the communists took over China and refused to allow money to enter the country. For 40 years prior to that, the money was sent to support Lingnan University in Canton, China. The project was then known as Penn State-in-China.

Under the present proposal, the plan to split the funds between the meditation chapel and scholarship aid will be reviewed in two years. This will enable the committee to study any change in the situation and make adjustments accordingly without hurting anyone's feelings.

The committee's decision was in the best interests of everyone concerned.

## WD Facilities Move Should Be Obeyed

The West Dorm Council has taken action to eliminate the practice of fraternity men using the West Dorm area washing facilities. It was pointed out at a council meeting Monday night that members of at least four fraternities downtown and several houses on campus have been using the dormitory facilities.

It should be apparent that the West Dorm Council is justified in its stand. Since fraternity men are in no way connected with dormitory living once they live in fraternity houses, it is totally unfair and unethical for them to use the washing facilities.

But, the West Dorm Council, while it is at work trying to establish justice, should also get at the independent men who live downtown and use the dormitory washing facilities. These men, too, are not connected with the dormitories and should not be using the facilities.

These facilities have been provided by the College as an added convenience for students living in the dormitories. These facilities are a part of what they are paying for. On the other hand, men living in fraternity houses and in independent units downtown are using facilities which are not theirs—which they are not paying for.

We hope that after Harold W. Perkins, assistant to the dean of men and adviser to the Interfraternity Council, receives the council's recommendation for the elimination of fraternity use of dormitory washing facilities, fraternities will comply to the request. Town independents should also be informed. This appears to be the only fair conclusion.

## Safety Valve—Rockets May Be Used

TO THE EDITOR: Attention loyal State football fans! Make your "Rocket" reservations early for the excursions to Philadelphia, Syracuse, Morgantown, or "what have you."

This phrase may become common-place in the gridiron seasons to come, if the College Senate abolishes the Saturday football holiday because it "no longer serves its original purpose in THIS DAY OF MODERN TRANSPORTION" (quoted from Tuesday's Daily Collegian).

It's true that the horse and buggy have been replaced by the automobile, locomotive, conventional airplane, and more recently the jet, and rocket. However, air and rail service from State College is poor. It is conceivable, though, that a student having classes until noon on Saturday, operating a "souped up" Cadillac or Rolls Royce, might be able to complete a 200 mile trip before half the game were over. The College might even be able to arrange for the sale of "second half tickets."

Upon consideration of the safety in a speeding Cadillac, and the desirability of seeing a whole game, chartered rockets would be a better solution, I believe.

Since I am a senior, I would be unaffected by the new policy, but I am nevertheless amused by the reasoning behind it.

—Donald Fields

## Gazette...

Thursday, February 26

AIEE, 7:30 p.m., 219 EE.  
ALPHA RHO OMEGA, 7:30 p.m., Home Ec Living Center.  
AMERICAN SLAVONIC ORGANIZATION, mixer, 7:30-10 p.m., Home Ec Living Center.  
CHRISTIAN SCIENCE ORGANIZATION, 6:45 p.m., 304 Old Main.  
FENCING CLUB, 7 p.m., 3d floor Water Tower.  
FRENCH CLUB, 7:30 p.m., McElwain Lounge.  
INDUSTRIAL RELATIONS RESEARCH ASSOCIATION, 7 p.m., 208 Willard.  
PI LAMBDA SIGMA, 9 p.m., 108 Willard.  
POLITICAL SCIENCE CLUB, 7:30 p.m., 317 Willard.

### COLLEGE PLACEMENT

Complete lists of visiting representatives are available at the College Placement Office in 212 Old Main. Interviews can be arranged and information secured at the office.

Toledo Edison Company will interview B.S. candidates in C.E., E.E. and M.E., March 2.

Hamilton Standard Division will interview B.S. candidates in M.E., E.E., Aero. E. and Metallurgy, March 2.

Colgate Palmolive Peet Company will interview June and summer B.S. candidates in Chem. Eng., C.E., E.E., I.E., M.E. and Chem., March 3.

Clark Brothers Company will interview June and summer B.S. candidates in M.E., March 2.

Kurt Salmon Associates will interview June and summer B.S. candidates in I.E., March 2.

Scott Paper Company will interview June and summer B.S. and M.S. candidates in Chem., Accounting, Commerce and Economics, L.M.R., Chem. Eng., and Industrial and Mechanical Eng., March 3.

The Metallurgical and Chemical Division of General Electric will interview June and summer B.S. and M.S. candidates in Chem., Chem. Eng. and Metallurgy, March 5 and 6.

Mallinorodt Chemical Works will interview June and summer B.S. candidates in Chem., Commercial Chem., E.E., M.E., and Chem. Eng., March 5 and 6.

Boeing Airplane Company will interview June and summer B.S., M.S., and Ph.D. candidates in Aero E., M.E., E.E., C.E. also M.S. and Ph.D. candidates in Phys. and Math., March 5 and 6. They will also interview juniors in engineering fields for summer work.

North American Aviation, Inc., Columbus Division will interview June and summer B.S. candidates in C.E., Aero E., E.E. and M.E., March 5 and 6.

American Stores Company will interview June and summer B.S. candidates in C.E. and M.E., March 6.

National Supply Company will interview June and summer B.S. candidates in C.E., E.E., I.E., M.E., Commerce & Economics, Accounting, Metallurgy, Mining Eng. and P.N.G., March 6.

National Tube Division, U.S. Steel, Lorain, Ohio, will interview June and summer B.S. candidates in I.E., C.E., M.E., L.M.R., and Ind. Psych., March 6.

National Tube Division, U.S. Steel, Lorain, Ohio, will interview juniors for summer work, March 6.

Corning Glass Works will interview June and summer B.S., M.S. and Ph.D. candidates in Chem. Eng., Chem., Phys., Accounting, C.E., M.E., E.E., and I.E., Ceramics and Metallurgy, March 6.

Aberdeen Proving Grounds will interview B.S. candidates in Phy. Math., M.E., E.E., and Chem. Eng., March 9.

Kimberly Clark Corporation will interview B.S. candidates in Phys., Chem., Accounting, Chem. Eng., C.E., E.E., I.E., and M.E., March 9.

Touche, Niven, Bailey & Smart will interview Accounting majors, March 9.

Hercules Powder Company will interview June and summer B.S. candidates in Chem. Eng., Chem., E.E. and M.E., March 9.

Dow Chemical Company will interview June and summer B.S., M.S. and Ph.D. candidates in Chem. Phys., Chem. Eng., I.E., M.E., and Metallurgy, March 9.

Sears, Roebuck & Company will interview June graduates interested in a career with Sears, March 9, 10, 11 and 12.

Burroughs Adding Machine Company will interview June and summer B.S., M.S. and Ph.D. candidates in M.E. and Physics, March 11.

U.S. Steel Company will interview graduates interested in Industrial Sales, March 11.

National Tube will interview Commerce and Economics and Accounting majors, March 11.

Chicago Bridge & Iron will interview June and summer B.S. candidates in C.E., March 11.

### STUDENT EMPLOYMENT

Wanted: Boy for lettering on photo.  
Camp without children wanted for summer job near State College.  
Camp Cherokee, Pa., will interview March 6.  
Hiram House Camp and Camp Cleveland will interview March 9.  
Camp Conrad Weiser, Pa., will interview March 10.  
Trail's End Camp, Pa., will interview March 14.

## Little Man On Campus By Bibler

"If you can't answer a student's question again, just try to look intelligent and ask him to look it up for himself and make a report on it."

## With Open Mind

By MARSHALL O. DONLEY

A few days ago we found ourselves involved in a typically male action—getting our hair cut in a local tonsorial emporium. While the dark-haired, white-suited barber threw the thin striped sheet around our neck and followed it with the ever-present white paper choker, we could not help thinking about barbers in general. What is it with them—just what do they think of while they peer knowingly into our furry heads?

This particular barber wore a carefully-kept black mustache; why do barbers wear well-trimmed mustaches? Perhaps they use the mustache as a chance to show off their barbering ability—the way the skilled mechanic shows off his ability by hopping up the engine of his car. It's a kind of industrial pride, a demonstrating of the potentialities of the business, perhaps with the sly thought of encouraging others to undertake similar ventures, thus bringing more business to the mechanic or barber.

But, we could not help wondering as we observed the smirk on the face of our barber, what does the barber think as he clips his scissors and runs his mechanical gadgets through his customer's hair? His face gave some small indication of the thoughts—the lips curling in slight disgust as the task continued.

He is thinking, no doubt, of the great West, where sheep herders line up thousands of helpless, baing animals and drive them against their will into a huge wet pit where chemicals are poured over their bodies to clean the wool and make it easier to shear.

The barber thinks this as he douses our hair with some liquid, his mind subconsciously comparing the liquid with the chemical sheep-dip. And his thoughts go on to the shearing of the critters as he runs electrical cutters violently through our hair.

Perhaps his mind ponders the comparison between sheep wool and human hair. Charles Antelle, the now-famous hair tontician, hires spiers all over the country to tell people that sheep and humans are the same when it comes to hair. The reason for this, according to Charles A., is that the human hair also contains lanolin, a fabulous product found elsewhere only in sheep.

(Of course, Charles A. will sell you this gay product, stolen from the hapless sheep, for a nominal cost. The reason you can't steal it from the sheep yourself is that it has to be refined after it is stolen.)

Then, again, as the white-suited tonsorial master splashes liquid in our hair, we thought that perhaps we were getting something really beneficial to the scalp or something. But, alas, the barber

is also a businessman, and, upon inquiry we discover it is merely water. (You can get real stuff put on, but it'll cost you more, he tells you.)

Have you ever noticed how stealthily the barber conceals the fact that it is water, not a valuable tonic, that is in the bottle he splashes on your head? He picks up the bottle, which is an elegantly designed unlabeled contrivance, swings it gaily above his head, and applies it very liberally to your hair. He rubs it around, carefully allowing a bit of it to run down the sides of your face so you get the idea he is being very liberal with it.

Of course, when you pay him and he uses real stuff, it is a different story. Then the amazing liberality with which he previously doused your hair becomes niggardly conservatism, and the tonic falls, drop by drop upon your hair. You notice also, if you look close, that the opening on the top of the tonic bottle (which of course proudly announces itself as TONIC) is small and especially designed so as to allow drops of the costly fluid to fall only after violent shaking.

And so the barber goes on his way, clipping and splashing, ever retaining his smirk which gives some hint of his opinion of humanity as seen from the viewpoint of one foot above and two feet over the top of man's head.

He sees man, doubtlessly, as a tragic figure, doomed endlessly to eternal trips to the clipping shed, there to have his wool cut, strained, shook, and wetted (with real tonic if he's rich).

But even in his dispassionate reaction to man's head, the barber serves a purpose—he reminds the person whose hair is being snipped that he is just another animal, just a thing that must be regularly run through the sheep-dip chemical pit and sheared. Women, with their many advantages in many fields, miss out in his ego-leveling experience.

They must go, not to a philosophical barber, but to beauticians, who are of a different sort, using all types of mechanical monsters (hair driers, etc.) to inflate, not deflate, the ego of the female.

The women don't get a chance at the philosophic sheep-dip.
