face a higher fine for the first offense and greater convenience in paying first offense fines under a procedure adopted by Tribunal, men's judicial board, according to

men's judicial board, according to James Schulte, chairman. The first offense fine will be raised to \$2. It had been \$1 for the first offense. The increased fine will be imposed on those who have not yet been asked to ap-pear before Tribunal. Several stu-dents have been sent cards for past Tribunal sessions, but for past Tribunal sessions, but for some reason did not appear. Schulte said these students, if fined, would be subject to the old fine of \$1.

Tightened Restrictions ×4. Students who have been asked to appear for the first time will be allowed to pay their fine at the Student Union desk in Old Main starting tomorrow and before a specified time on the Tri-bunal notice. Only students who are charged with a first offense may pay the fine at the SU desk. If these students wish to appeal to Tribunal, they may do so be-tween 7 and 10 p.m. Tuesdays. Schulte said failure to either pay the fine or to appear before Tri-bunal will result in a higher fine and probable referral to the Dean of Men's office.

Tribunal tightened restrictions on second offenders. Those found guilty of committing a second of-fense will face a \$3 fine and three weeks probation from Tribunal. tor of Athletics Harold R. Gilbert looks very pleased.

weeks probation from Tribunal. Previously, Tribunal had estab-lished a \$1 to \$3 fine range on second offenders plus a possible two weeks probation from Tri-bunal. During the probationary period, student violators are not permitted to drive on compute and permitted to drive on campus and must sign in at Tribunal every Tuesday night for three weeks following their appearance for

the second offense. **50 Cases Weekly** Students who have been noti-fied to appear before Tribunal for a second or third offense can-pot navy their fines at the Student Studay: not pay their fines at the Student Union desk, but must appear be-fore Tribunal. Students found nations will be concluded Sun-

For College **Atom Pile** Trustees Pass Proposal; **AEC** Approval Sought

Plans for the construction of a nuclear reactor at the College are now being completed.

The plans will be submitted to the Atomic Energy Commission, and if the proposal is accepted by the commission, the College will be eligible to receive the enriched uranium

necessary to operate the reactor, President Milton S. Eisenhower

Neutron Source Approval of the College Board of Trustees has been received for the idea of constructing a reactor, but the board still must pass on the site of the building.

The reactor, according to Dean Eric A. Walker of the School of Engineering, will serve as a source of neutrons and gamma rays for experiments in several fields. The reactor will be available to all reactor will be available to all struction of a nuclear research departments of the College which reactor at the College. For the nast form

Circle dormitories, have been considered. The specific site will be determined within the next month.

Completion Set for 1954

Estimated cost of the reactor, not including the enriched uran-ium, is about \$250,000. The uranium will be obtained on loan from

the Atomic Energy Commission. The reactor building will be about 30 by 60 feet, and 35 feet high. Offices and laboratories will be located alongside the main re-

Estimates place the project's completion date in the summer of 1954 if the necessary materials are available.

William M. Breazeale has been appointed professor of electrical engineering and placed in charge

ing neutron or gamma ray irradia-tions. Initially the reactor unit will consist of the reactor, the reactor building, and a small wing with offices and a shop. Three sites at the east end of the campus, just beyond the Nittany and Pollock Circle dormitories have been com-

Breazeale had been at the College for approximately six weeks before the announcement of his appointment yesterday.

Research conducted by Brea-zeale has been primarily in the fields of microwave radar and neutron chain reactors. He is the author of many technical papers in these fields, including an Oak Ridge National Laboratory report on "A Low Cost Nuclear Chain Reactor."

Heactor." He has served on the faculty at Vanderbilt University and the Un-iversity of Virginia. In 1941 he was appointed to the staff of the radiation laboratory at the Massa-chusetts Institute of Technology,
