

Reds Send U.S. 17 More POWs

PANMUNJOM, Saturday, April 25 (AP)—Seventeen more American sick and wounded returned to freedom from the Communist stockades of North Korea today, swelling the total U.S. repatriates in six days to 136 men from all branches of the service.

The Reds also released four British, four Turks and 25 South Koreans.

Fifty more South Koreans were to be released later in the morning, completing the 100 quota for Saturday.

NATO Votes Arms Boost; Germans Demur

PARIS, April 24 (AP)—The North Atlantic Treaty Council voted a whopping military equipment program today at the same hour that the West German upper house dealt the whole defense buildup a shaking blow.

Spurred by Secretary of State Dulles and other members of the U.S. delegation, the ministers of the NATO countries first declared in a formal resolution that the six-nation European Army Treaty must be ratified as the best means of bringing German troops into Western defense.

Then it voted a four-year, 885 million dollar budget to build airports, a radar warning system and other installations, and to enlarge supply ports.

Secretary Dulles told a news conference last night that he couldn't predict rich aid appropriations from the American Congress unless real progress could be shown toward ratification of the treaty by June 30.

Of the 885 million dollars, 185 million went for projects asked last December by Gen. Matthew B. Ridgway, the supreme commander in Europe, but which were temporarily held up. The balance went for new projects expected to be ready by the end of 1956.

BONN, Germany, April 24 (AP)—Ratification of twin treaties welding West Germany to free Europe's defenses struck a snag in the Bonn upper house today, but Chancellor Konrad Adenauer moved to go over the senators' heads to make the treaties law.

Faculty Luncheon Club

The Faculty Luncheon Club will pay tribute to Dr. Edward Steidle, retiring dean of the School of Mineral Industries, at its meeting, noon Monday in the Hotel State College. Dr. Steidle will speak on "Charting the Future of Mineral Industries Education."

Cosmopolitan Club

Cosmopolitan Club will meet at 3 p.m. tomorrow at the home of Amos E. Neyhart, head of the Institute of Public Safety, Route 322, Panorama Village.

The World At a Glance

Eisenhower Intervenes In Offshore Oil Debate

WASHINGTON, April 24 (AP)—President Eisenhower intervened tonight in an attempt to halt a Senate filibuster against the bill to establish state ownership of submerged oil lands.

Calling for prompt passage of the bill, he said he is "deeply concerned" about the delay caused by the 17-day debate. He said it is holding up the administration's legislative program.

Churchill Knighted

WINDSOR, England, April 24 (AP)—Queen Elizabeth II knighted Winston Churchill tonight, elevating him to the highest order of British chivalry with the touch of a golden sword.

The British Prime Minister, 78, knelt before his young Queen in the drawing room at Windsor Castle to receive—for his decades of service to the empire and the throne—the accolade he declined from her father, King George VI.

UN Currency

WASHINGTON, April 24 (AP)—Henry Cabot Lodge Jr., declared today, "the idea of the United Nations issuing currency is absolutely fantastic" and "I do not approve of it."

MacArthur Criticizes Far East Strategy

WASHINGTON, April 24 (AP)—Gen. Douglas MacArthur whipped up a new wave of debate on Far East strategy today by declaring the Korean war and all other global issues could be settled promptly by notifying the Chinese Reds that their bases and supply lines would be destroyed.

Initial reaction from senators ranged from lukewarm to cold, but Rep. Van Zandt (R.-Pa.) declared MacArthur "is absolutely right" and called for use of atomic bombs on strategic targets in North China and Manchuria.

New Cold War Surprise

NEW YORK, April 24 (AP)—Soviet bloc representatives in this country have been dropping hints which indicate a new surprise move in the cold war. This one would be a bid to permit certain Soviet republics such as the Ukraine and White Russia Byelorussia to have their own embassies or ministries abroad.

Allies Bomb Red Supplies

SEOUL, Saturday, April 25 (AP)—Allied bombers smashed Communist troop and supply concentrations in North Korea Friday, while ground warfare sputtered in a string of sharp patrol actions.

Lewis Proposes Repeal of Labor Relations Laws

WASHINGTON, April 24 (AP)—John L. Lewis today proposed that Congress repeal all labor relations laws of the past 21 years but Sen. Taft (R.-Ohio) questioned whether it might result in returning labor relations to "the law of the jungle."

Taft, the Senate Majority Leader, and Lewis, president of the United Mine Workers Union, engaged in a brief, but lively clash at a Senate Labor Committee hearing into proposals to change the Taft-Hartley Act.

Taft said he generally favored the idea of getting the government out of the labor relations arena, but it had proved impossible in 1947 when the Taft-Hartley Act was passed, and he wondered whether the time had yet arrived.

The Ohio senator said it might be all right for the big unions, but perhaps some of the smaller unions still needed legal protection.

Lewis replied that the "realm of controversy" over the Taft-Hartley law was so acute it would be best to "eliminate the controversy" by repealing the law.

MY QUESTION TO THE G-E STUDENT INFORMATION PANEL:

"What opportunities are available in General Electric for a career in manufacturing?"

... EARLE E. WARNER, U. of Illinois, 1952

The answer to this question, presented at a student information meeting held in July, 1952 between G-E personnel and representative college students, is printed below. If you have a question you would like answered, or seek further information about General Electric, mail your request to College Editor, Dept. 123-2, General Electric Co., Schenectady, N. Y.

G. C. HOUSTON, Manufacturing Services Division . . . In General Electric manufacturing operations involve supervising and administering the activities of more than 100,000 men and women in more than 100 plants. This includes the operation of approximately 75 distinct product businesses, producing some 200,000 different products rang-

ing from heavy industrial equipment to precision instruments and consumers' goods.

The cost of manufacturing our products represents 70% of the total expenditure for all operations including research, engineering, marketing and other administrative functions.

With these activities and expenditures in the field of manufacturing one can readily visualize the breadth of opportunity in the area of manufacturing. This wide scope of manufacturing activities and the importance of their integration into an effective organization provide opportunity for challenging and rewarding careers in such areas as follows:

Manufacturing Supervision: The most important part of any manufacturing organization is men—those who apply their varied skills and talents to perform the many tasks involved in the manufacturing process. To direct the activities of these men, to inspire performance, co-operation and teamwork, to provide fair and equitable treatment, to see that work is done in required quantity—on time—and at the lowest possible cost, is the responsibility of Manufacturing Supervision. It offers a challenging and satisfying career for individual growth and development.

Manufacturing Engineering: This is the creative portion of modern manufacturing. It involves interpretation of initial product designs into good manufacturing practices through planning the methods by which a product will be manufactured, specifying and designing machine tools and equipment, and planning and developing new processes. It is vitally concerned with such subjects as plant layout, materials handling, operation planning, and quality control. It requires a thorough knowledge and broad understanding of how these subjects influence the manufacture of a product.

Purchasing: General Electric is one of the most diversified purchasers in the country today, buying material from every industry. Much of this purchasing involves technical problems, and requires a knowledge of sources of supply, market trends, and new products. Many items purchased are components or finished products of other technical industries. Constant contact with price, as well as evaluation of current and long-range raw material supply situations, is another phase of this activity. It is becoming more and more important as a career opportunity for young men.

In addition to the above described areas of opportunity in manufacturing, such manufacturing services as wage-rate determination, production control, inventory management, production planning and development, and materials handling offer opportunity for highly trained specialization and for competent management supervision.

These areas of manufacturing, together with many others, offer the college graduate of today a wealth of opportunity for a challenging and rewarding career.

You can put your confidence in—

GENERAL ELECTRIC
