Ambulance Possibility Is Remote

The possibility of an ambulance owned and operated by the College in connection with the College Health Service was described as remote yesterday by Wilmer E. Kenworthy, director of student affairs.

The best chance for the addition of the ambulance to the health service equipment, Kenworthy said, would be in the event that the General State Authority would take action on the proposed enlargement to the Infirmary. Provisions for an ambulance and its housing and operation might be included in the plans for the new wings, he said.

The two biggest obstacles in the way are cost and housing, he said. The cost of an ambulance today could be conservatively estimated at about \$7500, he reported. The College, he added, would have to construct some type of garage for the vehicle. Expense of this is unreasonable considering that an addition to the Infirmary is pending, he said.

Other problems involved would be maintenance of the equipment and supplying trained drivers in constant attendance, Kenworthy said. As a result, he said, the cost of the health service fee would undoubtedly have to be increased.
