

# Charities United In Chest Drive

To eliminate the problem of repeated charity drives on campus, Campus Chest was organized in 1950. The chest conducts a single, consolidated drive during the fall semester of each year.

Funds are distributed to a number of organizations, each receiving a set percentage of the amount contributed. No other charity drives are allowed on campus.

In the 1952 drive, \$11,614.17 of a \$12,000 goal was collected. In 1951, \$11,890.67, more than 99 per cent of the \$12,000 goal, was contributed by faculty members and students.

Nine organizations benefited by the drive last year are the Penn State Christian Association, World Student Service Fund, Women's Student Government Association Christmas Fund, State College Welfare Fund, Salvation Army, American Cancer Society, National Student Service Fund for Negro Students, Penn State Scholarship, and the Heart Fund.

PSCA received the greatest amount, 46 per cent.

In addition to personal solicitations, the chest receives funds from socials and special events. A Kick-off Dance in the fall starts the campaign.

Two requirements must be met by organizations to be authorized to receive chest funds. Their activities must reflect credit on the College community and they must represent the entire College community and not a small segment.

The chest developed from plans worked out by the National Student Association, of which the College is a member. The chest was organized to serve three purposes: to eliminate duplicated efforts, establish a definite policy toward the operation of fund drives on campus, and emphasize the responsibility of students and faculty toward the charities and organizations benefiting from the fund.

Five per cent of Britain's workers are in defense work.

## Dairymen Discuss Waste Problems

More than 35 representatives of the dairy industry are attending a conference on dairy wastes at the College.

Dr. Lyman E. Jackson, dean of the School of Agriculture, and Dr. Eric A. Walker, dean of the Engineering school, addressed the group last night.

R. Rupert Kountz, professor of sanitary engineering, has explained that milk wastes are four to eight times as strong a pollutant as sewage and have a potential use as a farm animal feed supplement or fertilizer.

Research is under progress at the College to find an economical method for converting these dangerous pollutants into useful products.

Radio is called wireless in England.

## Concert Series Will Feature Noted Artists

Recognized vocal and instrumental artists perform each year in the Community Concert Association series.

Last year's program opened with the National Symphony Orchestra of Washington, D.C. Constance Keene, pianist with the New York Philharmonic and the Boston Symphony Orchestra, and the Robert Shaw Chorale, a group of 32 voices and 19 instrumentalists, also performed at the College.

William Warfield, famous for his performance of "Ol' Man River" in the movie "Show Boat," completed the year's schedule.

The association will conduct its annual membership campaign early in October. New students and faculty members will be able to obtain membership tickets selling for \$6 for the four-program series.

Last year's members will have an opportunity to renew memberships before the campaign for new members begins. Memberships are limited because of the seating capacity of Schwab Auditorium where concerts are held.

No tickets will be sold for individual concerts and memberships will not be available after the close of the campaign.

Artists for programs will be scheduled at the close of the membership drive in accordance with the budget made possible by the number of tickets sold.

## Engineering Council Serves As Opinion Sounding Board

Engineering Student Council is a sounding board for student opinions. It is represented on All-College Cabinet by Paul Brobst, council president.

Council membership is divided into two sections—regular representatives—and special representatives. Regular representatives are elected annually from each class in the six departments of the Engineering school.

Special representatives are elected or appointed annually by honorary organizations within the school. These societies include the American Institute of Architects, American Institute of Electrical Engineers, American Society of Civil Engineers, Alpha Pi Mu, American Society of Mechanical Engineers, Eta Kappa Nu, Institute of Aeronautical Sciences, Penn State Engineer, Pi Tau Sigma, Society for the Advancement of Management, Society of American Military Engineers, Scarab, Sigma Tau, Tau Beta Pi, Chi Epsilon, Society of Automotive Engineers, American Foundrymen's

Society, and Agricultural Engineers' Society.

Officers are chosen in the spring, after election of Engineering Council members. The president is elected by outgoing council members. The vice president, secretary and treasurer are chosen by the incoming council.

The council sponsors social events and mixers for members of the Engineering school. In the spring, the council sponsors an open house program to acquaint the public with functions of the school. The council publishes the Engineering Newsletter, composed of council minutes and items of interest to engineering students.

## Psych Staff Members Attend Conference

Twelve staff members of the Department of Psychology attended the 61st annual meeting of the American Psychological Association at Cleveland.

Five psychology faculty members presented papers before sectional sessions or took part in panel discussions.
