

# N.Y. Gets Ike's OK On Power Project

WASHINGTON, Nov. 5 (AP)—President Eisenhower today gave New York state final authority to join with Canada in constructing a 600 million dollar St. Lawrence river power project that will produce more than 12 billion kilowatt hours of energy a year.

## Polio Virus 'Captured' In Photos

POCONO MANOR, Pa., Nov. 5 (AP)—The polio virus has been captured in photographs taken by powerful microscope, it was announced tonight.

The pictures show the virus as tiny round ball, so small that a million side by side would form a row only an inch long.

Some of the viruses appear singly, others in clusters resembling fish eggs.

Dr. A. R. Taylor, research virologist of Parke, Davis & Co. Detroit, showed the pictures to the Electron Microscope Society of America. They were taken with an electron microscope at magnifications up to 200,000 to 300,000 times.

The historic pictures confirm estimates that the polio virus is one of the smallest of all viruses. They were taken during studies which indicate it is feasible to prepare concentrated virus preparations necessary in making a polio vaccine, Dr. Taylor said.

The Detroit company is working to develop a vaccine, but has not disclosed any details. It has said a vaccine would not be ready for general use until after more development and testing, which may take a year or more.

Recently developed techniques of growing polio virus in test tubes upon non-nervous tissue made it possible to obtain almost pure polio virus, and pictures of it.

Dr. Taylor showed photographs of Type I or Brunhilde polio virus. All three types of virus which can cause polio in humans are being studied by Parke-Davis.

Assuming that pending court actions to halt New York's participation are unsuccessful, actual construction may begin next spring.

Objections to New York's participation have been filed in petitions to the U.S. Court of Appeals by the Pennsylvania Coal Producers Assn., by the Lake Ontario Land Development & Beach Protective Assn., and by the Public Power & Water Corp., Trenton, N.J.

The New York authority formally accepted this week the license to construct the project.

Eisenhower, in his executive order, also named the Secretary of the Army and the Chairman of the Power Commission as the U.S. members of the St. Lawrence River Joint Board of Engineers. They will act with the Canadian members in approving plans and specifications covering the construction program.

The power project, a necessary preliminary for possible construction of the long debated St. Lawrence Seaway, will be built in the International Rapids section of the river, between Massena, N.Y., and Cornwall, Ont.

It is Canada's position that if Congress again refuses to permit the United States to join in building the Seaway, Canada will build it itself, on its own side of the river.

## Eden Wants Conference With Reds

LONDON, Nov. 5 (AP)—Foreign Secretary Anthony Eden said today Britain will seek talks with the Soviet Union at any level despite what he called Russia's "fundamental hostility to the Western nations."

In a review of world affairs, Eden told the House of Commons there has been "some relaxation" of Soviet tension with the free world since Stalin's death.

This is encouraging as far as it goes, he said.

Eden asserted the latest Russian note, a 4500-word document delivered yesterday, absolutely turned down the Western Big Three' offer of foreign ministers' talks with the Russians on Germany and Austria.

He said the Soviet reply laid down unacceptable pre-conditions which would "destroy all our defensive arrangements altogether."

"Despite this setback and this note," he said, "we, for our part, remain prepared to discuss Germany and Austria with the Soviet government at any time and at any place and without any prior conditions at all."

In Washington, U.S. officials who have been studying Russia's new note suggested privately that it marks the end of a brief but hopeful era in East-West relations that began with Stalin's death.

## Meat Rationing In Britain to End

LONDON, Nov. 5 (AP)—The British meat industry will be handed back to private traders next summer and the nation's 15 years of food rationing will end simultaneously.

Prime minister Churchill's government announced this today. It said also that price control and allocations of meat and bacon will be wiped away.

When rationing ends, meat traders will be able to resume their prewar business operations and the farmers will be given price guarantees, it said.

## Greek Spinster Gets \$3000, Wins Shepherd's Love

ATHENS, Greece, Nov. 5 (AP)—She tried passionate advances, she tried poetic love letters. They all failed.

So 44-year-old spinster Catherine Tsakaracos—helped by four cousins—kidnapped handsome, 24-year-old shepherd Athanasios Kapsalas from Castania village, central Greece, and took him to the hills.

Still she failed to win his love. Then a distant relative died in the United States and left her \$3000. Now Catherine is Mrs. Kapsalas, said reports of the saga arriving here today.

## 'Air Raid' Shows Flaws

WASHINGTON, Nov. 5 (AP)—President Eisenhower went unscathed in a mock air attack on the nation's capital today, but the possible fate of top military leaders—at least in theory—rigged some chills.

At 10 a.m. the eerie rise-and-fall wail of more than 100 sirens sent the President and Mrs. Eisenhower hurrying to the secret million-dollar bomb shelter buried somewhere in the White House grounds.

For 18 minutes, the President and his first lady remained there, snugly protected against the rain of mythical bombs falling on the city.

But while the chief executive

apparently was safe, the test demonstrated that some of the nation's key military leaders in the Pentagon—and much of the legislative machinery of Congress—might have been wiped out in a real attack.

At the Pentagon, Secretary of Defense Wilson and other high officials went to Air Force command headquarters, two floors underground, where actual bomb destruction of the building might have entombed all of them.

On Capitol Hill, the alert was generally ignored in the Senate and House wings and in the nearby congressional office buildings. "We are exempt," one Capitol official explained. He apparently meant Capitol Hill was exempt from the drill, not from bombs.

# 2 Killed, 15 Wounded In Trieste Shooting

TRIESTE, Nov. 5 (AP)—Pro-Italian demonstrations got out of hand in this disputed city today and territorial police, shooting to break up a riotous, hostile crowd, killed two persons and wounded 15.

Scores of other demonstrators and police were injured in other battling around the strategic port, a part of the Trieste Free Territory's Zone A that Britain and the United States proposed Oct. 8 to turn back to Italian administration. About three dozen were hospitalized.

The shooting came in late afternoon near the Roman Catholic church of St. Anthony in downtown Trieste. A priest was reconsecrating the church because of blood spilled in it during a wild melee between students and police earlier in the day.

As hundreds of students crowded around the church for the ceremony, a riot police jeep moved into the throng. Students began hurling paving blocks and sticks at the occupants.

Witnesses said the police tried to fight free of the crowd, but failed. Before the fight ended it was estimated 1000 demonstrators, all apparently students, and 200 police were involved.

The crowd smashed several police jeeps and trucks. The police used fire hoses in a vain attempt to break up the riot, then opened fire. A youth of 17 and an elderly man were killed. Trucks bearing armed United States and British troops moved toward the center of the city.

It is the first time they have been called out during the two days of demonstrations and rioting, touched off by a celebration of the 35th anniversary yesterday of Italy's victory in World War I.

## French Fail to Draw Vietminh from Hideout

HANOI, Indochina, Nov. 5 (AP)—The French high command today pulled its troops from Phu Nho Quan for the second time after failing to draw Vietminh Division 320 from hideouts in the neighboring hills into a knockout battle.

The French and Vietnamese detachments moved 10 miles southward to a village called Laicac. They encountered no Vietminh interference.

## Radar Spy Evidence Is Revealed

NEW YORK, Nov. 5 (AP)—Sen. Joseph R. McCarthy (R-Wis) claimed evidence today that a former engineer in the top secret field of Army radar "is a member of the Communist underground today."

And he added that a second witness before his spy-probing Senate subcommittee—a woman—had without question "engaged in espionage in the Signal Corps at Fort Monmouth, N.J."

McCarthy did not name either of the witnesses in his talks with reporters outside the hearing room of his Senate permanent investigations subcommittee. Press and public are barred from the closed hearings.

He claimed the engineer refused to tell the subcommittee whether he is a spy or whether he ever stole radar secrets. McCarthy added:

"We have evidence that he is a member of the Communist underground today and that he was part of the Rosenberg spy ring which delivered material to Communist agents . . ."

"Evidence before this subcommittee clearly indicates that people labeled as part of the Rosenberg spy ring are still walking the streets free."

The senator said the engineer worked on radar material in the Federal Telecommunications Laboratories, a subsidiary of International Telephone and Telegraph Co., and said they "are doing 100 per cent government work."
