

Music Fund Aids Student Fire Loss

Funds are being collected by the music department to help Richard Brady, seventh semester music education major, replace a tenor saxophone lost in a fire which swept his apartment house residence Thursday.

The department's faculty and students and members of the Blue Band, of which Brady is a member, have contributed to the fund. The saxophone was valued at between \$400 and \$500.

A state fire marshal from the Hollidaysburg state police barracks will investigate today causes for the fire which left ten persons homeless. Bruce Homan, borough fire marshal, said yesterday.

Personal Possessions Lost
Brady and another student, John Huntoon, eighth semester arts and letters major; a faculty member, William Pritchard, instructor in English composition, and his family; and three other persons were able to escape the blaze, which originally was believed to have been started by defects in the oil burner. Later investigations led firemen to suspect other factors had caused the fire in the three-story frame structure at 133 N. Barnard street.

Total damage has not been estimated, Homan said. Persons living in the building were unable to save personal possessions.

The blaze spread quickly after the initial explosion because of the age of the building and a space between the walls in the cellar which fanned the fire as it swept to the upper floors, Homan said.

Greatest Damage on Third Floor
Brady and Huntoon heard the explosion, gave an alarm and assisted women and children from the first and second floors to safety.

Members of the Alpha Fire department extinguished the fire after several holes had been burned in the building's roof. Heaviest damage was reported on the third floor where water damage was added to the fire's destruction.

Berkowitz Named WDFM Manager

Doris Berkowitz, seventh semester arts and letters major, has replaced Jay Murphy, seventh semester arts and letters major, as temporary student manager of Station WDFM. Murphy resigned his position yesterday.

Anne Hesch, seventh semester arts and letters major, was named temporary traffic manager, replacing Berkowitz.

Aston to Address Chemistry Honorary

John G. Aston, professor of chemistry, will speak at 7:30 tonight before Phi Lambda Upsilon, chemistry honorary, in 109 Osmond.

Changes in the present constitution will probably be proposed at this time, Joseph Mountain, president, said.

CLASSIFIEDS

FOR SALE

SPECIAL OFFER through Liebig Chemical Society. Chem-Phys Handbook 34th edition. Only \$4.00. Call Spencer 8-8703.

1949 FORD Custom V-8 2-dr. sedan, \$795. R&H, seat covers, good tires. Will trade or finance. Call 4712.

1941 CHEVROLET 4-dr. \$95. Call Joe Racik ext. 790 Rm. 111 Jordan.

'41 OLDS sedan in good mechanical condition with heater and radio. Price is reasonable. Call 8-6693.

1941 STUDEBAKER President 4-door, radio, heater, spotlight. Excellent running condition. \$135. Phone 8-6000 or see at 127 Keller Street.

FOR RENT

LARGE COMFORTABLE room near campus. Two single beds. Call 2919.

LOST

LOST SATURDAY midnight—large black music notebook. Valuable and needed. Reward. Call Ross Fishburn 3102.

GREEN ESTERBROOK mechanical pencil in Room 8 Carnegie. Call ext. 272, Bill Evelock.

RONSON ADONIS lighter. Black with orchids. Saturday night in vicinity of SPE. Call Charlotte, 132 McElwain. Reward.

WORK WANTED

WHEN YOUR typewriter needs attention just dial 2492 or bring machine to 633 W. College Avenue.

RIDE WANTED

RIDE TO Bedford, Stoystown or vicinity Nov. 13. Call ext. 451 8 a.m. to 5 p.m. Ask for Jean.

Thomas Speaks

(Continued from page one)

conscience and intelligence to an organization, should be fought because no one has the moral right to lie or misrepresent fact, he added.

Thomas said he opposed the Smith Act, which restricts forces acting to overthrow the government, because of the indefinite nature of its provision.

The McCaren Act, he said, is "mish mash which would be funny if it were not serious."

In a discussion after his speech, Thomas said he regarded loyalty oaths as "silly and ineffectual."

Driving the Communists underground only hastens the already-existing tendency to operate through inner penetration, he claimed.

In his speech, the Socialist leader also discussed five problems of freedom, which he said involve creed and are not tied in with the cold war.

1. Civil liberties, or the respect for individuals regardless of race, creed, or national origin is the problem in which most progress is being made, Thomas said, although Americans have not achieved what they should have in the fight against discrimination.

2. The right of consumers, he said, must be protected in the rise and growth of labor unions, which in some instances tend to disregard the public while seeking personal gains.

3. Freedom of information, Thomas said, should be main-

'Engineer' Sales To Begin Today

An article on future atomic energy is featured in the November issue of the Penn State Engineer which goes on sale today at the Corner Room and the Student Union desk in Old Main.

November Engineer pin-up girl is Gillian Hamer, first semester business administration major from Brazil.

Other articles describe the College's technical institutes and amateur radio.

Council Will Hear Ag Hill Party Plans

Edgar Fehnel, Ag Hill Party chairman, will summarize party plans at the Agriculture Student Council meeting at 7 tonight in 105 Agriculture.

maintained, despite the economic forces which influence newspapers, radio, and other media which are operated on profit-making bases, with advertisers as their financial supporters.

4. Academic freedom, the speaker said, may be maintained by making the distinction between heresy and conspiracy.

5. Religion, he said, is a curse to the world in its organized secular forms, but should be characterized by mercy, love of man, and a humble attitude toward God.

Thomas said he believes totalitarianism of any kind is a threat to all of these freedoms.

Pitt Ticket Sales Begin

Tickets for the Penn State-Pitt game will go on sale at 8:30 a.m. Thursday, the Athletic Association office announced yesterday.

Students will pick up application blanks at the Student Union desk in Old Main, and present them at the Athletic Association ticket office window when they buy their tickets. Harold C. Gilbert, assistant director of athletics, said. Students should ask for "student exchange forms" when picking up the application blanks, he added.

Only one form will be given to each student. If a student is buying tickets for more than one person, the names of the other persons must be written on the back of the blank.

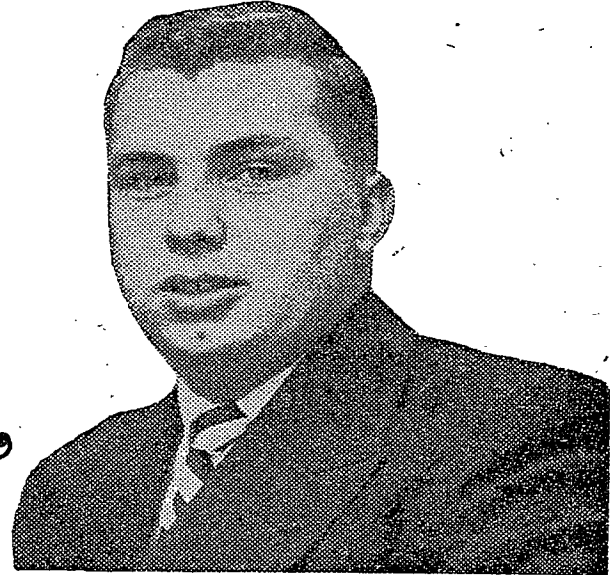

Society to Discuss Speech Correction

Sigma Alpha Eta, honorary speech correction society, will hold a special program and speech clinic open house at 7:30 tonight in 316 Sparks.

Types of speech defects, work of a speech therapist, training programs and job opportunities in speech correction will be the topics of a panel discussion. Several clinic patients will speak to the group.

JOHN B. NOLTE, Purdue University, asks:

"What is G.E.'s Manufacturing Training Program?"

The Manufacturing Training Program at General Electric is a program of basic training for manufacturing leadership, including planned rotational work assignments and related classroom study for outstanding young men who are interested in a career in manufacturing. It was organized to meet the increased demand for effective manufacturing leadership and technical "know how," in line with the expansion and development of the Company's operations by developing trained men to fill future key positions in the organization.

Who is eligible for this program?

In general, the Program is open to college graduates with degrees in engineering and science, and a limited number of business administration and liberal arts graduates. We are looking for outstanding young men with sound educational backgrounds, well-balanced personalities, demonstrated thinking abilities, and having the potential to develop toward top level responsibility in key assignments.

How long is the program?

The normal length of the Program is three years. However, some individuals may be able to complete their training in a shorter period because of previous knowledge or experience in manufacturing work.

What type of work assignments are made?

Work assignments are provided in all phases of manufacturing and related functions so that each man will acquire knowledge of manufacturing engineering, including manufacturing methods and techniques, shop operation, production control, personnel administration, labor relations, engineering activities, sales and manufacturing co-ordination, and general business administration.

In addition to job assignments, classroom courses

cover such subjects as Company organization, manufacturing operations, labor and personnel relations, business administration, law and relationships between manufacturing and other functions of the business. Progress on the job and in classroom work is carefully observed and reviewed periodically with each man to assist him in his career.

What happens after training is completed?

After completing the training program, graduates are placed in operating departments and divisions throughout the Company in positions where leadership and initiative are needed. All placements are made in relation to the aptitudes, abilities, and interests of the graduates.

At General Electric, manufacturing operations involve the administration and supervision of activities of more than 100,000 men and women in more than 100 plants, who are involved in the making of some 200,000 different products.

The wide scope of these activities, the great variety of products, and the diversity of manufacturing activities offer limitless opportunities and exciting challenges to college graduates today.

Manufacturing training is a foundation for leadership—and an opportunity to build a satisfying, rewarding career in one of America's most important industries.

If you are a graduate engineer, or a graduate with definite technical inclinations that include an interest in the career possibilities in manufacturing, see your college placement director for the date of the next visit of the General Electric representative on your campus. Meanwhile, for further information on opportunities with General Electric write to College Editor, Dept. 2-123, General Electric Company, Schenectady 5, New York.

You can put your confidence in—
