# New 'S' Club Plans Meeting

The "S" Club will meet at 7 tomorrow night at Delta Upsilon fraternity to adopt a constitution, according to Richard Crafton, "S" Club committee chairman.

University lettermen are eligible to attend organizational meetings and become members.

Formation of the club was initiated last week when Ernest B. McCoy, dean of the College of Physical Education and Athletics, met with a group of lettermen to explain the purpose of such an organization. A committee was appointed to draw up the constitution which will be presented tomorrow night.

# Town Dialing System Interrupts Dorm Service

Phone service between town and University dormitories was interrupted between 11:30 a.m. and 2 p.m. yesterday. Calls could be made from the dorms to town, but calls coming into the dorms were blocked.

R. O. Graham, telephone clerk, said the trouble was traced to the downtown dialing system.

# State Party Meetings

The executive committee and the advisory board of State Party will meet at 7 tonight in Simmons Hall lounge, John Fink, clique chairman, has announced.

# Ad Training Classes

The first of a series of advertising training classes for members of the advertising staffs of Froth and the Central Promotion Agency will be held at 7 tonight in 9 Carnegie.

# White Fellowship Applications Due

Seniors interested in applying for John W. White fellowships of \$600 must do so before 5 p.m. today at the Scholarship Information Center, 110 Old Main.

Fellowships are awarded to highest standing members of the graduating class who possess, in the opinion of the Senate committee on scholarships and awards, "those qualities of ability and personality that will enable them to profit best by graduate study, at this University or elsewhere, under the direction of the President of the University."

# Tribble Will Speak To IRRA Tonight

O. Hoyt Tribble, associate professor of psychology, will speak to the International Relations Research Association at 7 tonight in 208 Willard.

Tribble, affiliated with the University in management training of Central Extension, will speak on "Current Human Relations' Emphasis in Business and Industry." A movie relating to the talk will be shown.

# Grads Consider Cabinet Seat

Graduate Student Council's petition for an ex-officio seat on All-University Cabinet will be delayed until council members can make a further study of details involved, Gene Love, council president, said Monday night. The petition will be discussed at a council meeting tomorrow.

The council had planned to present the petition to cabinet two weeks ago. Robert Smoot, NSA co-ordinator, had suggested Love delay the petition until he could "work out some of the details" with Love.

Love said there is a possibility that cabinet seat might carry with it enforceable parking regulations for graduate students and additional fees.

# Silva to Speak Tonight

Ruth C. Silva, assistant professor of political science, will speak to the Penn State Geographical Society at 7:30 tonight in the new Mineral Industries auditorium in the rear of the Mineral Science Building.

She will show slides of present-day Egypt.

**RESEARCH—World famous for its achievements in both pure and applied science, G-E research is led by scientists whose names are known everywhere. The many Company laboratories cover a wide range of scientific investigations. Research activities include physics, chemistry, metallurgy, mechanical and electrical problems, ceramics, and many other fields.**

**DEVELOPMENT ENGINEERING**—Development engineers are continually obtaining and assessing new basic engineering and scientific knowledge to make possible new developments. They serve as consultants to help in the solutions of engineering problems, which often require research, experimentation, and the development of a new product or component.

**DESIGN ENGINEERING**—To maintain leadership in the electrical field, design engineers are constantly striving to develop new and better products. Their skill is largely responsible for the steam and gas turbines, motors, heat pump, control equipment, and many other products. In electronics, they design equipment for television broadcasting and reception, radar, and other electronic equipment.

**APPLICATION ENGINEERING**—Since much equipment today is designed for a specific use, the application engineer must have a broad knowledge of the industry for which a particular product is being designed. Because G-E products are widely used throughout industry, imagination, determination, and a sound knowledge of engineering are important assets in this ever-growing field.
