

'Pick Up Sticks' Offers Variety

By EDMUND REISS

When Players' present "Pick Up Sticks" at 8 tonight at Center Stage, play-goers should find that the musical revue offers at least something that appeals to everyone.

Tickets for the show, which will run for six weekends, cost \$1 and are on sale at the Student Union desk in Old Main.

Psych Series Will Feature Stanford Dean

Ernest R. Hilgard, dean of the graduate division of Stanford University, will speak at the first Distinguished Lecturer Series in Psychology at 7:30 Monday in 121 Sparks.

The series is sponsored by the Graduate school and the Psychology department. The lectures are open to the public.

Hilgard will speak on "Human Motivation As Seen by a Psychologist."

Concurrent with his position as dean, Hilgard serves as a consultant for the Veterans Administration and the U.S. Public Health Service.

He is co-author of "Conditioning and Learning" and has published its sequel, "Theories of Learning." He also published an introductory textbook in general psychology.

Dating—

(Continued from page one) Council president.

The amendments pertain to chaperonage and hours for dating in fraternities. One amendment permits dating in fraternities from noon until 10 p.m. Sunday if chaperons are present.

Another change provides that women may be entertained in fraternities on Friday afternoons of weekends when there are registered events.

The third amendment adds an "Approved Dean's List" to the qualifications from which chaperons may be selected. The last change provides that when two couples are chaperons, only one of the couples must be from an approved classification.

Kenworthy said the committee made the amendments in an effort to make the new policy more workable.

He said the two changes were made in chaperon qualifications because the committee doesn't want to make it difficult for fraternities to obtain chaperons.

Kenworthy said as far as the code is concerned at present, no

One of the show's main attributes is the fine choreography conceived by Robert D. Reifsnider, director. As the original revue is a cavalcade of the theatre, a travelogue in time from ancient Greece and the Trojan Wars to Western civilization in 1983, Reifsnider, has designed dances representative of various periods covered by the skits.

The first dance number is "The Poison Goblet," and has its repertoire done in the formal manner of the early Renaissance. Following this is "Country Music," an illustration of an old English song done about the time of Shakespeare.

The next dance takes place in Hades as part of the "Pick-up at Styx" skit which is the meeting of two Restoration rakes and a modern girl. The dance is done to the rhythm of the song, "Ballin' the Jack."

"Pick Up Sticks" features two dance solos: one by Phillip Lang, fourth semester student, is a soft-shoe routine done as part of the "Winsome Winnie" scene, a satire on 19th century melodramas. The other by Kenneth Thomas, second semester music education major, is a modern routine called "Simple Pleasures."

There is also a can-can number as the finale of the first act, a pantomime of the early silent movies done to the accompaniment of a barrel piano, and "Bahia," an Afro-Cuban routine.

No two dances are of the same style but rather depict entirely different periods and types of people in order to have more general appeal.

more changes would be made. However, he said, this does not mean suggestions will not be considered.

Among IFC's proposed changes submitted to the committee was a request that unchaperoned dating be permitted from noon to 8 p.m. Monday through Saturday and from noon until 11 p.m. Sunday. This request was not granted.

Required on Weekends Only
Kenworthy said if the request had been approved chaperons would have been required only on Friday and Saturday evenings.

He said this was not a satisfactory solution. He said it had been decided that the present unchaperoned dating code was not satisfactory and therefore the committee did not want to go back to it by granting IFC's request.

Petitions Seek Modern Chapel

Eugene Gladys, president of Vitruvius Society, said Tuesday that petitions asking for a change in architecture for the proposed All-Faith chapel will be circulated until Sunday.

Students may attend the architectural exhibit Saturday at the College of Engineering and Architecture's Open House. The exhibit will illustrate contemporary designs, done by students of the Architecture department.

Attendance will help clarify the definition of contemporary architecture, Gladys said. The exhibit will be located on the third and fourth floors of Main Engineering Building.

Traffic Court Fines Twelve

Traffic Court Tuesday night fined 12 student traffic violators a total of \$22.

Three cases were recommended to the Dean of Men's office. Further violations will probably result in their cars being sent home, James Dunlap, court chairman, said. Three students were acquitted by the court.

Four students did not report for hearings. Unless an acceptable excuse is presented to the dean of men, they will be fined as charged, Dunlap said. Suspended fines totaling \$14 were levied.

Committee Rejects 34 Carnival Petitions

Thirty-four of 41 Spring Week Carnival applications were rejected because of incompleteness Wednesday night by a student screening committee composed of the All-University officers, and the presidents of the Association of Independent Men, Interfraternity Council, Women's Student Government Association, Panhellenic Council, and Leonides.

The lack of sufficient detail was given as the reason for the numerous rejections, according to George Richards, Spring Week chairman. The committee did not feel there was enough material to judge the applications, he said.

To Describe Show, Booth
Organizations whose applications have been rejected must turn in a complete description of the proposed Carnival show and booth activity, stated Richard Grossman, Carnival co-chairman.

The deadline for revised applications to be handed in at the Student Union desk in Old Main is 5 p.m. Monday Grossman stated. All new applications must be written on organization stationery, in order to enable the Carnival committee to identify which group is submitting the revision, he said.

Rejection List
Rejected Carnival applications are Chi Omega, Sigma Nu; Alpha Xi Delta, Sigma Pi; Theta Xi, Kappa Delta; Phi Kappa Psi, Independent Freshman Women; Gamma Phi Beta, Delta Sigma Phi; Kappa Sigma, Zeta Tau Al-

pha; Pi Beta Phi, Phi Gamma Delta; Sigma Phi Sigma, first floor Atherton; Alpha Gamma Rho, Delta Delta Delta.

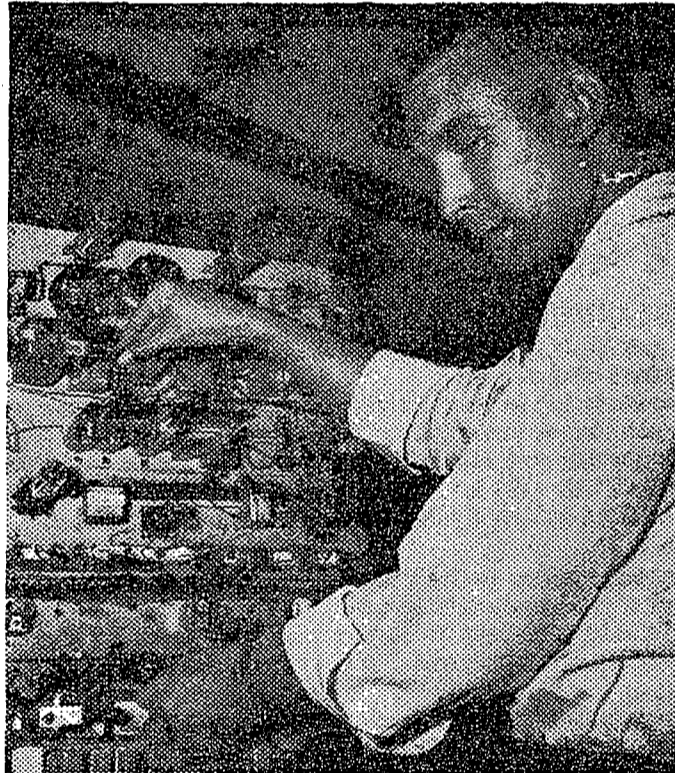

Phi Mu Delta, Atherton Hall; Acacia, Delta Zeta; Kappa Alpha Theta, Beta Theta Pi; Phi Kappa Tau, Women's Building; Chi Phi, Sigma Sigma Sigma; Penn Haven Club, Leonides; Delta Gamma, Sigma Chi; Kappa Kappa Gamma, Tau Kappa Epsilon; Pi Kappa Phi, Phi Mu.

Alpha Tau Omega, Thompson Hall; Alpha Chi Sigma; Alpha Epsilon Pi; Sigma Delta Tau, Zeta Beta Tau; Sigma Alpha Epsilon; Phi Sigma Delta, Thompson Hall; Delta Upsilon, McAllister Hall; Philotes, Beaver House; Theta Phi Alpha, Theta Kappa Phi; Lambda Chi Alpha, Alpha Chi Omega.

Phi Delta Theta; Alpha Omicron Pi, Phi Kappa Sigma; Sigma Alpha Mu; Pi Kappa Alpha, Thompson Hall; Nittany-Pollock Council; Penn State Club.

Eleven Spring Week parade applications were also rejected by the screening committee at the Wednesday night meeting.

A CAMPUS-TO-CAREER CASE HISTORY

BOB WILSON works on a "breadboard" circuit, studying the electrical properties of a carrier system.

"My first assignment at Bell Labs"

Fresh out of school, Bob Wilson, '53, was put to work on a Transistor project at Bell Laboratories. He explains why he never had time to be awed.

(Reading Time: 39 seconds)

"In some ways it was hard to believe. I had received my B.E.E. at the University of Delaware in June, 1953, and a week later I was working in the world-famous Bell Laboratories.

"But I didn't have time to be awed because they put me right to work. They gave me responsibility fast.

"My group was working on the experimental application of transistors to carrier systems. My assignment was the electrical design of a varioloser for the compressor and for the expander to be located in the terminals.

"The supervision I received and the equipment I had were tops. I quickly discovered that I had to rely on my ingenuity as much as on the college courses I had taken. Perhaps that's one reason for the

great new discoveries continually turned out by the Labs.

"Now, I'm in the Communication Development Training Program, continuing my technical education and learning what all the Laboratories sections do and how their work is integrated.

"In a year I'll be back working with the group with which I started."

Assuming responsibility fast is a common experience among the engineering, physical science, arts and social science, and business administration graduates who join the Bell System. Bob Wilson went with Bell Laboratories. There also are job opportunities with the operating telephone companies, Western Electric and Sandia Corporation.
