

# HEc Council Prexy Welcomes Frosh. Composed Of 2 Groups

The Home Economics Student Council is composed of members of the four classes, and representatives of home economics honorary societies and clubs.

Members must have a 1.0 All-University average and are elected in the spring. Freshman, however, are elected in the fall. The representatives from the classes are chosen on the basis of one for every 50 students registered in each class which is represented in curricula in the College of Home Economics.

The council meets once a week to discuss problems and projects concerning the college. President for this year is Andrew Stavres. Other officers are Margaret Faris, vice president, and secretary-treasurer, Suzanne Scholl.

Purpose of the council is to represent the entire student body of the College in a united group, to further the development of cooperation and coordination among its students in planning and carrying out school functions of various types, and to guide the students and organizations to develop an ever-better College.

Last year the council worked with the other Home Ec organizations on a party for freshmen during orientation week and sponsored a tea for faculty and freshman students.

The money from the council allotment was used to set up a fund to be used by students for field trips and loans.

The council collected for Cam-

PRESIDENT MILTON S. EISENHOWER welcomed the new freshman class Monday night in Recreation Hall. Jesse Arnette, All-University president, and David R. Mackey, Burgess, also extended greetings. In the background are Wilmer E. Kenworthy, left, director of student affairs, and Ray V. Watkins, University scheduling officer.

pus Chest from the Home Economics faculty and held a Christmas party with the Mineral Industries Student Council.

Eight members of the council served on the hospitality committee for Home Ec Spring Weekend.

# Chem-Phys Council Acts As Liaison

The go-between for the faculty and students of the College of Chemistry and Physics is the Chem-Phys Student Council.

This organization will be headed this year by a woman for the first time. Barbara Foss is president.

Other officers are Roger Uhler, vice president, and William Childs, secretary-treasurer.

Each spring the new officers are elected, and the voting is held in the lobby of Osmond Laboratory. Two freshmen, four sophomores, eight juniors and twelve seniors serve on the council each year.

The freshmen representatives are elected in the fall.

The American Chemical Society and the American Institute of Chemical Engineers each elect a member to represent students in chemistry and chemical engineering curriculums.

The activities of the council include the fall banquet in October, a student-faculty mixer in the fall, the Chemistry-Physics Open House at which there were 1400 present last year, and the spring banquet.

The council is also in charge of publishing the Chem-Phys Newsletter.

Each year the students in the college vote for a chemistry professor of the year. The faculty is also polled in this voting through letters sent out through the dean's office. Last year the winner received an honorary membership shingle.

The council also evaluates courses within the college and has a bluebook file.

### ...AND HOW IT STARTED

DOUGLAS LEIGH says: "After leaving the University of Florida (where I'd sold yearbook ads), I had big, crazy ideas about making new kinds of spectacular displays. So I bought a Brownie and went to New York to photograph rooftops. My first sign was a huge, steaming coffee cup on Broadway. At age 23 I was starting to learn an exciting business!"
