

# Safety Valve-**Defends Amendment**

TO THE EDITOR: In defense of the constitutional amendment I proposed to All-University Cabinet (Oct. 14) I wish to make the following comments on Miss McClain's editorial yesterday.

To begin with, I'm in favor of the idea of incorporating the proposed appointments into the reports issued the Tuesday prior to the cabinet meeting at which the names are to be ap-proved. This will accomplish what I am aiming at, which is to give cabinet members the opportunity to know whom they are approving. I feel that we cannot be asked to give our vote

of approval to someone who is a stranger to us. Such a change in the amendment leaves no argument over the time element or the red tape. One should be able to make appointments two and one-half days before the vote of ap-proval proval.

The amendment does not imply any lack of confidence in the All-University president. It just asks for a preview of whom we will be asked to approve. The idea of approval is al-ready in the constitution and has never been interpreted to mean a disturb of the precident interpreted to mean a distrust of the president.

I hope that the intent of this amendment is conveyed to the students. My wording originally may have been in error and this has been corrected.

I would also like to add that on March 24, 1954 while campaigning for office, both All-University presidential candidates, Jesse Arnelle and Lewis Wade, went on record as favor-ing an amendment with such intent behind it. —Dick Favro

### **Standardize Black Marks**

Women's Student Government Association has begun revision of the blackmark system through establishment of a committee to investigate present implementation.

We hope the committee will especially em-phasize setting up and enforcing a system of standardized blackmarks for all women's dormitories. While WSGA rulings call for such a system, past years have shown irregular enforcement of it.

It is understandable that irregular enforcement now exists; dormitory housemothers have little to follow but personal interpretation of what merits a blackmark.

However, a successful revision by the committee will greatly remedy what is now an un-fair policy, through two specific points slated for revision:

Having black mark regulations made for one dormitory pass through Freshman Council, Freshman Regulations Board, and WSGA Sen-ate before becoming effective.
 Making black mark regulations available for all to see

The former proposed revision would allevi-ate any "spontaneous" black marks imposed as a result of student-housemother personal conflict and possibly of a questionable basis. It would also, in case of appeals from students receiving black marks, provide Judicial with an authentic record of actions deserving penalty and allow the body a precedent for making decisions on cases.

cisions on cases. The latter proposed revision—making black mark regulations available for all to see—would be of direct benefit to both students and house-mothers. Primarily it would give students a "beforehand" warning of what actions will be reprimanded. Also it will offer housemothers a relatively valid basis for judging student be-havior havior.

-Peggy McClain

### By MARCIE MacDONALD

Winter is drawing nigh, all ye lady inhabitants of our expansive campus. A young man's fancy doesn't get to turning our way until spring, but it's just about this time of year that our fancy turns to thoughts of snowy Saturday nights and icy walks up the Mall. Our thoughts turn even faster from this to some gallant lad to warm and guide us through the perils of

guide us through the perils of winter. Let us then review for a mo-ment just what the University has to offer in the way of manhood. One excellent but superficial way cept for an aura of the ridiculous that surrounds their every move. Gray suits, ranging from banker to charcoal, are their uniform, garnished with plaid ties, socks and suspenders. On extra cold days they protect themselves with paisley print vests. They can be distinguished from the Liberal Arts Seniors, in cases of similar identity, by the way they talk in whispers while casting suspicious glances at every passerby. glances at every passerby.

And then there is the Lettersarily contain Marcie MacDonald only freshmen, however; some en-gineers never grow up. These lads uniformly wear jeans, green shirts, combat boots, and leather jackets. They are generally frown-ing, perhaps because the badge of their profession—the slide rule —beats them perpetually in exact-ly the right spot to produce a frown. And then there is the Letter-man Type. It is not necessary to describe their trademark, but may we add that it is possible to tell in what sport the letter was won by the accompanying garb. The Lettermen are bound by the "S" (Club constitution to wear their letter sweaters day and night, year in and year out. And they do, for the most part. Special perdo, for the most part.
