

Exams—

(Continued from page one)

The final objective for freshmen is "to develop an awareness of one's capacity to understand literature and the fine arts and to encourage independent development of this capacity."

On the basis of results of examinations, the subcommittee suggested that one or more of the following courses shall be prescribed: Art 74, English Literature 25 or 26, and Music 5. The report also included eight other objectives which would affect all students.

The first of these is to acquire typical factual information of universal concern, regardless of occupational limitations, in the four broad areas of knowledge: physical science, biological science, social science and the humanities.

To support this, the general education group recommended that students schedule 12 credits in the physical and biological sciences with not less than three credits in each and 12 credits in the social sciences and humanities with not less than three credits in each.

The second is to develop the ability to apply critical judgment in the four broad areas of knowledge listed in the above objectives.

If this is not specifically met by courses directed to other objectives, the subcommittee prescribed courses in logic, argumentation or similar areas as needed.

Two other objectives: "To analyze the belief that all paths of knowledge are open to anyone who seeks to the extent that he can and will seek them," and "to analyze the interrelationship among fields of endeavor, to break through the crust of indifference and open up wider horizons of enjoyment and productive living," were drawn up by the subcommittee.

The recommendations for these are included in those for other objectives.

In the eighth objective, the

group sought "to foster an understanding of the structure of, and one's responsibilities to, modern society throughout the world, and the impact of science on the evolution of modern society."

Since no combination of courses seems to satisfy this objective, a special social science committee, which was previously appointed, has been asked to consider the problem and recommend a series of courses, totalling at the most 12 credits, which will permit modest attainment of the objective.

"To foster an understanding of the scientific method," the subcommittee suggested that general courses in the methods of physics, chemistry, biology and earth sciences be given on two levels: a basic course for non-science students and advanced courses for science students.

In the twelfth objective, the group seeks to develop an awareness of moral standards, to encourage a critical sense of ethical values, to encourage the development of a positive philosophy that possesses a rewarding balance between personal and public welfare.

It recommended that an "institutional climate" of principles and concomitant practices which demonstrate the objective be provided.

Interviews Set By Cabinet Group

The Cabinet Personnel Interviewing Committee will interview prospective appointees to the Student Leadership Committee tomorrow night. All applicants will be notified of the time and place.

Applications of prospective appointees to the Spring Week committees must be submitted by noon Saturday to the Student Union desk in Old Main. Interviews for these committees will be held next Wednesday. The committees are coronation, carnival, parade, and mad-hatters.

In the final objective, the subcommittee wishes to develop an appreciation of the importance of personal and community health and the proper place of sports and recreation in personal and public welfare.

The members suggested that the present program in the College of Physical Education be modified to develop better public attitudes and the proper place of sports in publicity and general welfare should adequately meet the requirements of this objective.

Campaign--

(Continued from page one)

and Gail Smith, first semester psychology major, secretary-treasurer.

Other State sophomore candidates are George Haines, third semester education major, vice president; and Kaye Butterbaugh, third semester business administration major, secretary-treasurer.

SUCCESS STORY FOR TWO... and how it started

Joanne Dru started her career as a model of teen-ager clothes. But it was her 6-year study of dancing that won her a part in a Broadway musical... which led to film stardom in Hollywood.

There she met John Ireland, ex-marathon swimmer, amateur actor, stock player, Broadway star—now a brilliant director. Today they are man-and-wife partners in sparkling new screen hits.

"We made the discovery together that Camels are truly mild—with a good, rich flavor other brands just don't have! You try Camels—you'll agree!"

Joanne Dru and John Ireland

Lovely Hollywood star and her famous actor-director husband

Start smoking Camels yourself!

Make the 30-Day Camel Mildness Test. Smoke only Camels for 30 days!

SUCCESS STORY:
Camels—America's most popular cigarette... by far!
