

Trains? Planes? Jets? Wind? Prexy Named Power Plant Steam Escapes To Committee

Was it a train? Was it a plane? No, it was steam escaping from the University power plant that caused the loud hissing that was heard across the campus and borough at 3:30 a.m. yesterday.

A safety device on the low pressure system at the University power plant broke loose. No serious damage was done.

The steam escaped and the confusion continued until maintenance and operating supervisor Harold Byers could get to State College from his home in Puddintown to shut off the steam.

One coed, studying for an early morning bluebook, insisted the noise was the first regular passenger train arriving in State College for more than a decade.

Her roommate contended it

must be the wind and slept through her yesterday morning classes on a pronouncement that the "fierce wind" had brought even colder weather.

But, perhaps the most disillusioned student was the one who, when he heard the noise, stepped outside his fraternity house to investigate. He swore this morning that he had seen "several jet planes" overhead.

Ag Journ--

(Continued from page one) For this money in the new reorganization of funds, passed Wednesday night.

A second reason council gave when they sent the letter recommending action last year was that the curriculum could also help in the writing of publicity for agricultural groups.

At this time Jackson announced he was confident funds would be appropriated by the legislature for the curriculum.

The University budget containing the request has been submitted to the State Budget Secretary. The budget must be approved by the Budget Secretary the governor, and the General Assembly before the appropriation of funds will be made.

Dr. Milton S. Eisenhower, president of the University has been named to a 36-man committee to prepare for an April State educational conference in Harrisburg.

Other University personnel named by Dr. Francis Haas, superintendent of public instruction, include Dr. Donald G. McGarey, associate professor of education, and E. L. Nixon, a retired faculty member.

The conference will determine Pennsylvania's role in the national needs for schools and colleges. Its findings will be presented at the White House conference on education next fall.

The Washington conference will analyze current national educational problems and submit a report to President Dwight D. Eisenhower. The report will seek possible federal aid to education.

Dr. John McLumley, deputy superintendent of education, was named chairman of a committee to arrange for the conference.

Russians to Share--

(Continued from page one) "With this aim, the Soviet government is ready to submit to the Conference on Peaceful Use of Atomic Energy to be convened during 1955, according to a decision of the General Assembly of the United Nations, a report on the first plant in the U.S.S.R. and its works."

Deep Heaps Swept by Jeeps

How long will it take for a man with a jeep and a snow plow to remove a one-inch snowfall from a 20,000 square-foot ice-skating rink?

Sounds like a problem in algebra, doesn't it? But put away that slide rule.

It took one-and-a-half hours, according to Robert W. Rutherford, manager of the ice skating rink. Rutherford said Tuesday night's snowfall "took us by surprise."

Rutherford reported crowds have been good. The biggest day so far was Saturday, when 1500 skaters were on the ice.

Speech Prof Gets Communications Post

Harold P. Zelko, professor of public speaking, has been elected a member-at-large of the National Council of the National Society for the Study of Communication.

The council is the governing body of a national organization of educators, business and professional people, representatives of government and military services from the United States and several foreign countries who share an interest in problems of human communication.

Zelko is a charter member of the society and a member of its committee on communication in business and industry.

Will Kindness Reap Rewards?

Final exams at Idaho State College start a week from today, but the students aren't cramming.

Instead, they're passing out cigars and candy to faculty members.

The student newspaper, The Gengal, devotes a full-page daily to pictures of faculty memos when they were students.

But the students insist they're not "apple polishing." It's all part of "Be Kind to Faculty Week" which started Tuesday, they explain.

Appropos, eh what?

Steel Expert Joins Faculty

Willy Oelsen, European authority on steel-making, has recently been appointed visiting professor of metallurgy at the University. Oelsen is director and professor at the Clausthal School of Mines, Clausthal-Zellerfeld, Germany.

A series of special meetings on the physical chemistry of steel-making will be held next week to welcome Oelsen. The sessions, which will be attended by representatives of many of the eastern steelmaking companies, will be held Tuesday and Wednesday.

Speakers will be Frederick C. Langenberg, graduate student in metallurgy, Dr. Shadburn Marshall of the Atomic Power Division, Westinghouse Corp., and Dr. John Chipman of Massachusetts Institute of Technology.

Four Translate--

(Continued from page one) ture is the purpose of their year-long stay at the University.

Diamant is employed by the University as an electrical engineer and came in 1953.

Several of the visiting gymnasts are from the Hansson's home town.

CLASSIFIEDS

FOR SALE

WOMEN'S WHITE Figure Skates, size 8, excellent condition, newly sharpened. A steal at \$8.00. Phone AD 7-7112.

ARGUS C3, case, flash attachment, filter and adapter light meter and case. Retail value \$100, yours for \$60. Call Boalsburg HO 6-6198.

SALLY'S HAS large cans of pretzels and potato chips for parties or any occasion. IS YOUR typewriter giving you trouble? If so, just dial AD 7-2492 or bring machine to 633 W. College Ave., State College.

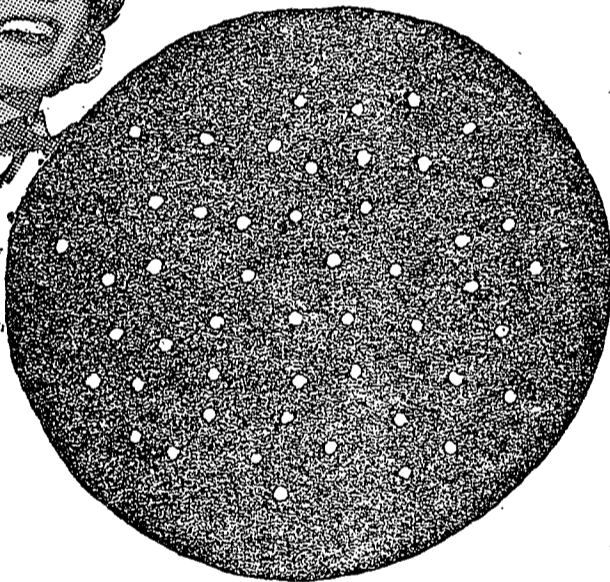

SALLY'S DELIVER the perfect Pizza Pie 7 nights a week - Monday thru Sunday.

LOOK! LOOK! LOOK! LUCKY DROODLES!

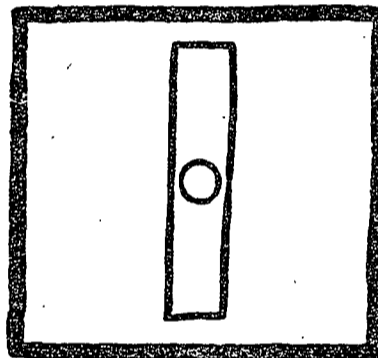

WHAT'S THIS?

For solution see paragraph below.

OBVIOUSLY, THE TITLE of the above Droodle is: 47 insectology students enjoying better-tasting Luckies while studying 3 fireflies. All kinds of students are bugs about Luckies. Matter of fact, college smokers prefer Luckies to all other brands—and by a wide margin—according to the latest and greatest of all college surveys. Once again, the No. 1 reason: Luckies taste better. They taste better, first of all, because Lucky Strike means fine tobacco. Then, that tobacco is toasted to taste better. "It's Toasted"—the famous Lucky Strike process—tones up Luckies' light, good-tasting tobacco to make it taste even better . . . cleaner, fresher, smoother. So, enjoy the better-tasting cigarette . . . Lucky Strike.
