

Technology Course in Metal Begun

A two-year program in metal technology has been organized at the University to help meet the need for men in the metallurgical and allied industries.

Graduates of the curriculum will receive associate degrees in metal technology and will be prepared to assist metallurgists and metallurgical engineers or to replace them in tasks of a routine nature that do not require a man with four years of college training.

Special laboratories and equipment will be installed at Ogontz Center and if demand warrants expansion of the program, it is expected that facilities will be made available at additional University centers.

Ogontz was selected because special laboratories could be made available there and because of its location near Philadelphia, the center of the fabricating metals industry in Pennsylvania.

Between 25 and 30 men will be admitted to the first class but if the demand warrants it, two classes, each with 25 or 30 men, will be offered at Ogontz.

The program will be administered through the General Extension Services of the University, directed by Edward L. Keller. Much of the detailed planning was done by Donald C. Jones, director and professor of Mineral Industries Extension Services, and Louis F. Haller, associate professor in charge of mineral technology extension.

The first women's social group, and the forerunner of today's sororities, was the Nita-Nee club founded in 1922 and named after an Indian princess of this area.

Building Sale On at Rochester

The University of Rochester is selling 13 buildings.

Buildings on the campus of the women's college are being offered for sale because the university is combining the women's college with the men's college in another part of Rochester.

The oldest building offered for sale is Anderson Hall, the original classroom building erected in 1861. Other old buildings include Sibley Hall, library built in 1874; and Reynolds Chemistry Laboratory, built in 1887.

The university will turn over Munro Hall, a dormitory, and Cutler Union, a modern building, to the Eastman School of Music, which is next to the women's campus.

German Classes By Short Wave

Short wave news broadcasts in German will be used as part of the course of study in the language for the spring semester, Dr. Philip A. Shelley, head of the department of German, has announced.

Dr. Shelley also said that several films in German will be used. "These broadcasts," said Dr. Dagobert de Levie, assistant professor of German, who has experimented with the use of short wave radio in teaching, "give the student a chance to hear German spoken by natives at normal speed as contrasted to German spoken specially for students in the classroom."

"They also are concerned with the news of the day, a subject that is familiar to the student."

The student will not be expected to understand the broadcasts, Dr. de Levie said, but if he learns two or three words each time he hears the broadcast, he soon will gain the ability to understand much of the conversation.

3rd Party—

(Continued from page one)

must give a one-half vote for removal before a trial can be held. The trial would consist of an "open hearing" before the steering committee, conviction requiring two thirds vote of this committee.

5. The party constitution says it is bound by the All-University Elections Code, and therefore to the All-University Elections Committee.

6. The officers are directly responsible for all group actions of the party. The party is also responsible, in organization and action, to its chartering group.

7. The clause providing for an advisor states that he will be a member of the faculty and a non-voting member of the clique, steering committee, and executive committee. Dr. F. J. Sorauf, professor of political science, will be the party advisor this year.

8. The eighth point requests answers to five general questions that the subcommittee raised.

Financial Coverage
In answer to the question on financial coverage, Campus party will get funds from donations from all steering committee members and candidates of the party. The use of funds will be decided by the finance committee with majority approval of the steering committee.

The party will select candidates for All-University elections in clique meetings according to election committee rulings. However, no formal recommendations may be introduced by the steering committee, executive committee, or class cliques.

Executive Authority
Executive authority is controlled by the five clique officers. The clique chairman makes appointments, approved by majority vote of steering committee membership, and dissolved by majority vote of the same. These appointments will last until the chairman is no longer in office, or until they are dissolved.

The executive secretary is responsible for keeping records of party membership and calling members of the steering committee to meetings.

The steering committee is the executive body of the party, acting on all matters not specifically designated as powers of the all-University clique.

Union Merger—

(Continued from page one)

conventions and then by a joint AFL-CIO convention. Although there are many steps to be taken in this ratifying process, leaders on both sides expressed confidence these were only formalities.

Once the AFL-CIO merger becomes ratified, Meany and Reuther plan to invite John L. Lewis

3 Seniors Given Awards for Design

Three architecture seniors have received \$100 in prizes for their design of a bus depot for State College.

Robert Breading was awarded the first prize of \$50. John Eiser received second prize of \$30 and third prize of \$20 went to Arthur Anderson.

The Aluminum Company of America sponsored the competition which required employing the use of aluminum in the design.

United Mine Workers and other independent unions in the railroad and other industries to come into the new federation.

CLASSIFIEDS
