

Power Requirements Cited at Symposium

The need for science and religion to approach together the problems in the development of power was stressed in the symposium on "The Responsible Uses of Power," Monday night.

"Scientific knowledge is power, but it is power to be used for good or for evil as men choose," Dr. Hugh L. Dryden,

Director of the National Advisory Committee for Aeronautics, said. Many scientists now realize their moral and spiritual responsibilities, he added.

Dr. Dryden said that the scientist realizes that outside of the laboratory he is a man with human passions and shortcomings as well as noble aspirations and high ideals.

"Man's life at its fullest is a trinity of activity, physical, mental, and spiritual. Man must cultivate all three if he is not to be imperfectly developed," he said. "A scientist's responsibility for the proper use of scientific knowledge for human welfare is thus the same as those of other citizens—no more, no less."

Federal Control

Science is uneasy about the growing control of the federal government over scientific research, and "American science has become largely dependent on government," he said. He said, however, that science and government have greatly profited.

"Scientists wish to free the shackles which impede our scientific progress, especially in its creative and original aspects," Dryden said. In this task they ask for mutual understanding and assistance of their fellow citizens, he said.

Dr. Nels Ferre, professor of philosophical theology at the Vanderbilt School of Religion, discussed the religious aspects of power.

3 Kinds of Power

"Power is of three basic kinds: physical, mental, and spiritual," he said. "Physical power is mainly the field of science; mental power, of education as a whole; and spiritual power, of religion."

Dr. Ferre said that mental power discriminates the use of physical power by understanding or evaluation:

"Spiritual power is power for the highest kind of life. The spirit defines life, gives the mind its true context and prescribes the correct uses of physical power," he said.

According to Dr. Ferre, the Christian interpretation of power is of God, that God is the ultimate power, but that even His ultimate capacity to operate and to control

operations are but an expression of His all encompassing love.

"Physical power is rightly used when it is intelligently directed to good ends," he said but, he added, it should be "controlled by the mental power in the service of creative life."

"Mental power must put physical power to more creative uses within a new kind and level of spiritual control," he said.

Dr. Ferre said that we cannot have spiritual control, "for in this realm we must be controlled rather than control. Spiritual power belongs to God alone," he added.

"We bring together in active symbolism the physical and the spiritual via the mental," he said. Dr. Ferre said that we should dedicate ourselves to a new rebirth of spiritual reality, to an education lifted to larger ends, but all in relation most realistically, to the nature and purpose of physical power.

Educational TV Open to Public Monday Night

The first public demonstration of the University's instructional project in educational television will be held at a meeting of the Penn State chapter of the American Association of University Professors at 8:30 p.m. Monday in 10 Sparks.

The demonstration, which is open to the public, may also be viewed by television in 2, 3, or 19 Sparks.

Dr. Clarence R. Carpenter, head of the department of psychology and director of the Instructional Film Research Program, will explain the project, assisted by members of his staff.

Dr. Grant W. Smith, professor of chemistry, will discuss the televising of Chemistry 2 classes. Leslie P. Greenhill, associate director of the film research program, will explain physical problems encountered in setting up the closed circuit television equipment in Sparks and Osmond Laboratory.

Brotherhood Banquet Rides to Be Provided

Transportation for the Brotherhood Banquet to be held at 7 p.m. Monday at the Autoport will be provided. Those desiring rides may phone their reservations for the banquet to extension 2605.

Fraternities and sororities should meet at 6:30 at Old Main.

Men's Debate Tryouts

A preliminary meeting for men interested in the Men's Debate Team will be held at 7 p.m. Monday in 316 Sparks.

The final tryout, in which each candidate must give a five minute speech on either side of a topic, will be March 7. Dr. Harold J. O'Brien, team coach, is in charge of the tryouts.

Insurance Club to Meet

The Insurance Club will meet at 7 tonight at Sigma Alpha Epsilon. Howard Stewart, past president of the Pennsylvania Association for Insurance Agents will be the speaker.

Sunny, Turning Cloudy Predicted for Today

An overcast sky is forecast for this afternoon by the University weather station. This morning is expected to be sunny.

Chest Loses on Concert

The Max Kaminsky concert, sponsored by the Jazz Club and Campus Chest last Wednesday, drew about 500 paid admissions. There was a loss of \$5 on the concert, the proceeds of which were to go to Campus Chest.
