

Dulles Plans Formosa Visit

TAIPEI, Formosa, Feb. 28 (AP)—Secretary of State John F. Dulles and three top U.S. naval officials will visit Formosa Thursday at a time when Nationalist morale has sagged because of offshore island withdrawals.

An official announcement today said Dulles would make a short, flying visit and witness the exchange of ratifications of the U.S.-China mutual defense treaty.

Dulles' arrival will coincide with the visit of Adm. Robert B. Carney, chief of naval operations; Adm. Felix B. Stump, commander of the Pacific Fleet, and Vice Adm. Alfred M. Pride.

This most important concentration of U.S. diplomatic and naval officials on Formosa since the Nationalists were driven from the mainland is considered certain to buck up morale.

The visits may allay some uneasiness over the lack of specific U.S. commitments to defend Quemoy and the Matsus, the Formosa Strait Islands.

Bleucher Resigns Vice Chancellor Post Over Split

BONN, Germany, Feb. 28 (AP)—Franz Bleucher officially offered his resignation as vice chancellor today because of a split in the West German government over the Saar. Chancellor Konrad Adenauer declined comment.

Bleucher was the only one of Adenauer's four free Democratic Cabinet ministers to vote for ratification of the French-German agreement to Europeanize the German-speaking border state under a neutral commissioner. The other three, as well as large numbers of free Democrat deputies, voted against or abstained.

This helped to reduce to 263-202 the majority by which the government last night obtained Bundestag approval of the Saar pact, unpopular with many Germans.

Haiti is the most densely populated country in the Western Hemisphere.

Churchill States H-Bomb Fears

LONDON, Feb. 28 (AP)—Prime Minister Winston Churchill finished today the draft of a speech which informants said outlines the horrors of nuclear warfare and explains Britain's decision to build hydrogen bombs.

The 80-year-old government leader speaks tomorrow at the outset of a two-day House of Commons debate on Britain's new defense plans.

Churchill is known to feel deep concern about dangers of H-bomb warfare. British scientists have said that eight or 10 well-placed bombs could destroy all organized society on the tightly populated British Isles, within easy range of Soviet Bombers.

Clement Attlee, Laborite opposition leader, shares the fears, but believes with Churchill that Britain must build H-bombs in the absence of an international agreement on total disarmament.

Disarmament Protest

LONDON, Feb. 28 (AP)—Representatives of the four Western Powers plan to protest at tomorrow's disarmament talks against a secrecy breach by Russia, informants said today.

Delegates from the United States, Britain, France, Canada and the U.S.S.R. are meeting here in private talks about disarmament.
