

171 Eng Students Make Dean's List

One hundred seventy-one engineering students were named on the Dean's List for the fall semester. Fifteen of these achieved perfect averages of 3.

AIM to Vote On Veto Power

The veto power suggested in the constitution revision of the Association of Independent Men will be accepted or rejected tonight. The section including the veto power was tentatively defeated at the last meeting of the Board of Governors.

After the second and final reading of the constitution tonight, there will be discussion followed by vote, Robert Dennis, president, said.

The first part of the elections code will be read for approval. Final vote will be taken. The first part of the code stipulates nomination and election proceedings for the four AIM councils, Nittany, Pollock, Town, and West Dormitory, and the board of governors.

The meeting will be held at 7:30 tonight in 108 Willard.

Constitution--

(Continued from page one)
 pendent Men could not pass legislation recommending that a \$2 fee be assessed all students, because this recommendation would affect the student body as a whole, and therefore must be passed by Cabinet. If such legislation were passed by AIM, Cabinet would have the power to rescind it.

At the same time, Cabinet could not pass legislation recommending that only independent men be assessed a \$2 fee, since such legislation lies within the scope of AIM and does not affect the student body as a whole.

No Separation of Power
 Under the present constitution, there is no separation of powers stipulated between Cabinet and its constituent organizations.

The inclusion of this clause was a point of controversy among members of the revisions committee. Some members felt the clause should be included to give Cabinet a check on its member organizations. Other members felt that Cabinet has no power to determine what type of legislation member organizations can pass.

Three other major revisions are included in the new constitution:
 1. The constitution has been re-ordered to follow the United States Constitution in form. It will include six articles: executive powers, judicial powers, financial powers, miscellaneous powers, and amendments and bylaws.

Powers Not Cataloged
 The constitution was revised in this way because members of the committee felt the powers are not expressly cataloged under the present constitution.

2. The elimination of any sort of clause providing for substitutions on Cabinet. Members may challenge the right of any student to sit on Cabinet, however.

John Speer, chairman of the revisions committee said there were too many facets involved to draft an adequate substitution clause.
 3. The dean of women, dean of men, the graduate manager of athletics, and the executive director of the Alumni Association will be made advisers to Cabinet.

Under the present constitution, they are listed as ex-officio members. The change was made at the request of several of those involved.

TIM to Vote Tonight On AIM Constitution

Town Independent Men will hold a special meeting at 7 o'clock in 103 Willard to take action on the proposed Association of Independent Men constitution.

The first reading of the constitution was approved by TIM at its meeting last week. If approved tonight, the constitution will have official TIM consent.

Recreation Society

The Recreation Society will hold a dinner meeting from 5:30 to 7:30 tonight at Recreation Hall.

6 DIR Students Make Dean's List For Fall Term

"Certainly it can be done!" Six students registered in what is known as DIR, the Division of Intermediate Registration, did it. They made Dean's List for the fall semester. Those who accomplished the feat were:

Walter Carter, sixth semester student, 2.66; Harold Fisher, sixth semester student, 2.56; Joseph Kondis, fifth semester student, 2.61; Frank Meacci Jr., fourth semester student, 2.77; and Walter Segl Jr., sixth semester student, 2.83.

Delbert Kohn, sixth semester student, came close to doing the "impossible." He made a 2.93 average.

Perhaps an inference that could be drawn from this is: "The difficult can be done immediately; the impossible may take a little longer."

Candidates to Meet For WSGA, WRA

Candidates for Women's Student Government Association and Women's Recreation Association elections will meet at 7 p.m. tomorrow in 105 Willard. Constance Weitknecht, elections committee chairman, announced yesterday.

Information on the elections and appointments for each candidate's appearance before the screening board will be given at the meeting. Each candidate will appear before the screening board Saturday afternoon.

IFC to Hold--

(Continued from page one)
 award committee, announced that March 18 is the deadline for fraternities to submit their rating sheets to the committee. The Outstanding Fraternity Award will be announced at the IFC-Panhel Banquet to be held March 31.

CLASSIFIEDS

FOR SALE

LIKE NEW Remington typewriter. Will sell for \$40. Phone AD 8-6074 after 5.
 KAY STRING BASS in good condition. Call EMPIRE 4-1280.
 1942 CHEV. 2 dr., heater, good tires. Must sell. Any reasonable offer. Call Bob Hagen AD 7-7977.

PERSIAN RUGS; antiques, as room furnishings, are like having a stack of money forever. The best Persian rugs available, 50x75 inches and 60x75 inches. Ext. 265 Room 20, Box 829 Nittany 20.

LOST

STUDENT WHO exchanged trench coat, tan, for a smaller one please contact Stan Selbst AD 8-6718 for exchange.
 BROWN BRIEFCASE containing baritone solo music. February 25, 316 Sparks. Please call Ig. Holakaj AD 8-9107.
 GOLD WATCH between Thompson Hall and White Hall. Call ext. 1097, ask for Molly Lockwood.
 PARKER PENCIL, black with silver top. Call Joe Janus AD 7-7849.
 HORNED RIMMED Glasses without case. Lost in Nittany Dorm area Sunday, Feb. 27. Contact Paul Kormanik AD 7-3121.
 MISTAKEN—NAVY BLUE man's raincoat. name R. J. Luchs. Main Engineering. Saturday, March 5. I have yours (an AFROTC coat). Call AD 8-9094.

FOR RENT

8 ROOM Apartment for rent. Call AD 7-4768.
 12 ROOM HOUSE: Centrally located, block from campus. Suitable for fraternity appt. Oil heat, bath on second and third floors, powder room on first. Reply to 918 S. Atherton street.
 VERY DESIRABLE single room for male student. \$6 per week. 122 E. Hamilton AD 8-6166.
 SINGLE OR double furnished room in Boalsburg. Students or working couple. Kitchen privileges. Call HO 6-6985.

WANTED

DANCE BAND piano player, preferably freshman. Call AD 7-2427.
 TRUMPET PLAYER needed for Finlan's Rainbow orchestra. Call AD 7-4938. Ask for Mike.

MISCELLANEOUS

SALLY'S DELIVERS the perfect Pizza. The Big Boy and all our other delicious products 7 days a week. Dial AD 7-2878.
 WHEN YOUR typewriter needs repairs just dial AD 7-2492 or bring machine to 693 W College Ave. Will pick up and deliver.

PASSENGERS WANTED

PASSENGERS WANTED to Fla.: Tampa and vicinity. Leaving April 1. Call after 5 p.m. AD 7-3184.

RIDE WANTED

RIDE TO Erie, Friday March 11. Call Marlan, Rm. 383 McElwain.

SPEAKER

THE GERMAN CLUB will meet in SE Atherton Lounge on March 9 at 7:30 p.m. Dr. Dagobert deLevi will speak on "Germany Today," and a short discussion will follow. All students are cordially invited to attend.

University Placement Service Crowded With Job Seekers

By JACK WILLIAMS

When one sees a mass movement of students scurrying through Old Main, he can be assured that they are not starting a riot or a strike, but dashing to get in line at the University Placement Service.

The rush for jobs has been going on since the middle of February and from all indications, this year's seniors, especially those in technical curriculums, will have little trouble in finding employment.

There are at least seven job openings for each applicant.

Since the beginning of the semester, 57 different companies have interviewed over 1118 students through the University Placement Service.

300 Students Daily

The Placement Service handles over 300 students per day. Some students are interviewed, others make appointments for interviews, and many others seek job information. Each week from now until the

end of May, over 25 different companies per week are scheduled with the Placement Service for the purpose of interviewing interested students. This means that there are usually 12 or more interviewers at the University each day.

Technical Students Needed
 Many of these companies are interested not only in technical students, but in non-technical students as well.

Persons wishing to apply for interviews or desiring job information may contact the University Placement Service in 112 Old Main.

SCIENCE MADE SIMPLE: NO. 2

Though this column is intended solely as a vehicle for well-tempered drollery, the makers of Philip Morris have agreed to let me use this space from time to time for a short lesson in science. They are the most decent and obliging of men, the makers of Philip Morris, as one would guess from sampling their product. Only from bounteous hearts could come such a pleasurable cigarette—so felicitously blended, so gratifying to the taste, so soothing to the psyche. And, as though bringing you the most agreeable cigarette on the market were not enough, the makers of Philip Morris have enclosed their wares in the Snap-Open Pack, an ingeniously contrived wrapping that yields up its treasure without loss of time or cuticle. And, finally, this paragon of cigarettes, wrapped in the paragon of packages, can be had in king-size or regular, as your taste dictates. Who can resist such a winning combination? Not I.

A few weeks ago in this column we had a brief lesson in chemistry. Today we take up another attractive science—medicine. Medicine was invented in 1066 by a Greek named Hippocrates. He soon attracted around him a group of devoted disciples whom he called "doctors". The reason he called them "doctors" was that they sat around a dock all day. Some fished, some just dozed in the noontime sun. In truth, there was little else for them to do, because disease was not invented until 1492.

After that doctors became very busy, but, it must be reported, their knowledge of medicine was lamentably meagre. They knew only one treatment—a change of climate. For example, a French doctor would send all his patients to Switzerland; a Swiss doctor, on the other hand, would send all his patients to France. By 1789 the entire population of France was living in Switzerland, and vice versa. This later became known as the Black Tom Explosion.

Not until 1924 did medicine, as we know it, come into being. In that year in the little Bavarian village of Pago-Pago an elderly physician named Winko Sigafos discovered the hot water bottle. He was, of course, burned as a witch, but his son Lydia, disguised as a linotype, smuggled the hot water bottle out of the country. He called on Florence Nightingale in London but was told by her housekeeper, with some asperity, that Miss Nightingale had died in 1910. Lydia muttered something and, disguised as a feather boa, made his way to America, where he invented the blood stream.

Medicine, as it is taught at your very own college, can be divided roughly into two classifications. There is internal medicine, which is the treatment of internes, and external medicine, which is the treatment of externes.

Diseases also fall into two broad categories—chronic and acute. Chronic disease, is of course, inflammation of the chron, which can be mighty painful, believe you me! Last summer my cousin Haskell was stricken with a chron attack while out picking up tinfoil, and it was months before the wretched boy could straighten up. In fact, even after he was cured, Haskell continued to walk around bent over double. This went on for some weeks before Dr. Caligari, the lovable old country practitioner who treats Haskell, discovered that Haskell had his pants buttoned to his vest.

Two years ago Haskell had Addison's disease. (Addison, curiously enough, had Haskell's.) Poor Haskell catches everything that comes along. Lovable old Dr. Caligari once said to him, "Son, I guess you are what they call a natural born catcher."

"The joke is on you, Doc," replied Haskell. "I am a third baseman." He thereupon fell into such a fit of giggling that the doctor had to put him under sedation, where he is to this day.

But I digress. We were discussing medicine. I have now told you all I can; the rest is up to you. Go over to your medical school and poke around. Bring popcorn and watch an operation. Fiddle with the X-ray machines. Contribute to the bone bank... And, remember, medicine can be fun!

The makers of PHILIP MORRIS, who bring you this column, have nursed their flavorful tobaccos to bring you the most pleasurable smoke obtainable.
