## Red China Leader Commits Suicide

TOKYO, Tuesday, April 5 (AP)—The "Manchurian Stalin" who bossed Red China's five-year plan has "committed suicide" after being purged from the Communist party, Peiping radio said today.

He was Kao Kang, who was purged along with Jao Shu-shih, another big wheel from Shanghai, for "conspiring" to seize "leadership of the party and the state," Jao, who was party secretary for East China, is still alive, Peiping said, and "attacking the party."

Peiping charged Kao tried to get members of the huge Red army "to support his conspiracy."

## George Says Bill Will Pass Senate

WASHINGTON, April 4 (AP)—Sen. Walter F. George (D-Ga.) predicted today President Dwight D. Eisenhower's reciprocal trade agreements program will escape destruction in the Senate. It has been under attack and in trouble.

George, an influential member of the Senate Finance Committee, said in an interview he believes the committee will report out a bill containing no "destructive" amendments a few days after senators return April 13 from an Easter vacation.

The House voted previously to extend the program three years. It approved additional authority under which the President could cut tariffs gradually by a total of 15 per cent.

## McClellan, Stassen To Air Differences

WASHINGTON, April 4 (AP)—Sen. John L. McClellan (D-Ark.) and Foreign Aid Chief Harold E. Stassen talked over their differences today, and reported progress toward harmony.

However, McClellan said "everything at issue was not finally resolved." He added he is determined to undertake a full investigation of a Stassen project to build some grain elevators in Pakistan, and his Senate Investigations subcommittee will proceed as usual.

Stassen, head of the Foreign Operations Administration angered the subcommittee last week by sending it word that committee staff members could not question his employes unless he or one of his top two lawyer-aides were present.

## Cancer Cure Seen in Atom

CHICAGO (AP)—Atomic medicine apparently works beautifully to save children with cancer attacking the thyroid gland, a State University of Iowa physician said today.

The medicine is radioactive iodine, produced in an atomic furnace or pile.

Seven of eight children with thyroid cancer are alive and apparently free of cancer four years after this treatment. The eighth, a girl, is still being given doses of the atomic medicine to burn out the cancer.

"We feel we can give these children a normal life-span," said Dr. Titus C. Evans, professor of radiation research at Iowa.

One key is using small, not large, doses of radioactive iodine, he told science writers making a tour of cancer research centers under auspices of the American Cancer Society.

In adults, radioactive iodine is credited by other researchers with good results in only one in every seven and in some cases only one in every 20 victims of thyroid cancer.

### Test Results Available

Students who took their psychological tests in February may now have them interpreted. Students should make an appointment at the Psychological Clinic Annex in the basement of Woman's Building.

## No Draft Cuts Are Scheduled

WASHINGTON, April 4 (AP)—Secretary of Defense Charles E. Wilson and Adm. Arthur Radford told Congress today there will be no more major cuts in military manpower beyond those already scheduled.

But the two top men from the Pentagon stood pat on a controversial reduction planned for the Army over the next 15 months.

While there had been reports that some sort of compromise was in the works on the size of ground troops, the failure of Wilson and Radford to go along with the idea didn't arouse any immediate opposition in the Senate Appropriations Defense subcommittee.

Both the civilian and military heads of the armed forces put new emphasis on the administration's position that the defense program must be a long-range proposition.

### Britain Joins Defense Pact

BAGDAD, Iraq, April 4 (AP)—Britain joined the Turkish-Iraqi defense pact today. London officials expressed hope they had forged the first strong link in a defense chain connecting the Arab countries and Western Allies. But several key Middle East countries remained firm against it.

## Polio Vaccine Increase Noted

NEW YORK, April 4 (AP)—Nearly twice as much Salk polio vaccine as was originally planned for production—enough to immunize 30 million people—is expected to be available by early summer, an authority said today.

Dr. Hart Van Riper, medical director of the National Foundation for Infantile Paralysis, said indications now are that pharmaceutical houses have greatly upped their production volume.

"Unfortunately," he said, "there has been a tendency recently to build up scares about shortages that I don't believe are going to materialize."

With a verdict on effectiveness of the vaccine due April 12, Dr. Van Riper said his best information is the sufficient vaccine to inoculate 30 million people will be ready before June 30.

## Malenkov Is Alive; Appears at Party

MOSCOW, April 4 (AP)—Ex-Premier Georgi M. Malenkov, absent from Soviet public functions nearly two weeks, turned up tonight at a party honoring Communist-governed Hungary. There had been considerable discussion in the Western colony here as to his whereabouts.

Malenkov was on hand with other top officials of the Russian government at the Soviets hotel on the 10th anniversary of the liberation of Hungary from Nazis.

## Ike Is Now Pennsylvanian

WASHINGTON, April 4 (AP)—President Dwight D. Eisenhower now regards himself as a voting resident of Pennsylvania.

The White House disclosed this today in announcing the President would accept tomorrow a resolution of the Pennsylvania Legislature welcoming him as a resident and voter in Adams County, Pa., where his farm is located.

Penn State was one of 52 colleges and universities which received support under the Morrill Land Grant Act of 1862.
