FOR BETTER OR FOR WORSE

The first thought that comes into our minds upon entering college is, of course, marriage. But how many of us go about seeking mates, as I like to call them, in a truly scientific manner? Not many, you may be sure. Most of us simply marry the first person who comes along. This can lead to unpleasant consequences, especially if the person we marry is already married.

Let us today make a scientific survey of the three principal causes of marriage—homogamy, personality need, and propinquity. We will examine these one at a time.

Homogamy means the attraction of like for like. In marriage it is rarely opposites which attract; the great majority of people choose mates who resemble themselves in taste, personality, outlook, and, perhaps most important of all, cultural level.

Take, for example, the case of two students of a few years ago named Anselm Glottis and Florence Catapult. Anselm fell madly in love with Florence, but she rejected him because she was majoring in the Don Juanian Poets and he was in the lowly school of forestry. After graduation Anselm got a job as a forest ranger. Still determined to win Florence, he read every single Don Juanian Poet cover to cover while sitting in his lookout tower.

His plan, alas, miscarried. Florence, sent on a world cruise as a graduation present, picked up the betel nut habit in the Indies. Today, a derelict, she keeps body and soul together by working as a sampan off Mozambique. And Anselm, engrossed in the Don Juanian Poets, failed to notice a forest fire which destroyed 29,000,000 acres of second growth blue spruce. Today, a derelict, he teaches Herrick and Lovelace at the Connecticut School of Mines.

The second reason why people marry, personality need, means that you often choose a mate because he or she possesses certain qualities that complete and fulfill your own personality. Take, for instance, the case of Alanson Duck. As a freshman, Alanson made a fine scholastic record, played varsity lacrosse, and was very popular with his fellow students. Yet Alanson was not happy. There was something lacking in his life, something vague and indefinable that was needed to make his personality complete.

Then one day Alanson discovered what it was. As he was walking out of his class in Flemish pottery, a fetching coed named Grace Ek offered him a handsome brown package and said, "Philip Morris?"

"Yes!" he cried, for all at once he knew what he had been needing to round out his personality—the gentle fulfillment of Philip Morris Cigarettes, the soul-repairing mildness of their vintage tobaccos, the balm of their unparalleled taste, the ease and convenience of their bonny brown Snap-Open pack. "Yes, I will take a Philip Morris!" cried Alanson. "And I will also take you to wife if you will have me!"

"La!" she exclaimed, throwing her apron over her face, but after a while she removed it and they were married. Today they live in Prince Rupert, British Columbia, where Alanson is with an otter glazing firm and Grace is a bookie.

Propinquity, the third cause of marriage, means closeness. Put a boy and a girl in a confined space for a long period and they will almost surely get married. A perfect example is the case of Fafnir Sigafos. While a freshman at Louisiana State, he was required to crawl through the Big Inch pipeline as part of his fraternity initiation. He entered the pipe at Baton Rouge. As he passed Lafayette, Ind., he was agreeably surprised to be joined by a comely girl named Mary Alice Isinglass, a Purdue freshman, who had to crawl through the Big Inch as part of her sorority initiation. When they emerged from the pipeline at Burlington, Vermont, they were engaged, and, after a good hot bath, they were married. Today they live in Klamath Falls, Ore., where Fafnir is in the weights and measures department and Mary Alice is in the roofing game. They have three children, all named Norman.
