

Vocations Conference Will Be Held in HUB

A vocations conference for students who are undecided about their choice of careers and who want to know more about Christian service will be held April 30 from 1:30 p.m. to 8 p.m. in the Hetzel Union Building.

The conference, sponsored by the University Christian Association, assisted by members of the education 474 class,

is the first conference of its kind to be held at the University.

Wilmer E. Kenworthy, director of student affairs, will open the conference with the welcome from the University. Arthur M. Wellington, professor of education, will speak on "Choosing Your Vocation." D. O. Smith, of the Westinghouse research laboratories in Pittsburgh, will conclude the opening talks with a lecture on "Religion in Your Vocation."

Students may then attend two of the panel discussions to be held in the committee rooms of the HUB.

Discussion on Ministry

The discussion entitled "The Ministry" will be led by the Rev. Earl F. Spencer, pastor of the University Baptist Church; the Rev. Robert Starbuck, the Evangelical and Reformed campus minister; the Rev. Henry Shissler, a graduate student in education and minister of the Half Moon parish in Port Matilda; and Donald McIlvride, program director of Westminster Foundation.

Dr. William G. Mather, professor of rural sociology, and Mrs. P. S. Shell, a former psychiatric social worker, will lead the discussion, "Social Worker."

The "Young Women's Christian Association" discussion will be headed by Betty Hildebrand, recruiting assistant for YMCA from New York City. Mrs. Hal Leiper, who served as a missionary's wife in Communist China, and Dr. Frank Anthony, instructor in agricultural education and a former director of agriculture extension for the Near East Foundation of the American University of Beirut, Lebanon, will lead the discussion on "Foreign Service."

Research Director to Participate

"Research in Religion" is the topic of the discussion to be led by Lauris Whitman, executive director of field research for the National Council of Churches' bureau of research and survey. The discussion on "Service Pro-

Campus to Find One Hour Lost By Sunday Morn

Time flies. It'll fly extra fast come 2 a.m. Sunday. It'll be 1:59 a.m., just as usual, per scheduled. Then strictly routinely, it'll become 2 a.m. And then, quick as a flash—

It'll be 3 a.m.!

The explanation: Daylight saving time starts at 2 a.m. Sunday.

This will, in no shape or form, affect coeds' hours this weekend. Coeds, the University assumes, are safely snug in bed at that hour.

It may, however, have a drastic effect on Sunday morning church attendance.

Glee Club Sing Will Be Held

The University's Men's Glee Club will have one last campus sing before its annual fling tomorrow.

The club, combined with the Varsity Quartette, will present its annual concert at 3 p.m. Sunday in Schwab Auditorium.

Then, on Monday the 60-voice Glee Club will begin its annual tour of eastern Pennsylvania, New Jersey, and New York.

In Sunday's performance, the Hy-Los, a comedy group of 18 men within the Glee Club, will sing "Massachusetts," (Vasileff) and "Johnny Schmoker," a German song.

A number designed in honor of the University's Centennial, "Songs of America From Then Till Now," which was presented at the Feb. 22 Birthday Party, is included in the program.

23 to Attend CE Convention

Twenty-three civil engineering students from the University will attend the American Society of Civil Engineers convention tomorrow at Bucknell University.

More than 100 students from 10 colleges will be at Bucknell to participate in the technical sessions which begin Monday morning.

The principal speaker will be E. L. Chandler, assistant secretary of the ASCE organization in New York City.

John Nesbitt, professor of civil engineering, is the University adviser accompanying the students.

AIM Governors Plan Key Change

By JACKIE HUDGINS

After a man has served on the board of governors of the Association of Independent Men for a year he is traditionally given either a pin or a key in recognition of his services.

The key that has been awarded the governors has been gold with "AIM Council" written on it, although AIM Council went out of existence four years ago.

Some of the governors, at their regular meeting Wednesday, felt it was high time for a change. Thomas Kidd, parliamentarian, said the key was obsolete. Harry Martini, Pollock council president, said he thought the worst part of the design was the hammer engraved in one corner. Martini said even if students did not recognize the similarity to the sickle and hammer of Russia they might get the idea that AIM stood for force—which, Martini said, is definitely not true.

Kidd to Get Key Design
Kidd, who has been appointed to get some new design for the key, suggested that a miniature of the present AIM pin be sketched in the corner of the key instead of the hammer.

Kidd explained to the governors who were not familiar with the design of the AIM pin that it is in the shape of a "three-pointed circle." Kidd did not designate exactly what a three-pointed circle was although many of the governors looked bewildered.

Arthur Jenkins, Balfour Jewelry Company representative, is currently working on a new design for the key. Perhaps he can figure out what a three-pointed circle is.

In a recent tabulation by Bruce Lieske, treasurer, half of the governors wanted keys and the other half pins.

Avoid Confusion
One especially efficient governor suggested that either all pins or all keys be awarded in order to save money and avoid confusion.

Donald Weidner, former president of Town Independent Men, said quite a few men were on the board for four years and he thought four identical little gold keys would look silly on a chain.

Of course if a man had two pins exactly alike and two keys exactly alike he still might be the object of ridicule by the average independent.

AROTC Grads Get Extended Call-Up Time

Mandatory call-up time for advanced students in the Army Reserved Officers Training Corps graduating in June has been extended from 12 to 24 months, Col. Lucien E. Bolduc, professor of military science, has announced.

Instead of being ordered into the service anytime during the year after their graduation, students may now request a delay of a year before they begin active duty. This year will extend from July 1, 1956 to June 30, 1957.

Quotas permitting, students may elect any month during this year they wish to begin active duty.

Those not requesting the delay will be ordered into service in equal monthly lots between July 1 and June 30, 1958.

Before entering active duty, graduating officers will be assigned to one of five branch service schools. They are: Engineering Corps, Fort Belvoir, Va.; Signal Corps, Fort Monmouth, N.J.; Infantry Corps, Fort Benning, Ga.; Quartermaster Corps, Fort Lee, Va.; and Ordnance Corps, Aberdeen Proving Grounds, Aberdeen, Md.

New and existing policy directives will allow many ROTC graduates to attend advanced civilian schooling or established seniority rights in their vocational fields before entering service.

Pollock Dance Set for Friday

Pollock Council set Friday as the date for the first Pollock area dance of the year.

The "Spring Swing" will be held from 9 p.m. to midnight in the Hetzel Union ballroom. The dance will be informal and door prizes will be awarded. Music for the dance will be provided by the Melody Men and admission will be free, according to Harry Martini, council president.

Martini announced the date of the Association of Independent Men's banquet as May 6. The banquet, which is open to independent students, will be held in the HUB. No speaker has yet been named for the affair.

Cattle Judging Begins Today At Dairy Barns

The annual Dairy Cattle Judging Contest sponsored by the Dairy Science Club will start at 9 a.m. today at the new dairy barns.

First event on the program will be judging of ten classes of cows and heifers, two classes from each of the University's five dairy herds.

The contest will be split into two divisions. The amateur division will be open to all contestants who have not taken Dairy Science 31 and 32. These entries will have 12 minutes to place each of the 10 classes, and no reasons will be required.

Entries in the advanced division, open to all other contestants, will be required to give reasons in five of the ten classes. They will have 15 minutes on the reason classes and 12 minutes on others.

A 50-cent entry fee will be charged.

Judges for the contest will be Joseph Taylor of dairy extension, Robert McKnown, Howard Davis, Gene Harding, and Robert Neff, past members of dairy cattle judging teams.

A bus will leave the Dairy building at 8:45 a.m. for those who need transportation.

Food Handlers To Get X-Rays

All food handlers in the borough, including cooks and waiters in fraternities, will be required to have a tuberculosis chest x-ray under a borough ordinance passed a year ago.

According to Dr. Alvin R. Grove, borough health officer, the ordinance has not been enforced until now in order to give people the chance to get a free x-ray.

A mobile x-ray unit will be on campus May 2 to 4, and in the borough May 9 and 10 to give free x-rays. Dr. Grove urged that all those concerned take advantage of the opportunity, to save the cost of having x-rays taken by a private physician.

Reports on the x-rays will be due in borough hall by June 1. The x-rays must be repeated yearly.

Council to Sponsor Square Dance, Mixer

A mixer for faculty members and students of the College of Physical Education will be held from 8 to 11 p.m. Tuesday in White Hall. The Physical Education Student Council will sponsor the mixer. Candidates for council elections will be introduced during a square dance.

The council has adopted a constitutional amendment which will require all council officers to maintain a 1.3 All-University average. The constitution formerly required a 1.0 average.

Men May Apply For Hat Societies

Sixth and seventh semester men may apply for membership in Parmi Nous or Skull and Bones, senior men's hat societies, at the Hetzel Union desk until 5 p.m. May 3.

Letters of application are to include the student's All-University average, which must be at least 1.0, extra-curricular activities, and reasons for wanting to join the hat society.

Applications are to be addressed to the society presidents, William Wismer, Parmi Nous, or Robert Smoot, Skull and Bones.

Sigma Xi Holds Annual Dinner

Initiation of full and associate members highlighted the annual initiation banquet of the University chapter of Sigma Xi, national graduate science honorary society, held Wednesday night in the Hetzel Union Building.

Dr. W. Ralph Singleton of Brookhaven National Laboratory delivered the main address, "Biology and Atomic Energy."

Faculty members initiated as full members into the society include Dr. Christine W. Ayoub, lecturer in mathematics; Robert J. Grace, assistant professor of fuel technology; Dr. Joseph H. Graham, associate professor of plant pathology; Leslie P. Greenhill, associate director of instructional film research program; Dr. Henry T. Hiz, assistant professor of mathematics; Dr. Franco P. Jona, assistant professor of physics; Norman D. Magruder, instructor in animal nutrition; Dr. Charles J. McIntyre, co-ordinator of instructional film research program; Mark D. Shaw, instructor in agricultural engineering; Dr. James W. Shigley, assistant professor of agricultural and biological chemistry; Samuel Shullis, associate professor of civil engineering; and Dr. Valdimir Vand, associate professor of physics.

Graduate students initiated as full members include Earl Beck, Richard Forbes, Frank Gifford Jr., Frederick Langenberg, Floyd Preston, Chitaldurg Rao, Margaret L. Ross, and Conrad Trumbore.

Those admitted as full members who are not on campus at present are William R. Biles, Elliott J. Burrell, Bertran N. Driskell, Carl W. Godzecki, Ely Gonick, Frederick H. Grutter, Victor M. Held, Reed M. Izatt, Walter Kato, Aaron Martin, Alan Meldrum, Joseph Murnin, James Palmer, Joseph Rakosky Jr., Daniel Rase, William Sanders, Joan Schilk, Jack H. Weinek, and Edwin T. Williams.

Faculty members admitted as associate members are Richard M. Atkinson, instructor in metallurgy; Walter L. Baker, engineering research associate; Clarence S. Bryner, instructor in agronomy; Robert W. Decker, research assistant in mineral preparation; Raymond J. Deland, research

assistant in meteorology; Jerome B. Fanucci, instructor in aeronautical engineering; Robert W. Farwell, research associate in engineering; Howard T. Grendon, research assistant in mineral industries; Thelma R. Hobaugh, instructor in mathematics; Dr. Donald E. Kline, research assistant in engineering; Richard D. Mathieu, instructor in aeronautical engineering; Guy W. McKee, instructor in agronomy; Philip W. Reed, research assistant in petroleum and natural gas engineering; William J. Stambaugh, instructor in botany; and Charles A. Weintraub, research assistant in meteorology.

Graduate students with the ranking of associate members are Aiday Andrews, Francis Barnett, Samuel Braverman, Myrtle Brown, Edward Bush, Carl Campbell, Warren Cutler, Joseph Dulch, Carl Engle, Frank Falck, George Felbeck Jr., Dean Foley, Earl Grissinger, Peter Hanford, Don Harrison, Joseph Hutta, Michael Kotyk,

Roger Leach, David Lombard, William Lord, Lois Luedemanna, Charles Mange, William Mitchell, Edward Murphy, Fujio Oda, Richard Patterson, Shunli Roy, Harry Shadle, Eugene Silverman, Robert Snyder, William Sopper, Vivian Stark, James Starling, Donald Steiner, Anna Storgaard, Greenville Strother, Robert Taylor, Ellen Tessman, Herman Timm, Richard Walnerdill, and David Wharton.

Off-campus associate members who were initiated are Clifford McCarty, Seymour Rubinfeld, Ivan Samarawira, Roland J. Van Hattum, John Bubar, Robert Cairns, Richard Denton, and Richard Batterell.

Officers for the coming year are Dr. Benjamin A. Whistler, professor of civil engineering, president; Dr. Paul M. Alt-house, professor of agricultural and biological chemistry, vice president; Dr. Charles L. Hoeler, associate professor of meteorology, secretary; and Dr. Wayne Webb, professor of physics, treasurer.
