

Pre-Med Student Seriously Injured In 2-Car Accident

John W. Miller, sixth semester pre-medical major, was seriously injured early Sunday morning as a car he was riding in was struck in the side by another student's car at the intersection of E. Fairmount avenue and Locust lane.

Miller was thrown clear of the car before it was stopped by a tree, after hitting a stop sign post and sideswiping another tree. He was taken to the Centre County Hospital in the Alpha Fire Company ambulance.

275 Pledge Blood As Drive Starts

Two-hundred and seventy-five pledge forms have been turned in for the blood drive today and tomorrow in the Hetzel Union Building. The goal for the drive is 300 pints.

The bloodmobile will be at the HUB from 10 a.m. to 5 p.m. during the drive. Walk-ins will be accepted at any time.

Donors will be given a physical examination before donating blood. Blood pressure and a blood count will be taken at that time, and those who are found deficient will be turned away. Anyone who has had jaundice in the past or an injection or anti-biotic for a recent illness will also be ineligible. By "recent" illness is meant an illness within two weeks of the drive, according to Mrs. Naomi Holtz, local chairman of the volunteer nurses' committee.

Mrs. Holtz also stated that donors under 110 pounds may only donate a half pint of blood.

Donors should not eat any fats for at least four hours before the time of their appointment, Mrs. Holtz said, but it is advisable for them to eat something since many people have unfavorable reactions from not eating. It was advised that donors eat light food, such as orange juice, toast, tea, clear coffee, and skim milk, before their donation.

Alpha Phi Omega, men's national service fraternity, will set up equipment for the bloodmobile. Hostesses will be on hand from 9 a.m. to 5 p.m. today and 10 a.m. to 5 p.m. tomorrow to aid in serving refreshments and taking care of records.

The blood drive is sponsored by the Red Cross campus unit.

Weather Cancels Centennial Lecture

The third in a series of Centennial lectures was canceled last night because Dr. Abba Hillel Silver, the speaker, was unable to get transportation out of Cleveland, Ohio.

All flights out of Cleveland were canceled for the day due to inclement weather.

A lecture date for Dr. Silver will be negotiated for next fall, the Rev. Luther H. Harshbarger, University chaplain, said.

Atom-Powered Ship to Circle Globe

NEW YORK (AP)—President Dwight D. Eisenhower today unveiled plans to send a new atomic powered merchant ship around the globe in a dramatic demonstration of America's determination to win "a just and lasting peace."

The new vessel, the President

said, will travel thousands of miles without refueling and "will demonstrate to people everywhere this peace-time use of atomic energy, harnessed for the improvement of human living."

Eisenhower disclosed his intention to ask Congress for funds to build the new ship in a speech prepared for delivery at the annual luncheon meeting of the Associated Press at the Waldorf-Astoria Hotel. About 1300 of the nation's publishers and editors were on hand for the start of Newspaper Week in New York.

The President coupled his surprise announcement of plans for the atomic-powered ship with a new plea for congressional enactment of the administration program to cut tariffs 15 per cent over the next three years.

Eisenhower made no direct mention of Red China's weekend of-

4 to Be Suspended For WD Incident

Four freshman men will be suspended from the University at the end of this semester for taking active part in a West Dorm demonstration Tuesday night, Dean of Men Frank J. Simes announced yesterday.

The Senate Committee on Student Affairs subcommittee on discipline took the action yesterday morning.

Two other students, questioned about the incident, were found innocent of taking part in the disturbance which threatened to become a panty raid, Simes said.

The suspensions will go into effect at the end of this semester, but the students may apply for readmission in February. From now to June the students will be on disciplinary

Councils Set Elections for Tomorrow

Elections of representatives to the student councils of eight of the nine colleges will be held tomorrow and Thursday.

Nominations for seven of these colleges have been closed. Nominations for the Mineral Industries council are open until 5 p.m. today.

All students except those in agriculture will be able to vote in the two-day elections for next year's councils.

The voting places for each of the colleges are as follows: Physical Education, in the physical education classes; Liberal Arts, on the walk between Sparks and Carnegie or in case of bad weather they will be held in the lobby of Sparks; Home Economics, in the lobby of the Home Economics building; Mineral Industries, inside the main entrance to the Mineral Industries building; Engineering, in front of Main Engineering or in case of inclement weather inside the main entrance to Main Engineering; Business administration, in 106 Sparks or in the lobby of Sparks; Chemistry and Physics, in the lobby of Osmond; Education, in front of Schwab or in the case of bad weather in the lobby of Burrows.

Tribunal Applications Are Available at HUB

Applications for Tribunal, men's student judicial body, are available at the Hetzel Union desk.

The applications are due at 5 p.m. next Tuesday. Applicants should be third or fourth semester sophomores. Interviews will be held May 9.

All-University Cabinet must approve appointments to Tribunal.

Riot Action Explained By Simes

Dean of Men Frank J. Simes explained to West Halls Council members last night the action taken by a Senate committee yesterday against students participating in last Tuesday's panty raid scare.

He said a committee composed of three students and three faculty members voted to suspend four students, effective at the end of the semester.

Also, West Halls Council went on record as disapproving of the action of the area residents in the riot. The vote was unanimous.

Simes told council that the affair could have been prevented if the students would have exercised "a little judgment" and that the committee "did not try to make examples of them (the suspended students)."

Simes pointed out that panty raids not only bring property destruction, but also bad publicity to the University. He added that the press would have "jumped on the story" since this is the University's Centennial year.

He also said that telephone service to and from the area was canceled by the dean of men's office to keep the riot from spreading. He added that full service was not resumed after the storms ended the mass demonstration because of a blown fuse on the area switchboard. He said that emergency calls were allowed to go through.

probation, which goes on their transcripts and bars them from participating in extra-curricular activities.

Two of the students, a second semester engineering architecture major and a second semester agriculture major, were seen throwing a cherry bomb in the West Dorm quadrangle by dormitory counselors, Simes said.

Another, a second semester engineering major, was seen waving a Nazi flag from a first-floor window, he reported.

The fourth, a second semester liberal arts major, was seen participating in the demonstration during the evening and trying to start a riot demonstration around midnight, Simes said.

He was observed shouting outside of McKee Hall in an attempt to revive the demonstration, Simes said.

One of the students questioned but found not guilty is a resident of a room from which obscene language had been shouted. But it was impossible to determine whether he or someone who had entered the room was guilty of the obscene language, Simes explained.

The other student was an occupant of the room from which the Nazi flag had been unfurled, but was not a participant in the incident, Simes said.

If other students had been identified as participants in the demonstration they too would face disciplinary action, Simes said.

The students given the penalty were "more than passive observers," Simes said. "They were doing more than standing around."

He said all men students had been given sufficient warnings prior to the demonstration. Such incidents, he said, are potentially dangerous to University property and to students and bring harm.

Transponder Tests Still Progressing

By SUE CONKLIN

Transponders are at present working efficiently in the West Dorms, and tests are still being conducted in Atherton, Simmons, and McElwain Halls, David R. Mackey, assistant professor of speech, said yesterday.

Mackey is advisor to WDFM, campus radio station. He explained

that if tests, which will be conducted this weekend, in Atherton Hall are successful it will give some indication of the success of similar tests in Simmons and McElwain Halls.

James Raleigh, engineering director of WDFM, said he was hopeful, but that many times he has been disappointed, in the transponder tests.

Transponders Unstable
Raleigh said that on a recent trip to Pittsburgh, he spoke with several executives of engineering companies who had dealt with transponders. Those who had conducted tests similar to the ones WDFM is using for its transponders, found the tests very unsuccessful and relatively unstable.

Raleigh explained that he does not like to publicize his work because there is always something

that might go wrong. Also when tests are made, he wants to find out why the mistakes occurred so that he may prevent it from happening again. This is very time-consuming, and publicity would put extra pressure on the work, Raleigh said.

Change Station Signals
These transponders change the station's FM signals to AM signals which can be received on ordinary radio sets. Students will not be able to receive WDFM constantly until transponders are perfected and installed with the purpose of enabling students to listen to the station.

Several problems face the engineers, one of which is making the converted AM waves constant over the whole dormitory.
