Outbreak of Colds Plagues Campus

An outbreak of colds—ranging from sniffles to sore throats—is plaguing the campus.

An average of 60 students have at the University Dispensary in the basement of Old Main, Mrs. Mark K. Royer, secretary to the University physician, said yesterday.

The number of students re-porting to the dispensary is not higher than ever before, but is high for this time of year, Mrs. Rover said.

She said during the winter months the average number of cold sufferers is considerably higher.

Six in Hospital

Six of 24 patients at the University Hospital are suffering from colds, according to hospital attendants. Sixteen of 25 patients

at the hospital a year ago today were victims of the cold germ.

Hospital officials pointed out that the rumors indicating a flu epidemic has hit the University are false. Cases treated were only of the common cold variety, they

They explained that a high number of colds is to be expected after persons make a change in their living habits. "They are more susceptible to colds then, an official said.
