Bounce Frothy

Although many people are finding it impos-sible to buy tickets for the University's remain-ing home games we doubt if anyone will feel so sorry for these unfortunates that they will recommend that they be admitted free and be allowed to stand along the sidelines.

Anyone who would recommend such action would certainly be classified in the dope category. But yet for several years students have been standing by while a certain individual who should not be there prances along the sidelines

This character goes by the unlikely name of Frothy. Why he is down on the field represent-ing the University is a fact we cannot understand.

He does not help with the cheerleading. He is certainly not a symbol of Penn State. The only impression of the University that he could convey to outsiders would be that a bunch

of dunces go to school in the Nittany Valley. The only justification for his presence seems to be to drum up interest in a so-called humor magazine which circulates sporadically about the campus.

This hardly justifies his prominent position at football games especially since he might at-tract attention to that magazine, hardly a de-

sirable situation. Frothy would be best kept hidden as his ramesake. Let the cheerleaders cheer, the lion symbolize, but keep the foolishness hidden. -The Editor

The Spell of a Ghost Members of the borough council who have been feeling uncomfortable of late may very well be able to easily rid themselves of their uneasiness.

All they have to do is please a prominent ghost-about-town.

It seems that years ago the borough fathers decided to honor presidents of the University by naming streets after them-a very commendable practice.

But somehow there was an unfortunate slipup when it came to immortalizing John Frazer, the University's third president.

His street was dubbed "Frazier" street.

And since then the poor old chap's name has been maligned on many a street sign, letter, and the like.

Now this, of course, is upsetting to any spirit. And ghosts should certainly be allowed to rest in peace.

President Frazer can hardly be blamed if he drops hints to council members that the misspelling should be corrected.

Of course visitations from beyond the great divide are hardly pleasing to anyone, even borough fathers. But perhaps they would cease if the council members tried to please Mr. Frazer.

Pennsylvania Needs Sales Tax—Rowland By JUDY HARKISON

Charles J. Rowland, professor of accounting, told members of the Faculty Luncheon Club at noon yesterday that Pennsylvania should adopt a 2 per cent sales tax to meet its 'serious financial problem."

Gov. George M. Leader allowed the J per cent sales tax, established during Gov. John Fine's administration, to expire September'1.

Rowland said the need for increased taxes has arisen out of the increased taxes has arisen out of the increased expenditures by the State for public education, health, and welfare. At the pre-sent time, 50 per cent of the money is spent for education and 31 per cent in health.

cipal sources of revenue are the most part, desire a state income consumer and the business tax. tax. Included in the consumer tax are levies and cigarettes and alcoholic beverages, he said.

could be made on soft drinks, interstate receipts, tobacco, meals over \$1, and hotel rooms over \$2 in price. However, he

said these miscellaneous taxes would not settle the problems in the long-run.

BETTER THINGS FOR BETTER LIVING . . . THROUGH CHEMISTRY

IMAGINATION!

Los Alamos Scientific Laboratory, the nation's most important institution for the development of atomic weapons, is interested in interviewing young graduate engineers and scientists—particularly those wanting to help in the development of the atomic age.

In addition to its continuing and ever expanding achievement in nuclear weapons research, the Laboratory is now pioneering in the fascinating fields of nuclear power and nuclear propulsion.

At the Laboratory, staff members have the opportunity of associating with leaders in research and experimentation . . . of working with some of the Western World's finest equipment and facilities, . . of winning recognition ... of achieving advancement commensurate with ability.

If you would like more information about the Laboratory's career opportunities which are not civil service . . . about the delightful climate and area in which Los Alamos is located,
