

Committee to Consider Faure's Election Plan

PARIS, Oct. 27 (AP)—Premier Edgar Faure's plan to hold national elections in December, moved one step nearer today. A committee of the National Assembly voted to give the subject urgent consideration.

The government was expected to insist that debate in the full Assembly open tomorrow night, immediately after a scheduled vote of confidence—if the government wins. Under the tentative plan being considered debate would continue Saturday and a final decision be reached by Sunday or Monday.

Ike Molds Plan For Legislative Program in '56

DENVER, Oct. 27 (AP)—President Dwight D. Eisenhower got a head start today on whipping into shape a 1956 legislative program expected to lay heavy emphasis on farm, highway, school, health and water resources problems.

Sitting up in his hospital bed—after shaving himself for the first time since his Sept. 24 heart attack—Eisenhower approved various topics to be included and stressed in his State of the Union message in January to a Congress still under Democratic management.

Conference Is Long

That was in the longest business conference since his illness, a 45-minute session with three White House aides:

The assistant to the President, Sherman Adams; the deputy assistant in charge of legislative liaison, Maj. Gen. Wilton B. Parsons; and Kevin McCann, assistant in charge of drafting speeches and reports.

In a Washington news conference Aug. 4, immediately after Congress adjourned, President Eisenhower listed water resources, health, school construction and highway legislation as "absolutely vital to our future." He said these "must be handled as soon as Congress comes back."

Measures Not Approved

He also mentioned other measures which Congress failed to approve at the last session in terms indicating he still intended to press for them. Among the items he ticked off were: statehood for Hawaii, an atomic-powered ship to cruise the world and demonstrate how the atom can be harnessed for peaceful purposes, amendments to the foreign refugee law, simplification of customs procedures, and military survivors' benefits.

German Unity—

edge by releasing their terms to the world press tonight.

After Molotov's objection, they withheld these from publication until Secretary of State Dulles formally presents them tomorrow.

"A distinct bullish point for the Geneva spirit," said a British spokesman of the withholding action.

The conference secretariat, however, supplied Molotov a copy of the Western proposal for overnight study.

Russia OK's Atomic Energy Peace Agency

UNITED NATIONS, N.Y., Oct. 27 (AP)—With the United States and Russia voting together in favor, the UN Political Committee today called for the early creation of an international atomic energy agency for peaceful purposes. The vote was 53-0. The six Arab members of the UN abstained.

Russia, the United States and India buried their differences and approved a resolution which is certain to obtain final passage in the UN Assembly.

Diplomatic sources said the Arabs abstained because Israel was a co-sponsor of the resolution.

This resolution endorsed plans of the United States and allied atomic powers to hold a conference of all members of the UN and specialized agencies on the final text of a constitution for the agency.

The United States has circulated a proposed statute to all UN members and specialized agencies and hopes to have the agency operating before the end of 1956. This would put into operation President Dwight D. Eisenhower's proposals of Dec. 8, 1953, to use the atom for peaceful purposes.

Leader Signs FEPC Law

HARRISBURG, Oct. 27 (AP)—A 10-year battle to put the law behind efforts to ban discrimination in employment or union membership because of race, creed, color, age or national origin ended today.

Gov. George M. Leader, in signing fair employment practices legislation, hailed it as "a victory for all of our people."

The right of an employer to refuse to hire a person because of his age, creed, color or national origin will be outlawed as of Nov. 26 under the new law.

And his refusal to hire a worker because of age between 40 and 62 years will be banned on July 1, 1956.

While the recorded subject of division between Faure and his opponents was the government's general policies, the underlying fight was over the question of pushing ahead the election date by seven months—at least under the present method of voting.

Former Premier Pierre Mendes-France broke with Faure on the issue. Both are members of the Radical Socialist party—and are old friends. The Mendes-France faction was all-out in its efforts against Faure early this morning. Mendes-France accused Faure of trying to "falsify the results" by speeding the test at the ballot boxes.

Mendes-France is not ready for the election. He does not yet have full control of the Radical Socialist party machinery. He wants this apparatus to help elect deputies favorable to his program in the next Assembly.

Nobel Prize Awarded To Icelandic Novelist

STOCKHOLM, Oct. 27 (AP)—The 1955 Nobel prize for literature went today to Halldor Kiljan Laxness, a left-leaning novelist from Iceland. He is little known in the United States, though he used to live there and one of his books was a best seller there in 1946.

Laxness describes himself as one "who loves the Russians but practices a lot of the American way of life."

160 OLD COUNTRY ROAD MINEOLA, N. Y.

"Ideally situated on Long Island, in the Heart of the Electronics Industry."

LaVie Proofs Deadline

Seniors in the College of Business Administration, the College of Chemistry and Physics, and the College of Agriculture must return LaVie proofs to the Penn State Photo Shop by Tuesday.

Students not returning proofs by this time will have pictures selected for LaVie by the editorial staff.

Square Dance Class

A beginners' class in folk square dancing will begin Monday in the Hetzel Union ballroom.

Separate classes will be held Monday through Thursday nights. Students will receive six one-hour lessons.

Students who wish to join the class may sign up at the Hetzel Union desk.

Going to PENN Today?

Well, so am I, but I want to warn you before you leave. That is to be sure and take your time getting there. I just don't trust these crazy humans when they're in a hurry to get somewhere. After all, I like the way I am now and I don't care to have Turtle Soup made out of me.

Another thing you want to make sure of is that you're feeling up to the long drive. One sure way to do this is to stop in at the Finer Diner, THE PENN STATE DINER, and grab a quick snack and a cup of coffee just before you hit the road. That's what I'm going to do, so why don't you do the same.

I hope we win this week and that all of us there have a real good time. One thing sort of spoils my weekend, though, and that is my Turtology prof is giving me a bluebook Monday. That means I have to study when I get back from the game so I'll have to build up my strength by stopping at the Finer Diner for a good meal.

Why don't you stop in too . . . even if you don't have a bluebook. Come in and talk over the weekend and all the fun you had. All your friends will be here so come on in and join the rest of the gang!

find yourself

in the most diversified aircraft company in the industry

GOODYEAR AIRCRAFT CORPORATION

The Engineering Departments in Akron, Ohio, and Litchfield Park, Arizona, areas are engaged in all phases of guided missiles, guidance systems and the development of analog computers. Specialists in microwave, servomechanism, circuitry, etc. are highly important to these operations. Other departments require electronic, electro-mechanical, mechanical, structural, propulsion, and aeronautical development engineers. Many opportunities exist in these departments which cater to the entire aircraft industry in the fields of simulated trainers, lighter-than-air, radar, radomes, airplane wheels and brakes, fuel cells, airframes, fuselages, canopies, laminates, large aperture antennas for ground-based and air-borne radar, and many other projects.

Opportunities Are Unlimited At Goodyear Aircraft where new ultra-modern facilities are being built in preparation for expansion of our activities. Here is where you can get general or specialized experience in keeping with your capabilities and future plans.
