

# Water Tower Skeleton

—Photo by Rohrbaugh

LOOKING LIKE A HUGE half grapefruit fit for a Paul Bunyan breakfast is part of the new University water tower being constructed in Hort Woods behind the Helen Eakin Eisenhower Memorial Chapel. Workmen have erected the structural steel which supports the dome and are well into the raising of the dome itself. The growing number of buildings and students on campus has caused the demand for the structure, which will supplement the present water tower.

# New Liberal Arts Publication To Go on Sale After Christmas

Faye Goldstein, business manager of the liberal arts Lantern, told the Liberal Arts Student Council last night that the magazine will not come out before Christmas as was previously decided.

It will probably go on sale two days after the vacation. It was also recommended that the price of the Lantern be raised from 10 to 25 cents. Council passed a motion to this effect and also moved to allot \$325 for the publication of the Lantern, with the business staff determining the method of promotion.

The magazine has been changed from one of general feature to include writings of a more literary nature. It will contain 32 pages. The magazine writings are now being read by four faculty members.

It was estimated that it will cost approximately \$1 to publish a copy. Three hundred copies are being printed. The council does not want to make money, however, but hopes to insure success of the new Lantern. The last liberal arts coffee hour will be held at 4 p.m. today at the Beta Theta Pi chapter house.

Robert Steele, sophomore in arts and letters from State College, was appointed by council as a representative to the marriage counselor conference sponsored by the University Christian Association.

**Sunday Movies Begin**  
Sunday movies in the borough will become a reality this weekend. The theatres will now be permitted to open this Sunday after 2 p.m.

The County Election Board certified the general election results of Nov. 8 that approved Sunday movies and Burgess David R. Mackey notified the theatres.

# BA Council Supports Book Store

The Business Administration Student Council voted last night to endorse a proposal in favor of a university bookstore if it comes up before All-University Cabinet.

The problem of a student-owned bookstore was first discussed at the time the Student Encampment Committee Report on Town and University Relationships was presented to Cabinet.

It was stated at summer Encampment that if a store were operated off state property it would not provide unfair competition to the existing bookstores. The reasons given in favor of a university bookstore were that students complain about high prices and that text books are often unavailable.

The Encampment committee decided that a student-owned bookstore was not needed at the present time providing the faculty make a stronger effort to put out more accurate book lists for the bookstores earlier in the season and providing the bookstores cooperate more fully in ordering books and supplies. It was pointed out that prices on books are set by the publishing companies and therefore bookstores are not at liberty to mark prices up for their own benefits.

The council also voted in favor of a one hour, one credit orientation course designed to acquaint freshmen with the different aspects of the College of Business Administration. No definite plans have been made for the course.

December 13 was approved by council as the date for the faculty-student coffee hour which will be held at 4 p.m. in the Hetzel Union ballroom.

**Other Buildings First**  
Elam said the University had planned a new auditorium, but that the additions to Rec Hall and the Hetzel Union Building construction were placed before the building of a new auditorium.

He also claimed that University officials had said the HUB would include an auditorium. "We're sitting in that auditorium now," he said sarcastically.

The motion passed unanimously. **Other Motions Approved**  
Other motions approved were that IFC act as an agency for Christmas trees for fraternities, that a permanent seating arrangement be made for meetings, and that a list of fraternities absent from a meeting be included in the minutes of that meeting.

Bullock announced five appointments to the fraternity evaluation committee. They are Francis Markland, junior in agricultural and biological chemistry from Secane; Douglas Moorhead, senior in horticulture from North East; Steven Jordan, junior in arts and letters from San Bernardino, Calif.; Dean Vesling, senior in industrial engineering from Clarendon; and Don Bostack, junior in industrial engineering from Bethesda, Md.

**Faculty Reception Slated for Coeds**  
A reception to acquaint junior and senior women students with members of the faculty will be held from 7:30 p.m. to 9:30 p.m. next Wednesday in Simmons lounge.

The reception will be sponsored by the Women's Student Government Association. Junior and senior women may attend. Names of faculty members to receive invitations have been submitted to the juniors and seniors. Those receiving the most requests will be invited to attend.

**Panhellenic Council to Meet**  
Panhellenic Council will meet at 8:30 tonight in 212 Hetzel Union.

**Ice Skating Plans To Be Discussed**  
Students interested in organized ice skating functions may attend a meeting at 7 tonight in the Waring Hall lounge, Robert Cole, president of Town Independent Men, said yesterday.

Cole said the group will try to plan some activity to take the place of the ice show that was originally planned. Present ideas include a mixer, dance, or open house. Dance possibilities include a floor show.

**Analyser Fund Granted \$100**  
A check for \$100 to be used for the construction of a network analyser in electrical engineering has been presented to Arthur T. Waynick, head of the department of electrical engineering.

Richard Sherwood, president of the American Institute of Electrical Engineers and Institute of Radio Engineers student branches, made the presentation. It is the second one since the fund began two years ago.

Construction on the network analyser will begin next semester in the basement of Electrical Engineering Building. Waynick estimated that when completed, in three to five years, it will have a value of \$100,000. Its size will depend upon contributions, Waynick said.

**Leonides-AIM Chorus to Meet**  
The Leonides-AIM Chorus, which was scheduled to meet at 7 tonight in Old Main, will meet instead in the Hetzel Union auditorium.

"Druids," the first Hat Society, was organized in 1907 to cite sophomore men who had shown qualities of leadership in their freshman year.

**Student Lounge Plan Discussed By Chem-Phys**  
The Chemistry and Physics Student Council is considering the possibility of establishing a lounge for chemistry and physics students.

Whitmore Laboratory has been suggested as a possible location for the lounge. William Childs, president of the council, has suggested that the lounge could be used as a meeting place for students and professors to discuss bluebooks. An informal discussion of this type could be a great aid to the students in studying for tests, Childs said.

The council also discussed the third annual science fair and open house. A tentative date of April 21 had been set for the open house despite the fact that the Engineering Student Council may drop out of the affair.

The science fair, a project of the Central Pennsylvania Science Teachers, is a display of projects submitted by high school students from the Central Pennsylvania area. The students will compete for prizes.

**IFC to Seek Sites For New Expansion**  
Interfraternity Council will seek inclusion of fraternity expansion in the long-range University building plans. The action was taken last night by the council as it voted unanimously to establish a committee to make recommendations for inclusion of fraternity expansion on drawing-board plans to University officials.

The motion, which was amended to include the establishment of the committee, was made by Hoston Elam, senior in business administration from Lansdale, representing Beaver House.

**Few Sites Available**  
Elam said he made his motion because few sites for fraternity buildings are now available in State College, and with the expected increase in enrollment by 1970, fewer sites will be available.

Elam also moved that Robert Bullock, council president, take a motion asking the University to construct a new auditorium to All-University Cabinet.

Said Elam: "When Eleanor Roosevelt was here, we had two choices—put her in Schwab Auditorium for a limited audience, or stick her in Recreation Hall, where she thought and everyone else knew, she was in a barn."
