

Cabinet to Consider NSA Conference

All-University President Earl Seely will ask All-University Cabinet tonight if it would like to extend an invitation to hold the National Student Association Spring Regional Conference at the University.

The only convenient date for the University would be April 27, 28, and 29, according to Seely.

Seely said he also hopes to have selected someone to be NSA Coordinator to present to Cabinet.

If the regional conference is held at the University, Seely said that the University NSA Committee will have to send letters to the various schools in the region listing the fraternities, sororities, motels, and hotels which could be used for housing for the visitors. Most schools have a system for providing funds for food and housing for their delegates.

The NSA program to be carried out is organized by the Regional Chairman, James Pomroy.

Seely will hold an informative meeting for students interested in NSA at 7:15 p.m. Sunday in 203 Hetzel Union Building. He said that several students have signed up as being interested in NSA and should attend the meeting. Other students interested may also attend.

Students attending the meeting will have the NSA organization explained to them as well as the plans for NSA on campus.

Under the present plan for NSA at the University an NSA Coordinator will be the central figure and head the NSA Committee which will be composed of four departments. This committee will meet frequently and be the center of NSA on campus.

The four departments, according to the plan, will be Campus Affairs, Special Arrangements, Regional and National Affairs, and International Affairs.

These four departments will be directly responsible to the coordinator.

In addition to this there will be a Secretariat which will receive all incoming and outgoing mail. The Secretariat will be in charge of distributing information coming in from regional, national, and international NSA to the proper department. It will also handle the distribution of any questions or correspondence from campus activities.

If a particular campus activity desires information which it may obtain through NSA it should go to the Secretariat. (Continued on page eight)

New Suite Being Built In Old Main

Painting is now being completed in three classroom buildings and the new administration suite being constructed in the second floor lounge of Old Main is awaiting the drying of the plaster.

Finishing touches are now being made by Physical Plant workers in three buildings—Sparks, Mineral Industries, and Main Engineering, according to Charles A. Lamm, head of the division of building maintenance and operation.

Almost all of the classrooms in Sparks building have been painted, as well as laboratories in Mineral Science building.

Workers have finished painting room 1, in the basement of Main Engineering building. The large room opposite it will also be painted.

Besides the classrooms in Sparks, some of the corridors have been painted. Faculty offices were done two years ago.

The new administration suite being constructed in the second floor lounge of Old Main is now awaiting drying of the plaster before work can be continued, Lamm said.

Work will probably begin again the week of Feb. 28 and the suite of three rooms should be completed by late March, he added.

The new suite will be the office of Wilmer E. Kenworthy, director of student affairs. Kenworthy's present office will be a filing room.

Besides Kenworthy's office, the new suite will contain a reception room and a filing room.

Management Group to Meet

The Society for the Advancement of Management will meet at 7:30 tonight at Phi Kappa Tau.

British Trade to Russia Blasted by Industrialist

WASHINGTON, Feb 15 (AP)—Senators investigating East-West trade were told today Great Britain and other allies, with U.S. permission, are selling Russia the means to build "the most modern weapons" of war.

Ralph R. Baldenhofer, a Mid-western industrialist and sometime government consultant, contended it would be "far better" to furnish the Soviets guided missiles or planes.

Strategic production tools can be used over and over again to make deadly implements of war, he said, while a missile "can come back at us only once."

Baldenhofer testified before the Senate Investigations subcommittee at the start of hearings called to check into the sale of potential war materials to the Soviet bloc.

Sen. John L. McClellan (D-Ark), the subcommittee chairman, charged at the outset that Eisenhower administration officials have put "obstructions" in the path of the inquiry.

McClellan said evidence at hand indicates a "very disturbing" use of free world shipments to Russia that are "indispensable in constructing or maintaining a war machine."

He declared the Defense De-

partment had failed to make available one of its machine tool experts for testimony and said the subcommittee would resort to a subpoena if necessary. Later, however, he said the department had agreed to "cooperate" and that the expert, John Williams, would be available for testimony tomorrow.

Baldenhofer testified both he and Williams had opposed allowing the shipment of many presently cleared items to Russia.

Baldenhofer is executive vice president of a Springfield, Ohio, machine company. He said he is now a consultant to the Navy and served in the Commerce Department last year as a machine tools specialist.

Cabinet to Discuss Opinion Board

All-University Cabinet will hear the details of a proposed Student Opinion Committee to provide a system of communication between Cabinet and the student body at its first meeting of the semester tonight.

According to Bruce Lieske, president of the Association of Independent Men and sponsor of the idea, the committee will act as a sounding board of student opinion by con-

ducting polls and distributing questionnaires to the student body.

In justifying such a committee Lieske said that at present the students do not have an adequate channel of communication between themselves and the All-University Cabinet.

He added that since the students do not or cannot use the existing channels of communication between themselves and Cabinet and since student government can never be effective un-

AGENDA

Committee Reports:

1. Compensation Committee—Phil Beard
2. Leadership Training Committee—Jim Musser
3. Registration Committee—Bob McMillan
4. Executive Committee—Doug Moorhead, Lynn Myers, Jim Musser, Joe Hayes

New Business:

1. Annual Report—Your Student Government
2. Constitutional Amendment
3. Scholarship and Award Report

less it represents a great proportion of the student body, the best way in which these things can be accomplished is the proposed Student Opinion Committee.

The annual report of the Compensation Committee also be presented by the committee chairman, Phil Beard.

The committee will present its recommendations on which positions in student government should receive compensations and also the size of the compensations.

The Chemistry and Physics Student Council last night passed a motion to instruct Bill Childs, president, to vote negatively on the compensation scale for All-University and class officers that will be presented to cabinet.

AIM Board Asks Probation For Freshmen

Association of Independent Men's Judicial Board of Review recommended both office and judicial probation Tuesday for a freshman in arts and letters who became involved in a series of incidents after taking beer into his room in West Hall area Feb. 1.

The student also permitted three of his friends who are not students to remain in the residence hall for two nights without the approval of the department of housing, and became involved in a water fight later in the evening.

Signs of the water fight were discovered by the residence hall maid the next morning. The student and his friends had placed the empty beer cans on the water pipe in his room.

He had purchased the beer at a borough tavern, although he is a minor.

The board also agreed to send a letter of reprimand to the tavern involved.

The student said he and his friends drank most of the beer before returning to the residence hall but carried "a few cans" to his room.

Three Injured In Auto Crash

A University associate, a research assistant, and a student were involved in the same accident yesterday morning. The research associate was slightly injured.

Jack Zussman, research associate in ceramic technology, received slight brush burns when he fell from the car operated by Stanley Rothschild, research assistant in mineral preparation.

The accident occurred at the intersection of Burrows street and Foster avenue, police said.

Driver of the other car was Eugene Griffin, senior in the division of intermediate registration from Old Greenwich, Conn.

Rothschild will be charged with failing to yield the right-of-way, police said.

Damage to Rothschild's car was estimated at \$500, and the Griffin car at \$100.

A Borough street marker was also damaged in the accident.

World Ag Group, New Organization, To Meet Tonight

The World Agricultural Service Society, a newly organized group, will meet at 7:30 tonight in 217 Hetzel Union.

The program is entitled "Meet the Philippines," and will be led by Jose Alonzo, Isaac Alvarez, and Luis Bago, school teachers in rural areas of the Philippines, who are at the University for a year of special study in agricultural education. Colored slides will be shown.

Glen Elder, society president, will preside at the meeting, which will be open to the public.

Membership in the group is not limited to students in agriculture, according to Frank Anthony, instructor in agricultural education and adviser to the group.

Prexy to Get Korean Award

Dr. Milton S. Eisenhower, president of the University, will receive South Korea's highest civilian award Friday in Washington for his organization and leadership of the American-Korean Foundation.

The Associated Press reported last night that Korean ambassador Yau Chan Yang will present the Republic of Korea Medal on behalf of President Syngmen Rhee in a ceremony at the Korean Embassy.

Dr. Eisenhower became the first chairman of the organization in 1953. The foundation functioned as a relief agency during the Korean conflict and is now materially aiding Koreans.

Dr. Eisenhower will leave for Washington immediately after the funeral of James Milholland, former president of the Board of Trustees at the University, who will be buried at 2:30 Friday afternoon in Pittsburgh.

Yang said Milton Eisenhower is regarded by the Korean people "as their great, good friend. Through his leadership were given kindness and material assistance to the sufferers from Communistic aggression."

Cloudy, Cool Weather Forecast for Today

The forecast for today's weather is partly cloudy and cool, according to the students in the department of meteorology. Tonight will be clear and colder with a low of 25 degrees. The high today will be 34.

The high for yesterday was 39 with a low of 38.

Precipitation yesterday amounted to .09 per cent of an inch.

Industrial Education Society

The Industrial Education Society will meet at 8 tonight at Lambda Chi Alpha. Movies will be shown.

Final Milholland Rites To Be Held Tomorrow

Editorial on page four

Funeral services for Judge James Milholland, president of the Board of Trustees of the University since 1946, who died Tuesday night will be held at 2 p.m. tomorrow from the Sampson Funeral Home, Pittsburgh.

President Milton S. Eisenhower and his staff will represent the University at the services.

Seely to Attend

Earl Seely, All-University president, and Phillip Beard, All-University secretary-treasurer, will also attend the funeral.

The 68-year-old judge was admitted to the hospital on Feb. 5 after a heart attack at his Pittsburgh home where he was recovering from an appendectomy he underwent after Christmas. Doctors said Judge Milholland suffered three heart attacks Monday and three Tuesday.

A successor to Judge Milholland will probably be chosen at the next Board of Trustees meeting June 7 and 8. According to a board regulation, a vacancy in any office is filled by ballot of the members at any full meeting of the board.

The two flags in front of Old

Main were lowered to half-mast yesterday in memory of Judge Milholland.

He has served on the Board of Trustees since 1930 and, less than a month ago, was elected to his 11th term as president of the board. At that time he was named a Distinguished Alumnus of the University by the members of the board. Five graduates are conferred this honor every year.

Judge Milholland was born on Oct. 25, 1887, in Pittsburgh where he has been a life-long resident.

Earned Degree Here

He entered the University in 1907 as a pre-legal student and in 1911 qualified for his bachelor of arts degree. Entering the University of Pittsburgh, he earned his bachelor of laws degree in 1914.
