

Phys-Ed Council Hears Three Committee Reports

The Physical Education Student Council heard the reports of the three committees formed last week to study problems relating to over-specialization in their school at their meeting Sunday night.

The recreation committee, made up of students who are recreation majors under the jurisdiction of the Physical Education College, gave the first report. They felt that health education 60, now a 2 credit course, should be changed to a three credit course and an extra hour a week be added.

New Activities Requested

In regard to men's recreation majors activities, there was a request for volleyball, golf, and bowling to be included as the group felt that they would have occasion to officiate those sports upon graduation.

The question of whether chemistry or physics was a necessary requirement for the major was raised. At the present time recreation majors at the University are not certified to teach, and therefore they felt that there was no reason for the requirement and that another science could be substituted as well.

The women recreation students felt that hockey and badminton need not be conducted for so long a time, and that others which would be used more might be added.

The physical education committee felt that softball should be included in their activities. Physical Education 58, an orientation course could be strengthened, and they felt that this would be a good time to explain to the students what minors were available in their college and the courses required for each.

Repetition in 3 Courses

The group said that there was much repetition in the courses of Zoology 41, human physiology, physical education 399, recognition of remediable physical abnormalities in school children, and health education 244 facts of anatomy and physiology.

In the psychology of coaching course, women students felt they should have a woman teacher as the majority of the material dealt with instruction of courses they would never be teaching.

The committee on minors stated that they agreed with the suggestion that freshmen be told about minors in their orientation course.

Students in physical education usually must have sufficient credits to enable them to teach another course before they are able to have a good chance to attract employers.

Music English Pianist Will Present Concert Tonight

Katherine Bacon, noted English pianist, will present a music program at 8:30 tonight in Schwab Auditorium.

The program will include music of Franck, Beethoven, Schubert, Chopin, Rachmaninoff and Prokofieff.

Admission to the concert is by complimentary ticket, which can be secured from the department of music, 216 Carnegie; the Hetzel Union Building; Harmony Shop; or the Hillel Foundation.

Doors to the auditorium will be open at 8 p.m., and non-ticket holders will be admitted at 8:20 p.m.

Miss Bacon will conduct a master class in piano teaching and playing at 1:30 p.m. tomorrow in Schwab. She will hear students of private teachers and students from the music department, and will offer suggestions for the improvement of their work. Students, teachers and the public may attend this session.

Miss Bacon's tour, sponsored by the arts program, Association of American Colleges, also includes other colleges and universities.

WSGA Senate at 6:30 p.m. tomorrow in 218 Hetzel Union.

Elections--

(Continued from page one) committee chairman.

All-University President Earl Seely last night announced four appointments to the Elections Committee which will be submitted to Cabinet Thursday for approval. They are Susan Conklin, junior in arts and letters from Chevy Chase, Md.; William Landis, senior in aeronautical engineering from Shanksville; Robert Nurock, sophomore in arts and letters from Elkins Park; and Glen Elder, junior in agricultural education from Centerville.

Elections committee will meet Sunday at 6:30 p.m. in 121 Sparks.

WSGA to Receive Report

Carolyn Cunningham, president of Woman's Student Government Association, will present an elections committee report to the

Spring Week--

(Continued from page one)

The committee decided against the idea because it did not feel the drive would be in keeping with the spirit of Spring Week and because the facilities of the blood mobile only handles 600 pints. Members felt that points could not be given when not all the people that would probably desire to participate could be handled.

Donkey basketball will replace donkey baseball this year if the committee is able to get Rec Hall for May 1. The rules of donkey basketball are the same as those of regular basketball except that a player must be on a mule when he shoots for a basket. Each team consists of about four or five players.

CPA Senior Board to Meet

Senior Board of the Central Promotion Agency will meet at 7 tonight in the CPA Office.

Nelson, Banya Pais, Marsha Schanz, Jacqueline Schenberg, Barbara Wittenberg.

Sigma Sigma Sigma, purple and blue: Shirley Kern, Janice Krug, Rosemary Staropoli, Carolyn Wagner, Bernice Weber.

Theta Phi Alpha, silver and blue: Doris Castranova, Julie Laurenzi, Marie Russo, Barbara Wall.

Zeta Tau Alpha, turquoise blue and steel gray: Evelyn Bunting, Carolyn Courtman, Jean Marie Kissick, Patricia Miernicki, Alice Neudorfer, Patricia Peterson, Jean Rickert, Dorothy Snyder, Doris Sutherland.

Step into the Expanding Field of Instrumentation

Automatic control—automation—data reduction; call it what you will, it is all Instrumentation, and it offers some of the broadest and most satisfying careers available to today's engineers and scientists.

Atomic energy, iron and steel, aircraft and automobiles, chemicals and chinaware, petroleum and electric power are only a few of the many industries which need instruments. This need creates permanent opportunities in many of our operations, including research and development, product engineering, industrial engineering, production, inspection, market development and customer contacts.

The products with which you would be concerned include automatic, high-precision instruments for controlling, recording and indicating temperature, chemical concentration, radiation phenomena, frequency and load and many other conditions. For heat-treaters we make furnaces and process equipment. For the worker in science—whether student or researcher—we make both automatic and manual laboratory-type instruments, with which you may already be familiar.

The Company has about 3000 people—is one of the biggest in its field, yet is compact enough for you to be able to "follow the score". Its reputation for progressiveness in industrial relations, and for quality of product, is world wide. There are branches in 18 U.S. cities, and manufacturing affiliates or agents in all other industrial countries where American firms may operate.

Charles J. Minich of L&N will be on the campus sometime during the next week, with information which he will cordially share about our very modern opportunities and rewards for engineers and scientists. Your placement bureau will arrange an appointment with Mr. Minich, at your request.
