

2 Water Towers Hold 1.25 Million Gallons

A water storage capacity of 1.25 million gallons may seem a lot, but it would last but one day if the University's water supply were suddenly cut off.

The new water tower constructed in Hort Woods helps give the University this water storage capacity.

The tower, now getting the finishing touches from the painters' brushes, holds 750,000 gallons. The other water tower, located beside Beaver Field, holds 500,000 gallons.

Most of the University's regular water supply comes from four wells located on the University's Thompson farm, behind the National Guard Armory. Water is pumped from these wells through about 13 miles of underground pipes.

Second Water Source

The University's other water source, which supplies the Power Plant, is a dam at Musser Gap, about five miles south of campus. The water flows down to the University by force of gravity.

The water tanks, besides serving as an emergency supply, also act as "floaters," according to David R. Gifford, physical plant employee.

This means, he said, that when more water is being consumed than the wells and the dam can supply, water is then automatically taken from the tanks.

Refilled at Night

The tanks are then refilled at night, thereby keeping a 24-hour supply on hand at almost all times, Gifford said.

The water pumped in at night is secured from the farm wells.

Gifford said that he sees no danger at present of the University running out of water, but said the water shortage supply will have to keep progress with increased enrollments.

Both water tanks are elevated. The one at Beaver Field is enclosed in brick work, while the new one in Hort Woods is not enclosed.

Final Course Changes

Saturday is the last day courses may be dropped.

Students who want to drop courses should obtain drop-add forms in the basement of Willard Hall.

Finances May Stop Expansion

Finances pose a top problem in planning for future expansion at the University, according to a report given Wednesday at a dinner meeting by Eric A. Walker, dean of the College of Engineering and Architecture.

The University now operates on an annual budget of about \$30 million, he said. One-third of that amount comes from the state, one third from students, and one-third from the federal government.

More Funds Necessary

To keep up with services and work already under way, additional funds are necessary, Walker said. Without them, some retraction may be necessary, he added.

As it is, a 25 per cent boost in the staff and a 20 per cent increase in the pay scale would be necessary to keep up with standards of other institutions.

Expansion Seen at Centers

How much of the future growth will be on campus? Walker reported that it is possible that much of the expansion may have to be handled through University centers.

According to another report heard at the meeting, the increasing University enrollment may bring about a 7000 population increase in the borough.

\$500 Scholarship Open in Audiology

Application forms for the Delta Zeta Sorority Scholarship, to be awarded for study in audiology or an allied field, are available in the dean of women's office.

The \$500 scholarship is open to either graduate women or undergraduate women with junior or senior standing.

Applications should be submitted by April 15.

University Graduate Killed in B-50 Crash

Michael Spock, a 1952 graduate in meteorology from Sagon, was killed Wednesday in the crash of a B-50 near Dayton, Ohio.

He was employed with the Illinois State Water Survey Board and was on a reconnaissance flight for the Board when the plane crashed.

Chem-Phys Names 72 To Dean's List

Seventy-two students of the College of Chemistry and Physics have been named to the Dean's List for the Fall semester. Eleven of these completed the semester with perfect 4.0 averages. An average of 3.5 is required for the Dean's List. Named were:

Seniors: Michael Chaykovsky, 4.0; Stuart Jones, 4.0; Albert Moore, 4.0; Robert Merrell, 3.87; William Schwarz, 3.85; Vladimir Korba, 3.82; Charles Morgan, 3.82; Joseph Steim, 3.82; Paul Streng, 3.76; Ronald Stone, 3.73; Robert McMillan, 3.66; William Lennarz, 3.62; Mary Leslie, 3.62; Paul Simonetti, 3.58; Catherine Courtney, 3.57; Jean Haegle, 3.57; George Riffle, 3.56; Jerome Roth, 3.52; Lewis Patterson, 3.5; Francis Wachter, 3.5.

Juniors: Charles Anderson, 4.0; James Anderson, 4.0; John Anderson, 4.0; Muriel Moldawer, 3.72; Peggy Brown, 3.68; Ira Wasserman, 3.59; Joseph Eberly, 3.56; Herbert Hubacher, 3.56; Allen Davies, 3.55; Richard Gibbons, 3.55; Sheldon Amsel, 3.52; James Ifft, 3.52; Tracy Green, 3.5; Harrison Hoppes, 3.5.

Freshmen: David Schleicher, 3.84; Rugh Henderson, 3.83; Donald Shiffler, 3.83; Ronald Thomke, 3.83; Richard Armen, 3.72; Lawrence Spece, 3.72; John McArthur, 3.7; Joanne Walbert, 3.7; Donald Zepp, 3.67; David Stelman, 3.65; Radan Sumantri, 3.64; Joel Balogh, 3.63; Richard Simmermacher, 3.63; Richard Klingler, 3.61; David Goldstein, 3.56; Marilyn King, 3.52; William Nutting, 3.51.

Psychology Test Results

Students who took the Psychology tests during Orientation Week may obtain the results of their tests. Those interested should make an appointment at the Student Advisory Service, located in the back of Womens' Building.

Desk Tops Of Plastic Requested

Wholesale damage to seat arms in Willard Hall classrooms has caused Ray V. Watkins, University scheduling officer, to request plastic arm writing surfaces for seats in the Hall of the Americas building which is under construction.

Watkins released figures showing 57 per cent of seat arms in Willard damaged, making the surface unusable for writing.

Names Carved in 'Arms'

"This has been caused," he said, "by students carving fraternity names and first names in the arms."

Of 1015 seats in the building, 579 are damaged, according to figures. Highest percentage of damage is in 215 and 317 Willard. There are 35 seats in 215, 28 are damaged for an 80 per cent damage toll. Of 77 seats in 317, 59 are damaged for a 76 per cent toll.

The building is five years old.

Plastic is Harder

Watkins made the request for plastic arms in the new classroom building because he felt the plastic tops would resist destruction by pen knives more than the wooden tablets now commonly used in University classrooms.

Walter Weigand, director of the department of physical plant, said yesterday Watkins' request would be taken under consideration.

The Hall of the Americas building will be constructed adjacent to the University Hospital. Weigand said the University hopes to have the building finished by fall of 1957.

Panhel Council Declares Poster Contest Winners

The winners of the poster contest sponsored by Panhellenic Council to promote the IFC-Panhel Ball are Alpha Omicron Pi, first place, Alpha Gamma Delta, second, and Delta Delta Delta, third.

The posters were judged by Yar G. Chomicky, assistant professor of art education.

Each sorority was to have submitted one poster but 10 sororities failed to enter any.

University Repairing Damages

Physical Plant workmen are completing the repairs to University property necessitated by the heavy storm last Saturday.

Most of the damage was to roofing, caused by the high winds accompanying the storm, according to Charles A. Lamm, head of the division of building maintenance and operations.

Total damage was estimated by Lamm at \$400.

22 Dorms Damaged

About 22 dormitories in the Nittany-Pollock area, six homes at Eastview Terrace, and a barn had damaged roofing as a result of the storm.

A large plate-glass window on the second floor of Burrowes building was broken during the storm. The 30-inch-by-6-foot window apparently was not completely latched and slammed against the brick casing of the building, Lamm said.

A replacement has been ordered, he said.

Other Projects Planned

Planned projects for the building maintenance and operations division, according to Lamm, include painting the majority of the interior of Agricultural Education building and minor plumbing and electrical changes to the building formerly known as the Pollock Union Building.

The PUB, as it was known, has been used for engineering research.

'Hubzapoppin' Replaced By Rec Hall Coverage

"Hubzapoppin" radio show will not be broadcast by station WD-FM tomorrow night due to the conflicting sports events in Recreation Hall.

The show will be presented next Saturday night in conjunction with the sophomore dance. It will be broadcast from 7:30 to 8 in the Hetzel Union assembly hall.
