## Cypriot Governor Sleeps on Bomb

NICOSIA, Cyprus, March 21 (AP)—A time bomb was found today between the mattresses of Gov. Sir John Harding's bed. It is believed he slept on the bomb last night.

A servant found the bomb during a routine search. It was carried from the governor's residence and exploded safely. Harding meanwhile had gone off to Famagusta, unaware of the incident.

Security forces began searching for a young Greek Cypriot, a member of the Government House staff, who was reported missing. He joined the staff six months ago and now is suspected of being a member of the terrorist Eoka rebel movement.

Authorities were trying to find out how the bomb could have been smuggled through the ring of armed troops, armored cars and military police guarding Government House on this tense island.

## Westinghouse Employees Go Back to Work

PITTSBURGH, March 21 (AP)—Westinghouse Electric Corp.—with a 156-day strike by its biggest union ended—ordered full speed ahead today in production of 1956 models of its home appliance line. Workers—wary of payless pay-days—readily responded.

Full-scale production of heavier equipment used in the electric utility industry will be slow reaching normal.

The company said it had no estimate how many workers were called back today. But the total was sizeable.

The long dispute, dating back to Oct. 17 and a fight over wages, length of contract and company efficiency programs, ended in Washington last night.

The union ordered its 44,000 members back to work at 30 plants. The company issued immediate work calls for some but said others will be delayed.

## Industrial Development Plan Passes Senate

HARRISBURG, March 21 (AP)—Senate Republicans and Democrats joined forces today to pass, 45-2, a \$5 million industrial development program for Pennsylvania's depressed areas.

The bill, one of the prime objectives of Gov. Leader, was sent to the House.

The bill would set up an 11-member industrial development authority headed by William R. Davlin, secretary of commerce.

The authority would concentrate its efforts in the economically hard-hit areas of the state as a means of increasing employment.

## Kefauver Gains With Stragglers

MINNEAPOLIS, March 21 (AP)—Stragglers counts on Estes Kefauver's crunching, upset victory over Adlai E. Stevenson in the Minnesota primary packed added voting power today into the Tennessee senator's drive for the Democratic presidential nomination.

Kefauver not only won the state, with the deck stacked against him, but also walked off with 26 of 30 votes pledged to him at the Democratic National Convention starting Aug. 13 in Chicago. That was two more than he had last night at his hour of triumph.

From the debris of defeat, Stevenson salvaged only two sure votes at the convention.

### News, Views Staff to Meet

News and Views staff and candidates will meet at 6:45 tonight in 14 Home Economics.

## U.S. Offers Plan For Disarmament

LONDON, Thursday, March 22 (AP)—The United States proposed last night opening up of 30,000 square miles of Russian and American territories for a test of disarmament controls.

A few hours later, the British and American governments announced that the Russians have started a new series of nuclear tests.

The new blasts presumably were carried out in a Siberian wilderness.

They coincide with a meeting here of the five-power UN Disarmament subcommittee and a high pressure Soviet campaign for friendship with Britain.

# QUEHANNA

... a great research center for the future... YOUR future

JUST 47 MILES FROM PENN STATE IS ONE OF THE WORLD'S MOST ADVANCED RESEARCH CENTERS: QUEHANNA, PA. . . . AN OUTSTANDING ENVIRONMENT FOR THE ENGINEERS OF TOMORROW.

Quehanna, Curtiss-Wright's 85-square-mile research and development center here in the Alleghenies, offers challenging and wide-ranging career opportunities in aerodynamics, electronics, nucleonics, plastics, ultrasonics, metallurgy. Just a short drive from Penn State, Quehanna brings together specialized engineering talents and unparalleled experimental and laboratory facilities, for research in today's most advanced scientific fields. Curtiss-Wright has faith in today's most advanced scientific fields. Curtiss-Wright has faith in the future—your future—and proves it with this new location that gives you greater opportunities to grow and advance quickly.

YOUR EDUCATION IS OUR BUSINESS. Curtiss-Wright looks to Penn State graduates to fill many of its top engineering positions. We are working with administrative and faculty members right now, developing a special postgraduate course at the Research Center. Plans are also being made for study tours to Quehanna for Penn State engineering students.

KNOW MORE ABOUT CURTISS-WRIGHT. Contact Mr. George N. P. Leetch, University Placement Service Director, who will make an appointment for you with one of the Curtiss-Wright Representatives when they visit the campus March 23. Or, at any time, call Alfred E. Lewis (Penn State '32), Curtiss-Wright Industrial Relations Manager, at Frenchville 2401. Mr. Lewis will welcome the chance to talk about your present engineering ideas and your career plans for the future.

Quehanna, Pa.
