

Pollock Council Court Backs-- Appropriates Dance Money

Pollock Council voted Tuesday night to appropriate \$100 for a dance to be held May 18 in the Hetzel Union ballroom. The Association of Independent Men's band will play for the dance.

After a short debate, Council voted to restrict the dance to couples only. To enforce the restriction and avoid congestion at the entrance of the ballroom, two campus patrolmen will be present.

The dance will be open to the public. Admission will be free.

The Council's new constitution was ratified when dormitories nine and 10 passed it, supplying the needed three-fourths majority. Dormitories three and six still have not voted on the constitution.

David Cummings, junior in business administration from Blakely, resigned from the Council to accept an appointment as dormitory counselor.

Jerome Lynn, freshman in Home Economics from Moscow, was appointed representative at large to fill the vacancy on the Council.

Court Backs--

(Continued from page one) vote. He added that it was likely that many students split their tickets and thus their right to vote was not abridged.

"Students Should Judge" To Beidler's argument Spadaro commented, "If the Elections Committee considered these actions illegal then they should not have assumed judgment for the entire student body." He felt that the students themselves should have judged the Lion party actions.

Dye mentioned the fact that the Elections Committee had also said that they had no other recourse than to penalize the Lion Party. He said he felt that this point was irrelevant to the case and that he agreed that the political parties should be controlled in some way but he also felt that this method should not include unconstitutional means.

Correction

A 29 man Air Force Reserve Officer Training Corps Trick Drill Team placed seventh in competition at the annual Cherry Blossom Festival in Washington and not third as reported in yesterday's Daily Collegian.

3 Fraternities --

(Continued from page one) University for graduation. Among the 54 fraternities at the University, Delta Tau Delta was 52nd, Pi Lambda Phi was 53rd, and Pi Kappa Phi was 54th.

Delta Tau Delta, with 44 members, had a house average of 1.99; Pi Lambda Phi, with 10 members, had a house average of 1.95; and Pi Kappa Phi, with 49 members, had a house average of 1.94.

The average for fraternity men and for All-University men the past semester was 2.30.

It is believed that no fraternity has ever previously been put on probation due to scholastic difficulties.

Love, Poetry--

(Continued from page one) The skipper, Capt. N.D. Gage, Newport, N.H., wired back: "Comprehend your yen. Can give you but ten, On the 23rd to end."

Yesterday, Nicholas declaimed the "love as ne'er before," but he seems to have taken an interest in Mamie Fehnel, junior in home economics from Nazareth. They deny any but the "usual" spring-time romantic attachment.

AIM Positions --

(Continued from page one) sible, of living areas inhabited by an equal number of men and women; to provide, where possible, common dining halls for men and women; to provide joint outdoor recreation areas, and to formulate this policy in such a manner as to meet the administration's approval.

The committee has also sent letters to other universities about reportedly similar programs to this one.

Crafts said he favored AIM's plans for three reasons:

1. It is a more natural relation-

ship in the integration of men and women students.

2. This is the only "genuine" way the University can make progress on improving manners, customs, mores, and other traits.

3. Shy and bashful students, both men and women, would receive more benefits.

Rejects 'Utopia' Idea If the plan does eventually become effective, Crafts said, one "cannot expect utopia overnight." He said things would be "rather chaotic for a spell."

But with the proper instruction, emphasis by student leaders, the faculty and administration, the responsibilities of such a program could be learned and abided by, Crafts said.

Alpha Nu to Hold Planet Observation

Members of Alpha Nu, astronomical society, will operate telescopes and answer questions for anyone interested in viewing Venus and Jupiter from 7 to 9 p.m. tonight and tomorrow at the observatories.

Venus, which will show the half phase, will be the object of the telescopes during the first half of the period. Today it is at its greatest eastern elongation, and sets four hours after the sun.

Dr. Carl A. Bauer, assistant professor of physics, explained that Venus is the brilliant white object that can now be seen in the western sky after sunset.

CLASSIFIEDS

RATES 17 words or less: \$8.50 One Insertion \$9.75 Two Insertions \$1.00 Three Insertions Additional words 3 for .65 for each day of insertion.

FOR SALE PLAY SAFE! Go home with good tires—400x16, less than 2000 miles on them. 2 for \$15. Call AD 7-3155.

SEAT COVERS for all cars, 20% discount. Free installation. Sample patterns available. Call Al Fine AD 7-7732.

CAMPUS AUTO SALES, 234 E. College Ave., across from HUB. The best Used Cars in town. Catering to Penn State faculty and students. We buy—sell—trade. Cash for your car. AD 8-6711.

WHEN YOUR typewriter needs service just dial AD 7-2482 or bring machine to 633 W. College Ave.

Where do SENIORS go from here?

RESEARCH! ENGINEERING! PRODUCTION! SALES! ADMINISTRATION!

How about... OWENS-CORNING

FIBERGLAS!

Let's talk about a career for you with one of America's most dynamic "growth industries"—glass fibers! Owens-Corning Fiberglas*, pioneer and leader in the field, is not even as old as you—yet Fiberglas has already established itself as a major commercial material whose importance to our economy grows every year!

Fiberglas' unique combination of properties is unobtainable in any other known product. Hundreds of millions of dollars worth of Fiberglas materials are now being used each year in thousands of new, different ways for thermal insulation, sound control products, air filters, industrial and decorative fabrics, and plastics reinforcements... and many more uses are on the way!

Will you be among the next group of Fiberglas trainees? An exciting, challenging job awaits you in one of these fields:

- Research • Product Development • General Engineering • Plant Engineering • Industrial Engineering • Manufacturing • Production Planning • Quality Control • Process Control • Sales • Purchasing • Cost Control • Accounting • Personnel

See your Placement Officer today—arrange to meet the Fiberglas Representative on campus

APRIL 19

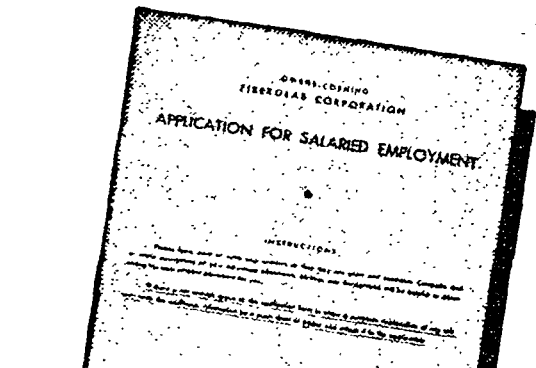

He'll interview for each of the corporate classifications listed above. Learn the impressive benefits of a Fiberglas job!

What does this mean to you? It's obvious... the continued growth of Fiberglas demands the constant addition of personnel with outstanding leadership potential. Fiberglas needs men with character, imagination, zest for getting things done... men who enjoy facing and whipping tough problems. Selection will be made from able men with training in mechanical, electrical, industrial, civil, architectural, chemical, ceramic and general engineering... as well as their fellow students in business administration and selling.

Join us this summer or fall! You'll spend six months to a year in general Fiberglas training. You'll locate in one of our seven plants or 60 offices throughout the United States... work on specific assignments with different departments... familiarize yourself with company background and history... learn processes, products and general methods of Fiberglas operation. Additional instruction programs geared to your individual development will supplement this on-the-job training.

Within a year you'll be "on your own," working for Fiberglas in your chosen field... growing with other graduates of years past in an interesting and exciting job with unusual opportunities.

Fiberglas also is offering stimulating summer project work for undergraduates and faculty members.
