

Dulles Asks Free World To Restrain Communism

PARIS, May 4 (AP)—Secretary of State John Foster Dulles today called on the free world to marshal its vast moral and material resources in a new 10-year program for holding back communism.

Dulles told his 14 fellow foreign ministers of the North Atlantic Treaty Organization that the West has checked Russia's advance at this juncture in world history.

But Dulles declared that the Atlantic communist now must map out a program for the next decade to counter the Kremlin's new soft tactics and win over to freedom the uncommitted peoples of Asia, Africa and the Middle East.

He said that if the free world stands firm, it could foster an embryonic trend toward liberalism now discernible in the Soviet Union.

Dulles warned that if Russia's trade-and-aid offensive in the underdeveloped countries succeeds then the ratio of peoples under Communist rule might shift from the minority to the majority.

Dulles proposed creation of a committee of two or three Atlantic Pact ministers to work out practical ways for strengthening NATO in the political and economic fields. This committee would report back in the fall to the Ministerial Council.

Diplomatic informants said Dulles indicated previously some willingness to serve on the top-level study committee.

Dulles spoke twice to the opening day meeting of the Atlantic Council which is urgently considering ways to pep up NATO and meet the switch in Soviet tactics.

Summaries of Dulles' speeches before the closed sessions were made available to reporters. Texts were not released.

France's Foreign Minister Christian Pineau laid before the Council a plan for creating a new world economic development agency. It would operate within the framework of the UN and help underdeveloped countries.

The agency would make outright grants, five long and short term loans and buy surplus production of needy countries.

Cease-Fire Pledge Fires Arab Spat

ROME, April 4 (AP)—Bickering broke out between Arab allies today over cease-fire pledges made to U. N. Secretary General Dag Hammarskjold.

This developed as Hammarskjold was in Rome completing a report to the Security Council on his Middle East peace mission.

Hammarskjold leaves for New York by air tomorrow. Prospects are that Security Council members will take a few days to study the report of his 25-day mission and meet in about a week. Only then will the world know the precise pledges made by Israel on one side and Egypt, Jordan, Syria and Lebanon separately on the other.

Today's inter-Arab spat was short-lived but revealing. Lebanon accused Syria of betrayal by granting a cease-fire without a written Israeli promise not to divert irrigation waters from the Jordan River.

CAA Frowns On Segregation

WASHINGTON, May 4 (AP)—The Civil Aeronautics Administration announced today it will not make federal funds available for construction of any airport facilities in which racial segregation is practiced.

The CAA said the order does not necessarily apply to whole buildings but only those portions—such as dining rooms or rest rooms—in which there might be discrimination as to race, color or creed.

"The purpose and intent of the policy," the CAA said in a memorandum to field offices, "is to prevent the use of federal funds to further or increase racial segregation in airport buildings."

2 Treason Laws Vetoed by USSR

MOSCOW, May 4 (AP)—The Soviet Union has repealed two laws of Joseph Stalin that helped secret police get treason and sabotage confessions for the purge trials of the 1930s.

The bulletin of the Supreme Soviet Parliament revealed this in an issue that came into the hands of Western correspondents today.

It published a decree of the Soviet's Presidium that nullified the two laws and forbade the police to use "special procedures" in investigating persons accused under the articles of the criminal code on treason, terrorism and damage of state property by sabotage.

Both laws were promulgated by Stalin, one on Dec. 1, 1934, and the other on Sept. 14, 1937.

3 Shot in School Fray

SEAT PLEASANT, Md., May 4 (AP)—Reprimanded for failing to turn in a written assignment, a 15-year-old boy killed one teacher by rifle fire today and wounded two others in a junior high school. The school was cleared of students and closed for the remainder of the day.

Reading YMCA Camp

Wernersville, Pa.

Will Interview Saturday, May 5

openings for a camp pianist, arts and crafts man and general counselors. Sign up in advance at the STUDENT EMPLOYMENT SERVICE.

What young people are doing at General Electric

Young chemical engineer works on new ways to make silicones

Silicones are a new class of man-made chemicals with very unusual properties. Made from sand, they assume the form of rubber, grease, oil and resin. Under extremes of heat and cold, the rubber stays rubbery, the oil oily. Silicones added to fabrics make them exceptionally water-repellent. Silicone makes waxes spread easier . . . paints almost impervious to weather.

One of the men responsible for finding new ways to produce silicone products is 26-year-old Frank V. Summers.

Summers' Work Interesting, Important

As process engineer of the Silicone Products Department, Frank Summers first compares the results of small-scale, pilot-plant experiments with the production methods in actual use. Then, using his own knowledge of chemical-engineering principles, he designs faster, more efficient and more economical methods of producing silicone products. Frank Summers' excellent training, diversified experience and outstanding personal qualifications make him a valuable contributor to this engineering team.

25,000 College Graduates at General Electric

When Frank Summers came to General Electric in 1949, he already knew the kind of work he wanted to do. Like each of our 25,000 college-graduate employees, he was given his chance to grow and realize his full potential. For General Electric has long believed this: Whenever fresh young minds are given the freedom to make progress, everybody benefits—the individual, the company, and the country.

Educational Relations, General Electric Company, Schenectady 5, New York

FRANK V. SUMMERS joined G.E. in 1949 after receiving a B.S. in Chemical Engineering at Iowa State University the same year. He also graduated from G.E.'s Process Technology program and other specialized courses.
