

IFC to Open Workshops With Nine-Point Program

The Interfraternity Council workshop program will begin tonight with nine workshops, including one on pledge class administration added to the program this year.

A number of executive secretaries of national fraternities represented on campus will attend the workshops, according to chairman Robert Nurock.

The secretaries of the national fraternities on campus were invited to attend. Nurock said he is "very pleased" with the number of acceptances, which he believes, warrants continuation of the idea next year.

Another new feature of this year's program will be the referral of workshop recommendations to IFC for action, Nurock said.

To Meet for Dinner

The representatives from each fraternity will meet tonight for dinner at the house where their workshop will be held. The workshops will meet at 7 p.m. tomorrow at the same fraternities.

The nine workshops and their chairmen and meeting places are: house managers, Robert Bookman—Phi Gamma Delta; pledge-masters, Joseph Boehret—Pi Kappa Alpha; pledge presidents, William Coale—Sigma Nu; house presidents, Joseph Fox—Phi Sigma Kappa; public and alumni relations, John Spangler—Delta Chi. Phillabaum to Chair Rushing.

Rushing, Leslie Phillabaum—Acacia; scholarship and activities (combining two of last year's workshops), Peter Hirsch—Phi Sigma Delta; social chairmen, Richard Coolbaugh—Chi Phi; and treasurer, Richard James—Sigma Alpha Epsilon.

Judge Frank H. Myers, of the Municipal Court of Washington, D.C., will speak Thursday night at the banquet concluding the workshop program, at the Nittany Lion Inn.

The program at the University is one of the few in the country which is conducted separately from Greek Week, according to Nurock.

Council to Hear NSA Report

The Education Student Council will hear the second part of a report by Katherine Dickson, vice president, on the convention of the National Student Association at its meeting at 7:30 tonight in 203 Hetzel Union.

The first half of the report explained the workings and background of NSA, while the second half will deal largely with ideas which might prove useful to the council.

Final plans for the election of two freshmen representatives will also be made. Freshmen may still place their name on the ballot by submitting a nomination blank and a wallet sized picture of themselves before 5 p.m. Friday. Nomination blanks may be obtained at 109 Burrowes and Hetzel Union desk.

Restaurant Association To Hear Assistant Prof

Richard M. Bower, assistant professor of hotel administration, will speak on "Training Food Executives" today at the annual meeting of the Pennsylvania Restaurant Association at Bedford.

A number of senior hotel administration students will accompany Bower to the meeting.

Broadcasters Seek Support of Students In Eastern Europe

Reverberations of unrest among Eastern European students behind the Iron Curtain reached campus yesterday through a telegram from Radio Free Europe to Michael Moyle, editor of The Daily Collegian.

The wire asked for an expression of support from Moyle and Robert Bahrenburg, all-University president for goals being sought by students in Red Hungary.

Among the goals listed as being demanded by the students are freedom of the press and travel, importation of Western literature, abolition of courses in Marxism-Leninism, and restoration of the independence of their universities.

Moyle said last night that he and Bahrenburg are preparing a reply to the telegram, sent by Leslie Whitten, Radio Free Europe newsroom chief.

Whitten said the radio is anxious to include the message in broadcasts tomorrow to Hungary and Poland.

Plant Science Club Will Meet Tonight

The Plant Science Club will meet at 7:30 tonight in 111 Plant Industries.

Dr. Clifford C. Wernham, professor of plant pathology, will speak on "Pictorial Highlights of a Visit to South America."

Quarles to Serve As Army Adviser

Dr. Gilford Quarles, director of the Ordnance Research Laboratory, has been granted a leave of absence to serve as Scientific and Technical Advisor to the Commanding General of the Army Ballistic Missile Agency at the Redstone Arsenal in Huntsville, Ala.

The Agency was established last February to centralize

the work of the Defense Department's top-priority program—the development of the pioneering Redstone shortrange missile and the 1500-nautical-mile Intermediate Range Ballistic Missile recently designated as JUPITER.

The Commanding General of the Agency is Maj. Gen. J. Medaris. Although the size of the Agency is not disclosed, the nucleus of the development consists of over 100 scientists brought to the United States in 1945 from the German Peenemuende Project. The group is headed by Dr. Wernher von Braun, the genius behind the V-2 rocket.

As adviser to General Medaris, Dr. Quarles will serve as an administrator "troubleshooter" for the technical aspects of the program.

In this position, he will continuously review the entire program to anticipate problems and to suggest methods of solving them;

to recommend changes in the scope, objectives, and direction of major projects; to evaluate specific proposals and over-all progress; and to advise the commanding general on the technical statures of the program.

Joined Faculty in '45

Dr. Quarles joined the faculty in 1945 as associate professor of engineering research and was later promoted to professor of engineering research and assistant director of the laboratory. He was named director in 1952.

After receiving his B.S., M.S., and Ph.D. degrees at the University of Virginia, he taught physics at Mercer University, the University of Alabama, and Furman University. He joined the staff of the Harvard Underwater Sound Laboratory in 1944, where he was head of the department of physics.

Dr. Quarles expects to assume his new duties Nov. 1.

Mishap Rate Of Borough Decreases

The State College Borough's motor vehicle accident rate shows an 18 per cent decrease for the first nine months of 1956 as compared with that of the previous year.

According to an accident statistics report released by David R. Mackey, State College burgess, there were 120 accidents resulting in 43 injuries during the period between Jan. 1 to Sept. 30.

146 Accidents Reported

During this same period in the previous year 146 accidents were reported which resulted in 45 injuries.

The above totals comprise all accidents in the Borough that were reported by the vehicle operator or those investigated by the police.

Mackey reports that the accident record for this year is good but it could be better and the only way that will be accomplished is if the operators of all vehicles practice being courteous to each other.

Speaks on Enforcement

He said the fact that stricter enforcement is used does not always mean that the number of accidents will decrease.

The police request that all drivers, students and citizens, bear in mind that the Borough has maintained a perfect non-fatality record for 9 years and are now in first place in Group IX, in the National Safety Council Contest.

Eng Council Group To Meet Tonight

The Engineering and Architecture Student Council will meet at 7 tonight in 217 Hetzel Union Building.

The council will discuss the question of the extension of the Christmas vacation which was brought up at last week's Cabinet meeting.

Freshmen in engineering and architecture may nominate themselves for council seats by signing their names on the lists posted in the Main Engineering, the Hetzel Union Building, and individual department bulletin boards.

History Round Table To See Wilson Film

A film entitled "Woodrow Wilson; Spokesman for Tomorrow" will be shown by the History Round Table at 7:30 tonight in 217 Willard.

Following the film Everette Swinney, president, will conduct a discussion.

Students and faculty may attend.
