

7 Colleges Will Begin Frosh Elections Today

By MARIAN BEATTY

Elections of freshman representatives to seven college councils will open today. Elections will be held for all councils except the chemistry and physics and agriculture councils. Representatives to the chemistry and physics council will be elected next week. Members of the agriculture council are chosen by the University agriculture clubs. Each college will post the names, activities, and photographs of candidates by the

ballot box. Students will be required to show their matriculation card before voting.

The College of Education and the College of the Liberal Arts will hold elections jointly today and tomorrow on the Mall in front of Sparks Building. In case of rain, voting will take place in the lobby of Sparks Building.

Candidates for the education council are:

Paula Alexander, Mary Becker, Ruth Braund, Phyllis Breich, Ellen Butterworth, Nancy Truchel, Rosabelle Kitzwiller, Mary Luckett, Joan MacDowell, Theresa Myerson, Sherry Parkin, Serena Rashid, Rita Richards, Loretta Ryzinski, Marjorie Seawall, and Suzanne Wyttenbach.

Nominees for the liberal arts council are:

Barbara Beemer, Barbara Benner, Lawrence Brody, Wayne Burke, Nancy Clark, David Epstein, Mary Helms, Susan Reen, Georgeann Boll, Barbara Stark, Aileen Seidman, Judith Stock, and Sara Swing.

Elections for the College of Home Economics will be held in the lobby of the Home Economics Building today and tomorrow.

Candidates are:

Patricia Collie, Winifred Grobe, Doris Grosh, Gerry Hartman, Judith Hecker, Suzanne Keener, Barbara Krzynowek, Shirley Myers, Carol Plosch, Eleanor Rarig, Jean Rosenzweig, Judith Schindbette, Carol Shollenberger, Helen Skade, Nancy Slosser, Anna White, Mary Wood, Patricia Yarger, Judith Zimmerman, and Barbara Martino.

Voting for representatives to the physical education and athletics council will be held today during freshman physical education classes. Candidates are Sara Booth, Elizabeth Corman, and Joan Graham.

The College of Engineering and Architecture will hold elections today and tomorrow during Engineering 1 classes.

Candidates are:

William Rickham, Samuel Green, Theodore Haller, Howard Kinsler, Jerry Knotts, John Lewis, James Macenko, Richard McMahon, Charles McNair, Ronald B. Miller, Vincent Montalto, Robert Phillips, Lee Querry, Stanley Rudzinski, George Steltzer, and Donald Stitzel, majoring in electrical engineering; Lochlan Bey, Mark Chappas, James Fritz, Thomas Galbraith, Michael Kaiser, Clyde Kreeger, Allison Key, John Root, and Im Rosenbaum, majoring in aeronautical engineering.

Lawrence Beighey, Kenneth Hall, and Clarence Rogers, majoring in industrial engineering; Gregory Bean, Laurence Buck, David Choate, Frederick Heal, Wallace Stafford, Floyd Silver, Charles Snyder, and Anthony Straka, majoring in mechanical engineering; Donald Dawson, and Thomas Norton, majoring in agricultural engineering.

Larry DiGiacinto, Harold Gordon, Carmen Rodia, William Simms, Carl Valeri, and John Zatalava, majoring in civil engineering; and Maurice Balling, Charles Barb, Francis Centre, Richard Gallow, Robert D. Moyer, Abba Polancin, and Donald Scott, majoring in architecture and architectural engineering.

Elections of representatives to the mineral industries council will be held today and tomorrow during Mineral Industries 1 classes.

Nominees are: John Beemer, Harry Beans, Michael Bonardi, Harry Chambers, George Mutter, Peter Luckie, Wayne Mason, William Stuchell, and Daniel Stewart.

The College of Business Administration will hold elections today and tomorrow in the lobby of Sparks Building. A list of candidates was not available last night.

Nominations for council representatives to the chemistry and physics council will remain open until Nov. 6. Nomination blanks are available at the bulletin boards in Osmond, Pond, Walker, and Whitmore laboratories. Elections will be held Nov. 7 and 8 in the lobby of Osmond laboratory.

'Chest' Executive Group

The Campus Chest executive committee will meet at 6:30 tonight in 214 Hetzel Union to discuss plans for the annual solicitations campaign to be held Nov. 12 to 16.

Scrolls Clarify Life In Time of Christ

By JANE KLEIN

The Dead Sea Scrolls will present a more accurate picture of the period in which Christ lived, according to Dr. Moses Bailey, professor of Old Testament at Hartford Theological Seminary.

Speaking Sunday in Schwab Auditorium, he cited some of the information obtained from the translation of the Scrolls since their discovery in 1947 in three caves in the Judean desert at the northwestern end of the Dead Sea.

The scrolls from the cave of Wady Qumran contain considerable information of the people who lived between 110 B.C. to 68 A.D., he said.

Scholarly People
These people, thought to be the Essenes, lived a communal type of existence and were a scholarly people, he said.

Jesus and his followers therefore weren't an unusual group as proved by the discovery of the existence of the Essene community, according to Dr. Bailey.

Jesus, he said, is thought to have read some of the books of these scholars but is not believed to have been one of them.

Some scrolls written by these peoples are the Manual of Discipline, which contains disciplinary rules of the community, the Isaiah Scrolls, the War Between the Sons of Light and Darkness, and the Thanksgiving Psalms.

The belief that the divine enlightenment is the source of all good is the most common metaphor in this literature, Dr. Bailey said.

Handwriting Tells Age
He said the age of the scrolls, and therefore the age of the Essene community, has been determined to be that of the time of Christ by the handwriting on the scrolls, the scientific testing of the linen binding, and the discovery of coins and pottery which date to this period in the caves.

The information already translated, and that remaining to be translated may usher in a third reformation, Dr. Bailey said.

The other two reformations, he said, took place in the time of Martin Luther and in the time of the purification of religious beliefs by the Pilgrims and Puritans.

Professor to Discuss 'Professional Fraternity'
Ralph H. Wherry, associate professor of insurance and head of the department of commerce, will speak at a meeting of Delta Sigma Pi, professional business administration fraternity at 7:30 tonight at Phi Sigma Delta fraternity.

His topic will be "The Professional Fraternity."

Two members of the Mountaineer's entourage enriched their short stay in University Park by a visit to a second floor room in McAllister Hall Friday night.

Equipped with cowboy hats and southern drawls, the intrepid students knocked on the door of a room where two coeds were preparing for the Junior Prom.

The appearance of a female at the door did not deter them, and they announced calmly they were looking for a friend.

The mountaineers were met with considerably less than southern hospitality, however. The arrival of a housemother, flanked by a crowd of screeching coeds, caused them to reconsider.

They left quietly, to search for their friend in less hostile territory.

A Mountaineer

—Daily Collegian Photo by Dave Bavar
A DAILY COLLEGIAN photographer caught this strange-looking football fan Saturday in Beaver Field. Students may feel relieved to know he was setting in one of the West Virginia sections and talked with a southern drawl.

2 Mountaineers Tour 2d Floor McAllister Hall

Although West Virginia failed to disrupt the Nittany Lions on the football field Saturday, they did cause some commotion on campus over the weekend.

Two members of the Mountaineer's entourage enriched their short stay in University Park by a visit to a second floor room in McAllister Hall Friday night.

Equipped with cowboy hats and southern drawls, the intrepid students knocked on the door of a room where two coeds were preparing for the Junior Prom.

The appearance of a female at the door did not deter them, and they announced calmly they were looking for a friend.

The mountaineers were met with considerably less than southern hospitality, however. The arrival of a housemother, flanked by a crowd of screeching coeds, caused them to reconsider.

They left quietly, to search for their friend in less hostile territory.

Behind the Parking Ban

Borough Manager Cites Need For Clear Streets

By BOB FRANKLIN

First of a Series

No town with the traffic problems of a 50,000 population city can afford not to keep its streets clear for the free flow of traffic.

This is the primary reason for the 2 to 6 a.m. parking ban which will go into effect Thursday in the fraternity area, Borough Manager Robert Y. Edwards said yesterday.

Containing that borough streets cannot remain a storage place for cars, Edwards cited the recently-distributed 1954 State College Traffic and Parking Survey, compiled by the State Highway Department, which says:

"The primary purpose of a street is, and must continue to be, to provide for moving traffic. When the volume of that traffic is so large as to require full pavement width, then no city can afford to use part of that pavement for curb parking . . ."

Would Create Demand
The ban will create a demand for off-street parking, Edwards said, and will result in the opening of parking lots by persons who would not do so previously because they had no assurance of sufficient business.

The 2 to 6 a.m. ban will help ease parking problems not only during that time, but will result in a general alleviation of congestion throughout the day and especially at night, he said.

Persons who cannot count on an all-night parking space at the curb will take their cars off the streets as soon as they come home at night, he reasoned.

Discussed Last Spring
The parking ban was brought up at a traffic commission last spring, Edwards said. Signs prohibiting parking between 2 and 6 a.m. were erected in many parts of the borough during the summer vacation.

Borough officials postponed enforcement of the ban in the area bounded by Allen street, Beaver avenue, High street, and Irvin avenue to give fraternities time to find off-street parking.

Letters were sent to each fraternity in 1954 explaining the parking situation and suggesting what each house might do to create sufficient off-street parking.

Ban May Be Extended
Edwards said the borough's plans call for banning on-street parking in the town's most congested areas, and extending the ban as the traffic situation and the public demand.

He said the most congested area—the fraternity and rooming districts—is also the section where the problem is the most difficult to solve.

Edwards said the borough will attempt to help any individual or fraternity find space if they are unable to do so on their own. But they must expect to pay a reasonable amount of money for off-street parking, he said.
