

Group Orientation Plan Gets Veto by AIM Board

A recommendation that freshmen from the West Halls area meet in Schwab Auditorium during orientation week to discuss the functions of independent students was defeated last night at a meeting of the Association of Independent Men Board of Governors.

HEc Prof Takes Post In Formosa

Dr. Jean D. Amberson, professor and head of the Department of Home Economics Education, will go to Formosa to aid in the broadening of the home economics teacher education program there.

Dr. Amberson will leave the country after a brief orientation period in Washington, D.C. She will assume her new duties as an adviser to the Taiwan Provincial Normal University on Jan. 1.

Has Several Responsibilities
In her new position, Dr. Amberson will be responsible for the development of the existing home economics program to meet the needs of the island, the improvement of physical facilities, and the development of an in-service program of instruction to upgrade teachers.

She will arrange for professional personnel to conduct the undergraduate degree program, handle the gathering of data about needs to aid in building a sound educational program in home economics, and assist in the interpretation of education for home and family living to lay and professional people.

Similar Program in Formosa
The University has been conducting a similar program in Formosa in the field of industrial education. During the past four years, faculty members have been serving on the staff of Taiwan Provincial Normal University.

This program is sponsored by the International Cooperation Administration.

Marine Band--

Breugnon" by Dmitri Kabalevsky, "Dance of the Spirits of Fire," by Gustave Holst, the finale from "Symphony No. 4" by Peter Tschaikowsky, and "Alma Mater" by Leroy Anderson.

A cornet solo by Charles Erwin of "El Matador," by David Bennett, a marimba solo by John Beck of "Sabre Dance," and a baritone solo by William Jones of "Toreador's Song" from "Carmen" will also be included.

Professor Will Speak On Sociability of Bees

Edwin J. Anderson, professor of agriculture, will speak on "Are Bees More Sociable Than People?" at 7 p.m. tomorrow at Beta Theta Pi fraternity.

Anderson, who teaches courses on bees, will address the meeting of the Agricultural Economics Club.

Ag Service Group to Meet

The World Agriculture Service Society will meet at 7 tonight in 101 Agricultural Education.

Employment Interviews

The following firms will conduct interviews for February graduates and advanced degree candidates who expect to receive degrees during the current school year in the Placement Service office in 112 Old Main:
Dec. 3, Corps of Engineers (U.S. Army): BS, MS: ArchE, CE, EE, ME.
Dec. 3, BS: LA, BusAd. All interested in sales.
Dec. 3, Eli Lilly, BS: IE, ME, EE, ArchE, Acctg, Chem, Bact.
Dec. 3, Reliance Electric and Engineering Co: BS: EE, IE, ME.
Dec. 4, Morris Beasly Co: BS, MS: ME, Met, ChE, EngSci: BS: IE.
Dec. 4, 5, YWCA: BS: Soc, Psyc, HEc, PE Rec Ed, MS: Soc, PE, Rec Ed.
Dec. 4, Spencer Kellogg and Sons: BS: ChE.
Dec. 4, Ohio Oil Co (Research Lab): PhD: ChE, Eng Mech, Phys Chem.
Dec. 4, Chicago Bridge and Iron Co: BS: CE.
Dec. 4, Nitrogen Division of Allied Chem and Dye Co: all degrees: Chem, ChE.

Auto Accident At Intersection Injures Student

Cars operated by Robert Averill, sophomore in engineering science from Strafford, and Thomas Lockhart, truck driver from Lemont, crashed early yesterday morning at the intersection of Burrowes street and Beaver avenue.

Averill was traveling south on Burrowes and went through a stop sign, police said.

Hit From Rear
Lockhart was driving east on Beaver and struck the right-side rear of Averill's car when it was passing through.

Damages were estimated at \$600 to the rear of Averill's car and the front end of the Lockhart car. Averill suffered a nosebleed and a cut lip. James Holderman, a passenger in the Lockhart car, suffered a nosebleed.

Influence of Alcohol
Following the accident, Lockhart was charged with driving under the influence of alcohol before Justice of the Peace Guy G. Mills. He was bound over to Centre County Court and committed to jail in lieu of \$500 bail.

Police said Averill would be charged with failure to stop at a stop sign.

The recommendation was suggested by John Dennis, chairman of the orientation program committee, as part of a four-point plan to improve the orientation program.

Crafts Opposes Plan
William B. Crafts, assistant to the dean of men, said he thought students might be unresponsive to a mass meeting because of the many other activities of orientation week.

Several years ago, Crafts said, a mass meeting to familiarize freshmen with members of the administration was held during orientation week and was very poorly attended.

Wells Hunt, freshman representative to the board from West Halls Council, said he felt meetings held in dormitories encourage better student participation.

Informality Said Good
In front of a large audience such as in Schwab, he said, freshmen are sometimes afraid to ask questions whereas in meetings held in dormitories they feel less conspicuous.

Dennis said although the board defeated the recommendation it does not mean the plan will not be considered when formulating next year's orientation program.

Three Points Approved
The remaining three points in the orientation report were adopted by the board.

They are:
That well informed and capable speakers familiarize freshmen in the Nittany-Pollock area with the functions of independent students.

That the final orientation program for next fall be adopted before April 1 of next year.

That speakers to conduct the program be notified and hold at least one organizational meeting before the end of the spring semester.

Land Grant--

(Continued from page one)
changed since the poll was taken. In his report, Thackrey said that scholarships and other proposals for federal aid to individuals would "not help the colleges and universities themselves very much."

He suggested it would be better to help the schools expand their staffs and facilities to take care of high-caliber applicants already being turned away.

The land-grant schools received their names because the federal government granted them public lands to aid their establishment.

Flies were once regarded as amusing, harmless insects.

Data Being Gathered For Future Satellite

Twenty rockets have been fired into orbits around the earth's equator so that data can be gathered for the launching of the proposed earth satellite, Dr. Homer E. Newell Jr., director of the Washington, D.C., Naval Research Laboratory, said Tuesday night.

Newell, an authority in the field of rocket research and atmospheric exploration, spoke at the final lecture of the fall Graduate School lecture series.

He said over 200 more rockets will be launched during the International Geophysical Year, which will begin in 1957 and continue for 18 months. Rockets already have been launched from Canada, New Mexico, the Pacific Ocean, the Antarctic and Arctic, and Guam, he said.

To Uncover New Facts

During the IGY, Newell said, concentrated studies will be made of the earth, its atmosphere, and the sun to uncover new facts and develop and inter-relate theories.

Describing the rockets, Newell said that they vary in size from giant ones with 250-pound carrying capacities to small ones with only 50-pound capacities. Some of the rockets reach heights of 300,000 feet, he added.

Newell said equipment in the rockets will measure phenomena not measurable from the ground, such as upper atmospheric air currents, the earth's magnetic field, cosmic rays, wind currents, auroral radiations, micro-meteorites, and atmospheric structure.

U.S. Not Alone in Program

The United States will not be the only country to launch satellites, Newell said. Others will be fired from Australia by the British, from northern Japan by the Japanese, and from the Sahara Desert by the French. Russia claims a similar program, Newell said, but no details are known.

By pooling information from these studies during the IGY, scientists will be able to expand

present theories and develop new ones, Newell said, to gain a broader, more comprehensive knowledge of the atmosphere.

United States scientists, working in conjunction with the Army, Air Force, Navy, and several universities, are being supported by a recent congressional appropriation of \$38 million, half of which is being used in research for the satellite.

Three Arrested For Misconduct

Three students were charged with disorderly conduct last weekend for stealing an all-night parking sign on E. College Ave., according to State College police.

They were Edward Datemasch, sophomore in business administration from Gibsonia; John Sid-eravage, sophomore in engineering from Shenandoah; and, Arthur Wilks, sophomore in pre-veterinary from Glassport.

Also arrested over the weekend were:

David Andre, senior in dairy science from Montrose, charged with a traffic violation; John Muntone, junior in education from Shenandoah, charged with exceeding the speed limit in a posted zone and Robert Gellman, senior in hotel administration from Baltimore, charged with failure to stop at a stop sign.

Young Democrats to Meet

The Young Democratic Club will meet at 7 tonight in 105 Willard.

Freshmen and Sophomores Elect their Class Officers

EUROPEAN STUDY TOURS

Summer 1957

INTRODUCTION TO EUROPE SEMINAR

June 20-July 31, 41 days in Europe, \$750.
England, France, Germany, Switzerland, Holland. Study of political, educational, religious patterns.

INTERNATIONAL RELATIONS SEMINAR

June 27-August 15, 49 days in Europe, \$870.
Above countries, plus Austria, Yugoslavia, Italy. Program similar to above with more intensive study of political situation in central and eastern Europe.

Further details will be announced at a meeting at 7 o'clock tonight in the Memorial Lounge of Helen Eakin Eisenhower Chapel.

Folders describing in detail the itineraries and programs will be available December 1.
