STATE COLLEGE, PA., TUESDAY MORNING, DECEMBER 4, 1956

FIVE CENTS

## University Will Study Campus Parking Report

A meeting will be held soon to discuss and clarify a report of the 1954 state survey of parking on campus, according to Walter H. Wiegand, physical plant director.

Copies of the report on the survey, which was made by the State Department of Highways in cooperation with the Federal Bureau of Roads, were received by the University during the past two weeks.

## 2 Students Injured In Car Crash

Richard Moon, junior in business administration from Drexel Hill, today is in satisfactory condition in the infirmary following an accident early Sunday evening on Route 322, 15 miles south of State College.

Three stitches were needed to close a cut on the top of Moon's head. He also suffered an abrasion above the left eye and bruises.

Moon was freshman class president in 1954-55.

James Moyer, sophomore in civil engineering from Annville, a passenger in Moon's car, suffered a sprained wrist. He was treated at the infirmary.

**Skidding Causes Accident**  
The accident occurred when a car operated by Johnston V. Muthersbaugh of Lewistown skidded into Moon's car on a hill, according to police.

Daniel Hackett of Lewistown, a passenger in Muthersbaugh's car, was treated for multiple lacerations of the face at Centre County Hospital in Bellefonte, thirteen stitches were required.

Police estimated damage at \$500 to each car.

**Escapes Uninjured**  
David Edwards, graduate student in education from Wanamie, escaped injury Sunday night when his car skidded and overturned on Route 545 near the Starlite Drive-In.

The car, headed toward Bellefonte, skidded off the left side of the road and landed on its top in a field. Edwards reported the top was smashed but did not estimate damages.

## Walker, Leader Discuss Budget

President Eric A. Walker traveled to Harrisburg yesterday to talk over the University's budget request for the coming year with Gov. George M. Leader.

Although he has not revealed the amount he will ask in the new budget, Dr. Walker has hinted that it will be higher than last year's budget, which was \$25,194,000.

He said he did not want to reveal the amount he is asking this year since the figures may be changed after talking with the Governor.

Most of the additional money in the budget request will be used to increase salaries, Dr. Walker said.

The only specific figure in the budget he has revealed is \$100,000 to be used for research in the humanities.

## Self-Analysis Conducted By Cabinet

At a self evaluation meeting of All-University Cabinet Sunday night the group decided that Cabinet debate could be made more effective by outside study and preparation on the part of the members.

The evaluation meeting was called because of the apparent weak discussion and waste of time that has been present when Cabinet, during the past several weeks, haggled over the Supreme Court.

**Don't Read Agenda**  
One of the biggest problems of Cabinet, one member said, is that most of the members don't know what they're talking about. He said that "it is obvious that some people haven't even read their agenda."

All Cabinet committee reports should be thorough and concrete before being presented on the floor, another member said. All reports, he said, should be ready on the agenda for Cabinet members to study.

**Outlines Future Discussions**  
Robert Bahrenburg, All-University president, explained that one reason for the confusion Thursday night when Lion party presented its Supreme Court plan was that "it was thrown at Cabinet all at once and it was pretty hard to make a decision."

Bahrenburg outlined the events that will probably be on the agenda during the next few months. They include compensations, revision of the Elections Code, exemption of finals for eighth semester students with A and B averages, parking, University bookstore, National Student Association, and air conditioning in downtown theaters.

## Snowball Fights Usher in Winter

Snowballing was the thing on campus Sunday night after Old Man Weather covered the ground with winter flakes during the afternoon.

In the biggest incident, several hundred Nittany-Pollock residents answered a challenge and headed for the West Hall area.

Snowballs cluttered the air for about 15 or 20 minutes.

Other battles reportedly took place elsewhere on campus and around Fraternity Row.

No one was reported injured.

## Spring Week Committee Applications Available

Applications are available for Spring Week Committees starting today at the Hetzel Union desk. They must be returned by Monday. Applicants have been asked to specify their choice of committees.

The report has not been released to the public.

George Britton, of the department's highway planning and traffic division, said Oct. 23 at a public meeting in the borough that the survey shows the campus parking problem to be one of distribution, rather than a lack of spaces.

**Deficiency of Spaces**  
He said the survey discloses a deficiency of spaces at the center of the campus with an oversupply at its edges.

At the forthcoming meeting, officials of the department will explain the survey and answer questions arising from the report.

The report is similar to an outline of a survey of the borough parking problem, which Britton was explaining to a group of townspeople and students Oct. 23 when he referred to the campus report.

The borough survey, which was also made in 1954, cited a "critical area" of parking in the downtown area—bounded by Atherton St., College Ave., Locust La., and Highland Ave. (the alley parallel to and between Beaver and Foster Aves.)

**Heavy Demand**  
The heaviest demand for parking space is within this area, which includes all but two blocks where parking demand exceeds the supply of spaces, according to the borough report.

However, Britton said, a 10 percent traffic increase at a checkpoint on Route 322 to the West since the time of the survey may indicate an increase in the borough's parking problem.

The borough report recommended that additional off-street parking facilities, preferably privately owned and operated, should be constructed to help solve the town's parking problem.

## Advisory Board Posts Open for Applicants

Applications for membership on the Freshman and Sophomore Class Advisory Boards will be accepted at the Hetzel Union desk from noon today until 5 p.m. Friday.

Students should submit a letter of application stating their activities and reasons for wanting to be a member of the board. Sophomores should include their All-University average.

## Court Rules Local Opposition No Basis to Delay Integration

WASHINGTON, Dec. 3 (AP) — The Supreme Court today stood by its ruling that local opposition to racial integration in public schools cannot be made the basis for delaying it.

It did so by rejecting a plea by the school board of Mansfield, Tex., for more time "to solve its problems and end segregation" in the high school there.

Rioting occurred at the opening of the school term last September when three Negroes, acting under the court order, sought admission. The appearance of Texas Rangers ended the disturbance, and at-

orneys for the Negroes announced they were abandoning, for the present, efforts to enroll Negro pupils.

**Court Decision Appealed**  
The school board appealed from a decision by the U.S. Court of Appeals in New Orleans ordering it to proceed with integration in the high school "completely uninfluenced by private and public opinion as to the desirability of desegregation in the community."

The appellate court said the only reason given by the board for refusing to admit Negroes to the school "was its concession to public opinion."

The Mansfield case is the first, in which local sentiment has figured importantly, to

## \$2000 Total Seen For APhiO Drive

By LYNN WARD

Contributions to the Hungarian Relief drive are expected to reach approximately \$2000 when complete totals are in today.

Clothing donations, which Glen Elder, Alpha Phi Omega president, said were "overwhelming" amounting to about five truckloads.

The record marathon held from 10 p.m. Friday until 2 a.m. Saturday on WMAJ was termed "very successful" by Elder. Proceeds from the marathon will total approximately \$1000 when all money is in, Elder said.

**McKee Highest Contributor**  
McKee Hall, donating \$105, was the highest independent group contributing to the marathon. Theta Xi, donating \$75, was the highest fraternity.

Receipts from Red Flag Day, the parking meter campaign for relief drive funds, were about \$300. Elder said several drivers stopped on College Ave. and handed \$10 bills to members of APhiO who were stationed along the street to collect parking meter donations.

Many drivers, he said, donated money but didn't even park on College Ave.

The Associated Services office received approximately \$500 in connection with Austerity Day which was held last Thursday.

**Three Purposes for Money**  
The money received by the service fraternity will be used for three purposes.

A portion of it will be donated to the Red Cross in the State College area to help it meet its quota for the national Red Cross drive for Hungarian relief. The local Red Cross aided Alpha Phi Omega in its drive.

Part of the money will be used by the State College Friends to transport the clothes collected by APhiO to Philadelphia for overseas shipment.

**CARE to Handle Money**  
The remainder of the money is going to be sent through CARE to Hungary for relief work.

All clothing collected during the drive is in the State College Borough Hall. Glen Elder has asked for volunteers to come to the borough hall to help pack and sort clothes. He said a great deal of help will be needed to have the clothing ready to ship to Philadelphia by Saturday, the estimated shipping date.

Women of the State College Friends Meeting will be in the hall this week to direct the packing process. Volunteers are asked to come to the borough hall any day this week.

One of the final donations of the drive was a sports jacket presented to Elder by Louis Armstrong.

## Poisoning Of Trout Questioned

The State Fish Commission is investigating to determine whether ammonia that killed from 175,000 to 200,000 trout in the State fish hatchery and Spring Creek between State College and Bellefonte during the weekend may have escaped from the University's laboratories or sewage system.

T. B. Kneen, head of the utilities division at the University, said samples of sewage were picked up at eight points on the campus Saturday and were turned over to the State Department of Health for analyzing.

**Rink Uses Ammonia**  
He said the ice skating rink is a big user of ammonia but that the rink's facilities are not connected with the University's sewage system but drain into a sump.

William Voigt, executive director of the Fish Commission, said that early investigation indicated that the pollution which killed the trout entered Spring Creek and the hatchery from Thompson's Run, which is near the University.

**Use Geiger Counter**  
The investigators, thinking that refuse may have escaped from the University's nuclear reactor and found its way into the stream, tested dead trout with a geiger counter, but obtained negative results.

They said they will not know for several days the source of the ammonia.

## Fair Weather Puzzles Lion

A notably confused Nittany Lion may be seen taking a stroll in his shorts this morning.

When questioned concerning today's continued clear and warm weather, the Lion philosophically mused, "Variety is the spice of life, I guess."

Yesterday's low was 31 and the high, 45. No cold air is forecast to move into the region today and it will probably be slightly warmer than yesterday.

The low last night was forecast as 45-50 and a high of 55-60 is expected today.

Tomorrow is predicted to confuse the Lion even more by bringing the return of winter with icy blasts that are now moving along the Canadian border.

## Borough Arrests Include 5 Students

Five students were arrested by State College police for traffic violations from Nov. 13 to 28.

William Wertman was arrested for driving too fast for conditions, and Robert Avрил, Robert Gellman, and Wendell Lowry were arrested for driving through stop signs.

James Gehris was arrested for reckless operation.
