

Intra-Squad Tournament To Decide Mat Berths

12 Fraternity Boxers Cop Wins

With the opening of the 1957 wrestling season only nine days away, coach Charley Speidel is in the process of conducting his annual intra-squad wrestling tournament from which he bases his first team selections.

The tournament is run on an elimination basis and the winner of each division becomes the top man in his weight class.

However, once a man reaches the top rung in his class, it does not mean that he will remain there. If he is defeated two out of three times by another opponent, his foe then becomes the head man. Through this system even a letterman can lose his spot on the first team.

The biggest problem which faces Speidel is in the upper weight divisions where experience is as common as a man from Mars. None of the top 13 prospects in the four upper weight classes have any varsity experience.

In the 157-pound class sophomores Ed Krufka and Bill Labone, and senior Fritz Clayton are the leading candidates. Krufka is a younger brother of last year's co-captain Joe Krufka.

In the 167-pound category sophomores George Gray and Rox Carl, and seniors Ed Phelan and Chuck Davenport top the list.

Two sophomores, Bob Berberich and Henry Norwood are the best possibilities in the 177-pound class.

The heavyweight division is wide open with seniors Sam Markle and Bob Gardner, junior Dan Revie, and sophomore Dick Jenkins in the running for the starting berth. Jenkins, however, is ineligible at the present time but is expected to be ready later in the season.

In the lower weight class it is a different story for no less than four starters return.

Co-captain Sid Nodland leads the 123-pound class with junior Tom Kessinger, sophomore Joe Cramp, and senior George Smith also in contention.

Junior Johnny Johnston, the 130-pound 1955 Eastern champ, is competing with senior Hal Byers and sophomore Don Peters for the 130-pound spot.

At 137 pounds, Speidel will be able to choose from John Pepe, a two-time letterwinner, sophomore Dean Seltzer and juniors Wilson Reitz and Dan Gray.

In the 147-pound class, co-captain Dave Adams, junior Earl Paust and sophomore Dean Gladfelter are the leading candidates. Paust could move up to the 167-pound division if necessary.

ATO Win Feature Of IM Basketball

Five fraternities and four independent teams scored wins in the intramural basketball card, Tuesday night.

In fraternity play Delta Chi defeated Phi Kappa Sigma, 30-21; Sigma Chi smashed Omega Psi Phi, 40-18; Alpha Phi Alpha outscored Alpha Phi Delta, 26-19; Alpha Tau Omega ran over a Delta Theta Sigma team, 52-16; and Beta Theta Pi squeaked past Delta Tau Delta, 31-30.

Indie action saw the Hoyas win over the Bullets, 27-22; the Terrapins beat the Lazy Five, 20-14; the Nemanites defeat the Old Ones, 32-23, and the Cyclops beat Grande, 21-16.

One of boxing's most famous names turned up last night in Recreation Hall's ring, when Ed Dempsey, no relation to the famous Manassa Mauler, outpunched Joe Hyson, Sigma Nu, in a 135-pound clash.

The 12-man fight card produced numerous spills, wild punching and enthusiastic cheering by the large crowd. Three boxers won via the forfeit route; they included John Righi, independent, over Harry Stack; Ralph Brower, Alpha Sigma Phi, over Lou Klein, Phi Sigma Delta; and Roy Carl, Sigma Nu over Joe Synkonis, Alpha Chi Sigma.

In one of the better fights of the night, Mourey Movsoyich, Phi Sigma Delta, decisioned Joe Cramp, Beta Theta Pi, with a strong finish in the closing seconds.

Heavyweight Russ Mandeville, Sigma Alpha Epsilon, established his name as one of the top contenders in his weight class, by outpunching Andy Hibler, Sigma Nu.

Charles Dodd, Phi Sigma Kappa, defeated Ernie Young, Chi Phi, in a real crowd pleaser.

145 pounder Dick Kovacs, Alpha Chi Sigma, won a close decision from Phi Sig's Al Karp.

The leather was flying fast and furious in the 121-pound battle between Tony Rotell, Phi Kappa Sigma, and Bill Patton, Beta Theta Pi. Rotell scored heavily in the last round on good right and left hand combinations.

David Wilkinson, Kappa Sig, defeated David Spahr, Kappa Delta Rho, in a 165-pound match. Winning for the second time was SAE's Jim Lysek when he downed Jim Cramer, Theta Delta Chi, in a 155-pound encounter.

After a dull opening round, George Hunter, Delta Sigma Phi, forged ahead with powerful two-handed barrage to defeat Rodger Antrim, Phi Kappa Psi.

Kappa Sig's Craig Kauffman

advanced another round in the 155-pound division with a win over John Sterrett of Sigma Nu. Both fighters waited for openings before tossing the leather, and it was Kauffman's long right hand which gave him the advantage.

In a bout that resembled more a wrestling match, heavyweight Jack Calderone, Lambda Chi Alpha, registered a victory over Bob Shell, Delta Chi.

GIVE yourself a Christmas present this year. Treat yourself to a crafty charcoal or tweed suit from Pennshire. And with the money you save on a Pennshire suit, you can buy that extra gift you almost forgot. Stop in at Pennshire today. You'll be pleased with their complete selection. Low factory-to-you prices.

Engineering Physics Mathematics

*interested in Missile Systems
research and development*

The technology of guided missiles is literally a new domain. No field of engineering or science offers greater scope for creative achievement.

<p>Research and development at Lockheed Missile Systems Division cover virtually every field of engineering and science and have created new positions for graduates possessing outstanding ability in the following fields:</p> <p>Electronics Research and development as applied to missile systems and associated equipment.</p> <p>Computers For solution of complex problems and missile guidance.</p> <p>Systems Engineering Research and development in missile systems.</p>	<p>Antenna Design Related to missile guidance.</p> <p>Communications In the broad area of information transmission.</p> <p>Electromechanical Design As applied to missile systems and related equipment.</p> <p>Instrumentation Associated with aerodynamics, physics and electronics.</p> <p>Physics Theoretical and experimental—aero-physics, upper atmosphere research, optics and nuclear physics.</p>	<p>Structures Structural design and analysis of missile systems.</p> <p>Thermodynamics Aerodynamic heating and heat-transfer problems.</p> <p>Aerodynamics Concerning performance of missile systems.</p> <p>Dynamics As related to missile body flight problems.</p> <p>Operations Research Applied to tactical weapons operations.</p>

Advanced Study Program

Graduates in Physics, Electrical, Aeronautical and Mechanical Engineering are invited to contact their Placement Officer regarding the Advanced Study Program which enables students to obtain their M.S. and Ph.D. Degree while employed in their chosen field.

M.S. and Ph.D. Graduates

The complexity of missile systems research and development has created a number of positions for those completing their M.S. and Ph.D. degrees. The positions carry immediate responsibility commensurate with the advanced academic training and experience required.

Representatives of the Research and Engineering staff will be on campus

Monday, December 10
Tuesday, December 11

You are invited to consult your Placement Officer for an appointment.
