

# Leonides Recommends Community Living Plan

Leonides Council advocated, with certain reservations, the proposed community living plan which was presented to the council Monday night.

The council questioned the dress regulation that would be required as a result of mixed dining areas.

The council also agreed that many students would not be in favor of the probable increase in fees that would be brought on by this system of joint dining and living areas.

# TIM to Seek Revamping Of Group

A motion to reorganize the Town Independent Men will be presented by the executive board of TIM at a meeting of the group at 7 tonight in 26 Hetzel Union building.

The reorganization amendments, if approved, will go into effect on a trial basis for the spring semester.

The amendments read: "A council of 26 men will be established. Members of this council will be nominated by a petition signed by 20 Town Independent Men. Elections of these men will be held by open ballot. Representatives-at-large to the Association of Independent Men board of governors shall be those men receiving the highest number of votes."

**Council Members**  
This will mean that for the spring semester, the council will be composed of the four elected officers of TIM, eight present representatives to the AIM board of governors and 18 additional councilmen to be elected by open ballot for the spring semester.

The last meeting of the semester will be open to all members of TIM who will have full voting privileges. At that time they will evaluate by vote the new council.

**Majority Needed**  
A two-thirds majority vote will be needed to make the amendment permanent. If a two-thirds vote is not obtained, the amendment will be stricken from the Constitution, and TIM will be returned to its present system.

Open nominations for one additional representative to the AIM board of governors will be held at the meeting tonight. A vote will be taken at the next meeting.

# Prof to Lecture In Puerto Rico

James W. Caldwell, associate professor of industrial engineering, has been invited to lecture on industrial management before the engineering students and faculty of the College of Agriculture and Mechanic Arts, University of Puerto Rico, at Mayaguez, Puerto Rico.

He will visit there the week of Jan. 21 to 26 and will also talk to management people in the area at one or more of their service clubs.

The program is sponsored by the Department of Industrial Engineering of the University, of which Robert A. Hussey is head. Hussey, prior to his retirement, was business manager of the Ordnance Research Laboratory and also professor of industrial engineering.

William Jeffrey, former soccer coach and member of the machine shop staff, is in charge of the machine shops at Mayaguez.

# Senior to Speak To Meteorologists

Bruce Kunkel, senior in meteorology from Newburyport, Mass., will give an illustrated talk to the American Meteorological Society at 7 tonight in 203 Willard.

Kunkel will tell of his experiences on the Texas Tower as an employee of the United States Navy Hydrographic Office. He was stationed on this Air Force radar station last August.

The meeting is open to the public.

# Lion Expects Cold Weather

The Nittany Lion came out of his den early this morning to see the long-awaited cold weather that is expected today.

After the changeable weather we've been experiencing this year, the Lion is looking forward to today's falling temperature with eager anticipation.

No high is predicted for today as the temperature is expected to drop continually from last night's predicted high of about 45 degrees.

Tonight's low is predicted to be somewhere around 17 or 18 degrees.

# 'Kids' Yule Party To Be Sponsored By Junior Class

The Junior Class Advisory Board will sponsor a children's Christmas party from 3 p.m. to 5 p.m. Saturday in the Hetzel Union ballroom.

The party is given for children of faculty members and children of University students. In order to attend the party, the children must have their names submitted at the Hetzel Union desk.

One hundred and twenty-five names had been submitted by Monday evening.

The advisory board has a full afternoon of entertainment planned for the children. This includes movies, games, refreshments and gifts distributed by Santa Claus toward the end of the party. Santa Claus, Richard Doyle, junior class vice president, will arrive at the party by sleigh.

This is the second consecutive year that the Junior Class Advisory Board has sponsored a children's Christmas party.

# Company Gives Student Grant

The International Nickel Company has established a scholarship at the University to encourage competent students to enter the study of engineering in the fields of mining, geology, and metallurgy.

The scholarship provides for the payment of tuition and fees plus an annual stipend of \$300 toward books and living expenses of the student. In addition, an unrestricted grant of \$500 will be paid to the University.

Male freshmen entering these fields will be eligible for the scholarship, which will be awarded on the basis of scholastic record, character, and need of the student.

The student to receive the award will be selected by the scholarship committee of the College of Mineral Industries with the approval of the dean of the college and the co-ordinator of scholarships.

# Engineering Professor Named to Subcommittee

Dr. Wolfgang E. Meyer, professor of engineering research, has been appointed to the newly-organized joint subcommittee on human tolerance for shock and vibration of the Society of Automotive Engineers.

The task of this subcommittee will be to initiate and guide basic research to determine the upper limits of human tolerance for repetitive shock vibrations.

# Alumnus to Receive Brotherhood Award

Howard G. Kurtz Jr., who received his BS degree in industrial engineering at the University in 1930, will be presented the Brotherhood Award of World Brotherhood in New York, N.Y., next Wednesday.

While the award will be conferred on Kurtz for "his outstanding contribution to the cause of world brotherhood,"

it will specifically honor him for his article "Toward Tomorrow," first published in Flying magazine in 1955. Dr. Everett R. Clinchy, an official of the society, explained.

"The article is an inspired tribute to the achievement of air transport which has challenged all creeds to face up to a common moral imperative for the family of mankind," Dr. Clinchy said.

**Brotherhood Shown**  
Showing the nature of the spirit of brotherhood that is behind international air transport, the article, he said, "demonstrates the deeper implication of aviation in building a world of peace and freedom."

Kurtz is currently an associate of Handy Associates, New York management consulting organization. After his graduation as a pilot from the U.S. Army Flying School, he held key positions in management with both domestic and international airlines.

**Political Conflict Studied**  
His concern for the search for world brotherhood came as a result of two years of intensive graduate study into the most critical conflict of modern times—the growing hostility between the United States and the Soviet Union.

Spearheading the advance planning for American Overseas Airlines operation from New York to Moscow, Kurtz was assigned to two years of graduate study at the then new Russian Institute at Columbia University.

**Study Interrupted**  
The study was interrupted for nine weeks in 1949 while Kurtz went to Moscow for the Conference of Foreign Ministers. He was responsible for the first American airline operation into Russia as American Overseas Airlines brought the entire American delegation from Washington to Moscow in three chartered flights.

World Brotherhood is an educational organization established in Paris in 1950 to promote friendship, mutual respect and cooperation among people as differing religions, races, nations and cultures.

# Group Asks for Gifts For Area Mentally Ill

An appeal for small gifts for 65 patients from the State College area who are in the Danville Mental Hospital has been made by the Centre County Mental Health Association.

The gifts should include articles such as soap, toilet articles, tobacco, stationery, and candy. Gift donations may be taken to the Associated Charities Office, 330 W. Beaver Ave.

be in favor of the probable increase in fees that would be brought on by this system of joint dining and living areas.

Carole Sullivan, junior in education from Springfield, gave a preliminary report on the questionnaires distributed by the Association of Independent Men, Panhellenic Council, and Leonides. The same report has been presented to AIM and will be presented to Panhellenic Council.

**Poll Conducted**  
Daniel Thalmer, West Halls Council President, and Miss Sullivan acted as chairmen of the committee which conducted the community living student opinion poll.

Miss Sullivan explained to the council that the majority of students seemed to be in favor of the plan, although final results have not yet been computed.

**Fee Hike Necessary**  
She said that food service said fees would have to be increased because the same large-sized portions of food which men receive would have to be given to women. This increase in portions plus the cost of conversion and building of new men's and women's dormitories would increase the fees for all students, she said.

One member of the council suggested that the plan for community living be adopted on the basis of cafeteria style dining at all meals so that fees wouldn't be raised. It was pointed out that since the plan would affect freshman women immediately upon their entrance to the University they would not miss the waiter service at dinners.

**Bluebooks Available**

Rosetta Kearney, president of Leonides, told the council members that a bluebook file for independent women will be available in the Leonides office in 203 Hetzel Union. The office will be open from 4 to 5:15 p.m. on Mondays, Wednesdays, and Thursdays, and from 3 to 5:15 p.m. on Tuesdays.

The AIM-Leonides choir will meet from 7 to 9 Tuesday nights. Openings are still available.

# Collegian Elects Ad Managers

The business staff of The Daily Collegian has promoted four members to senior board.

They are Stephen Higgins, junior in journalism from Philadelphia, local advertising manager; George Shambaugh, junior in journalism from Harrisburg, assistant local advertising manager; Marilyn Elias, junior in journalism from Pittsburgh, national advertising manager; and Donald Stohl, junior in home economics from Youngwood, promotion manager.

Higgins will replace Arnold Hoffman, senior in journalism from Philadelphia; Shambaugh will replace Anita Lynch, senior in journalism from Palmyra, N.Y.; Miss Elias will replace Janice Anderson, senior in journalism from Levittown; and Stohl will replace Arthur Brener, senior in business administration from Philadelphia.

The replaced senior board members will graduate in January.

**WIZARD**

Don't guess on how to operate the "Three Shell Game"—or deal seconds with a deck of cards.

Next time you see the WIZARD of KDR in your fraternity house place a deck of cards in his hands and watch it come to life.

A supreme mystifier while in the United States Air Force during 1951 the WIZARD led a crusade against fraudulent gambling in the armed forces. Ask for a demonstration of his sleight of hand—you'll be amazed.
