

# Three Frosh Pranksters Get Deferred Suspension

The Senate Subcommittee on Discipline yesterday gave three freshmen from Jordan Hall deferred suspension until June for making and exploding firecrackers in violation of University firearm regulations.

A business administration student and two electrical engineering students face immediate suspension for any further

# Weigand Tells Of Parking Lot Disadvantage

Construction of another entrance to the parking lot south of Grange Dormitory would create a hazard to students walking across the area, according to Walter A. Wiegand, director of the Department of Physical Plant.

A second entrance to relieve traffic congestion was recommended by the Association of Independent Men and referred to a committee, which talked with Wiegand.

Any new entrance would have to be constructed at the north end of the lot, Wiegand said. Such an entrance would interfere with an extension to the lot added last summer to provide students with a walking area.

Recommending a second entrance, AIM cited the congested traffic conditions existing at 1 p.m. on Friday and Saturday nights.

Wiegand said a second entrance might relieve some congestion but would be too great a hazard to students walking across the lot.

# Luncheon Group Elects Committee

One member of the staff and four faculty members have been elected to the Faculty Luncheon Club steering committee for the spring semester.

They are Dr. C. R. Carpenter, professor and head of the Department of Psychology; Dr. William H. Gray, professor of Latin-American history; Valeta R. Hershberger, assistant professor of physical education; Dr. Dorothy Quiggle, research professor of chemistry and chemical engineering; and Dr. Luther H. Harshbarger, University chaplain.

The Nittany Lion Shrine was sculptured by Heinz Warneke to resemble the cougar that formerly roamed and stalked in this area.

### FOR SALE

\$1900 OFF original price on 1956 41-foot 2 bedroom trailer, large bath, and kitchen. Owner will finance. Call EL 5-2972.

TRAILER. \$1500. Floor plan outstanding, condition excellent and modern, 28-feet. Neighbors priceless. Hoover Trailer Park, AD 7-7577.

ONE METAL Clarinet. For information call Bill Shannon AD 7-7551.

1954 VINDALE Mobile Home, 28 ft. awning included. Set up in nice location. See at Wooddale Park. Phone AD 5-8010 or AD 5-6576.

### FOR RENT

ONE HALF double room for male students, 114 E. Beaver Ave. Call AD 7-4147.

ONE HALF double room. Available immediately or next semester. Call N. Taylor, AD 7-4550.

### LOST

PAIR OF reading glasses in the vicinity of Agriculture Library. Name Cunningham inside alligator case. Call AD 7-4551.

SORORITY PIN and Fraternity Pin, Alpha Chi Omega and Kappa Delta Rho. Call Grange 896, Kathy Stroup.

### PASSENGERS WANTED

ONE OR two passengers wanted for Southern Delaware by way of Wilmington. Leaving 1 p.m. Sat. Call Ed after 6 p.m. at AD 8-5980.

### MISCELLANEOUS

FOR PROMPT and expert radio and phonograph service stop at State College T.V. 232 South Allen Street

IS YOUR typewriter giving you trouble? If so, call AD 7-2492 or bring machine to 628 W. College Ave.

# Students Unhurt In Auto Crash

Two students escaped uninjured yesterday in an accident involving five cars on Rt. 545 near the Houseville intersection.

Robert Jodon, freshman in meteorology from Bellefonte, and Kenneth McMullen, freshman in physical education from Bellefonte, were driving two of four cars stopped for a school bus at the time of the crash.

A fifth car, driven by Paul W. Krape of Aaronsburg, hit the rear car and knocked the four cars together, police said. No injuries resulted.

Damage was estimated at \$50 to the Jodon car and \$100 to the other cars.

# Marketing Group To Hear Babione

Dr. Francis A. Babione, associate professor of marketing, will speak at the annual meeting of the American Marketing Association next week in Cleveland, Ohio.

His topic will be 'Improving Teaching Efficiency.'

Dr. Babione is a member of the subcommittee on the teaching of general marketing that will conduct a special program on the 'Problems of the Future Supply of Marketing Teachers.'

# Rec Area--

(Continued from page one) includes weatherizing the existing buildings which will adjoin the lake.

While swimming, boating, and fishing are the immediate objectives, advocates of the project also foresee opportunity for excellent hunting, skiing, and tobogganing in the area. Research and instruction would continue uninterrupted, and completion of the lake would also encourage hydrographic study, previously limited by the lack of water.

The dam itself would be in the vicinity of the civil engineering camp, but the lake would come within walking distance of all three camps.

### Details Need Work

Exact recreational facilities, alumni use of the area, and parking facilities are only a few of the details yet to be ironed out.

Maurice K. Goddard, director of the school of forestry now on leave serving as State Secretary of Forests and Waters, said the state would only require that the dam meet specified requirements to become eligible for a construction permit from the state Water and Power Resources Board. He saw no reason for withholding this permission.

# Grad Student Meets Nehru In Capital

Work on her doctorate dissertation took Agnes Doody, graduate student in speech from N. Bradford, Conn., to the Indian Embassy in Washington where she met and spoke with Premier Jawaharlal Nehru and other diplomats from India.

The occasion was a reception at the Embassy on Tuesday in honor of Premier Nehru's visit to this country for his talks with President Dwight D. Eisenhower.

Miss Doody was invited to the reception by Ambassador Mataj of India. She has been corresponding with the Ambassador in connection with her thesis work.

The dissertation will be concerned with Premier Nehru's position as spokesman for Indian neutralism.

"The meeting with Nehru was very thrilling," said Miss Doody, "but the short talk I had with him was confined to the passing of a few sociable comments."

"The Indian Ambassador has been impressed with my work," Miss Doody explained, "and has been quite helpful in many ways."

The Embassy has supplied Miss Doody with requested information and has offered her the use of its library.

Premier Nehru is here for a series of talks with the President

and other people in the government.

The President was seeing Vice President Richard M. Nixon off at the time and was not at the reception. Members of the State Department, however, were at the Embassy.

# 2 New Fellowships Established in MI

Two fellowships have been established in the College of Mineral Industries with grants from industry.

The Shell Oil Company has established a grant of \$2000 in paleontology in the Department of Geology.

The Lithium Corporation with a fellowship grant of \$2,600 will support research in the Department of Ceramic Technology on phase equilibria and physical property measurements in lithium oxide systems.

ELECTRICITY MAY BE THE DRIVER. One day your car may speed along an electric super-highway, its speed and steering automatically controlled by electronic devices embedded in the road. Highways will be made safe—by electricity! No traffic jams... no collisions... no driver fatigue.

# Power companies build for your new electric living

Your air conditioner, television and other appliances are just the beginning of a new electric age.

Your food will cook in seconds instead of hours. Lamps will cut on and off automatically to fit the lighting needs in your rooms. Television "screens" will hang on the walls. An electric heat pump will use outside air to cool your house in summer, heat it in winter.

You will need and have much more electricity than you have today. Right now America's more than 400 independent electric light and power companies are planning and building to have twice as much electricity for you by 1965. These companies can have this power ready when you need it because they don't have to wait for an act of Congress—or for a cent of tax money—to build the plants.

The same experience, imagination and enterprise that electrified the nation in a single lifetime are at work shaping your electric future. That's why in the years to come, as in the past, you will benefit most when you are served by independent companies like this one.

# HOLIDAY Greetings

We chime in with our best wishes to one and all for a happy holiday season.

May the joy of this Yuletide shine brightly in your memories throughout the year to come.
