

# Value of Experience Stressed by Green

By LYNN WARD

Dr. Robert W. Green, assistant professor of history, said Thursday night that in dealing with things in life today we should "train the mind to think in terms of experience."

Dr. Green spoke on "The Tiger Who Took Over" at the second of the Last Lecture Series sponsored by Mortar Board, senior women's hat society.

"The Tiger Who Took Over" is a fable of the tiger who wished to take the place of the lion as king of the beasts. The tiger succeeded in persuading the other animals to aid him in his usurpation, but he later betrayed the trust the animals had placed in him.

### Made False Promises

The tiger had gained the confidence of the animals by promising them that when he was king they would not be in danger of being killed as they were under the lion. Once the tiger gained the throne he found it necessary to kill these animals to obtain food.

Dr. Green pointed out that the tiger did not learn by experience. We should, as the tiger should have, consider people as individuals. Then only will we be able to see things in perspective.

He went on to say that experience and knowledge of past experiences are our key to power. For example the simple things we

come in contact with every day are derived from experiences of the past.

Today's mechanical clocks are patterned after the European clocks of the 14th century. Men's trousers are modern versions of those worn in Persia in the 6th century B.C.

### 'Knowledge is Power'

"Knowledge is power," Dr. Green said, for a man is able to deal with the adversaries of his life if he knows about them and is conditioned to them.

Therefore we should consider what people did at other times, and we see that the explanation of the history of mankind in a meaningful way is very valuable. Dr. Green said. The individual finds, as he looks into man's past, that he has a responsibility for what his society does in the future.

•Crystal Cave in Bermuda has a natural lake which covers two acres and is 80 feet underground.

# UCA Will Hold 1st Cookie Sale

The University Christian Association will sponsor a cookie sale from 9 a.m. to 5 p.m. Monday and Tuesday, including the noon hour.

Cookies will be sold both days at the Corner Room and the bulletin board on the Mall, and Monday only at the entrance to the Hetzel Union card room.

Peanut butter, oatmeal, chocolate chip and sugar cookies will sell for fifty cents a dozen. Brownies will be sold for sixty cents.

Over 12,000 cookies have been baked by members of UCA and the various student religious foundations to raise money for the UCA budget. Profits from the sale, the first ever held by the association, will be used to finance firesides, coffee hours, marriage consultations and books for the UCA library.

Profits are expected to reach \$300 to \$400. Carol Keplinger is chairman of the sale.

### Psych Prof Will Speak

Dr. Robert T. Stover, assistant professor of psychology, will speak at a meeting of Phi Sigma, biological research society, at 7:30 p.m. Tuesday in 209 Hetzel Union.

He will speak on "Effects of Environmental Differences on Motor Responses and Subsequent Survival of Trout."

### Camp Interviews

The following camps will interview at the Student Employment Service, 112 Old Main: Blue Mountain Camp, Pa., March 16; Clear Pool Camp, N.Y., March 20; Camp Lakeland, N.Y., and Cradle Beach Camp, N.Y., March 23.

### Tito's Lieutenant Dies

PARIS, March 15 (AP)—Veteran Communist Moshe Pijade, long-time lieutenant of Yugoslavia's President Tito, died of a heart attack today on his way home from a good-will visit in Britain. He was 67.

## CLASSIFIEDS

### FOR SALE

1949 CHEVROLET 2-door sedan with radio and heater. Excellent condition. Call E. Brown ext. 674 or 558.

1948 BUICK Convertible; good condition. Call Herb Patterson at Theta Delta Chi, AD 7-4402.

### LOST

PARKER 51 black pen with silver top and clip, vicinity Parking Lot 42. Reward. Call EL 5-9787 after 6.

TAN MACKINTOSH raincoat. Owner's name in pocket. Taken by mistake from first floor Main Eng. at 10 a.m., March 14. Sentimental value. I have your "AGU." Call John, AD 7-3332.

1957 CLASS RING between McElwain and Simmons. Call Paul AD 7-2984 after 7:00. Reward.

### FOR RENT

ONE DOUBLE room available at 207 E. Park Ave. Call AD 8-6042 or inquire between 8 a.m. and 5 p.m.

### WANTED

WANTER TO buy in June; 35 foot, 2 bedroom or larger House Trailer. Call AD 7-2447 between 12 and 3 Sat. p.m.

MAID FOR general housecleaning work in fraternity house, Monday through Saturday 8 a.m. until noon. All equipment supplied. Call Delta Upsilon, AD 7-3398.

A FOURTH Roommate to share the responsibilities and benefits of a luxurious 6-room apartment. One block from campus. Call AD 8-1055.

### PASSENGERS WANTED

FLORIDA BOUND STUDENTS! Have room for passengers over Easter vacation. Call AD 7-3533.

### MISCELLANEOUS

PHI TAU and SAMMIES present Paul Serrin's Quartet Mar. 23 at Sammy House.

FOR PROMPT and expert radio and phonograph service stop at State College T.V., 432 South Allen Street.

IS YOUR typewriter giving you trouble? If so, call AD 7-2492 or bring machine to 633 W. College Ave.

IT'S HASSINGER for racket stringing the No-Awl Way. Latest factory equipment, prompt service, guaranteed work. Longer life to string and racket. R. T. Hassinger, White Hall or 514 Beaver Ave. after 5 p.m.

### WORK WANTED

EXPERIENCED SECRETARY desires typing of these, reports, term papers, etc. Fast, reasonable service. Phone AD 8-6943.

### HELP WANTED

STUDENT PINBOYS—Steady part-time job if you can schedule the right two or three evenings. It's \$1.95 singles or \$3.98 doubles for a full two-hour tournament. Inquire Dux Club, 128 S. Pugh St.

WOMAN STUDENT or employee to exchange part-time help with children for living accommodations. Please call AD 7-7205.

Why should YOU pay for electric service in Tennessee?

In almost all of Tennessee, and in the other areas of the U. S. served by federal government power systems, a strange twist in federal law puts several million families and businesses into a special "privileged class." Your taxes help pay their electric bills!

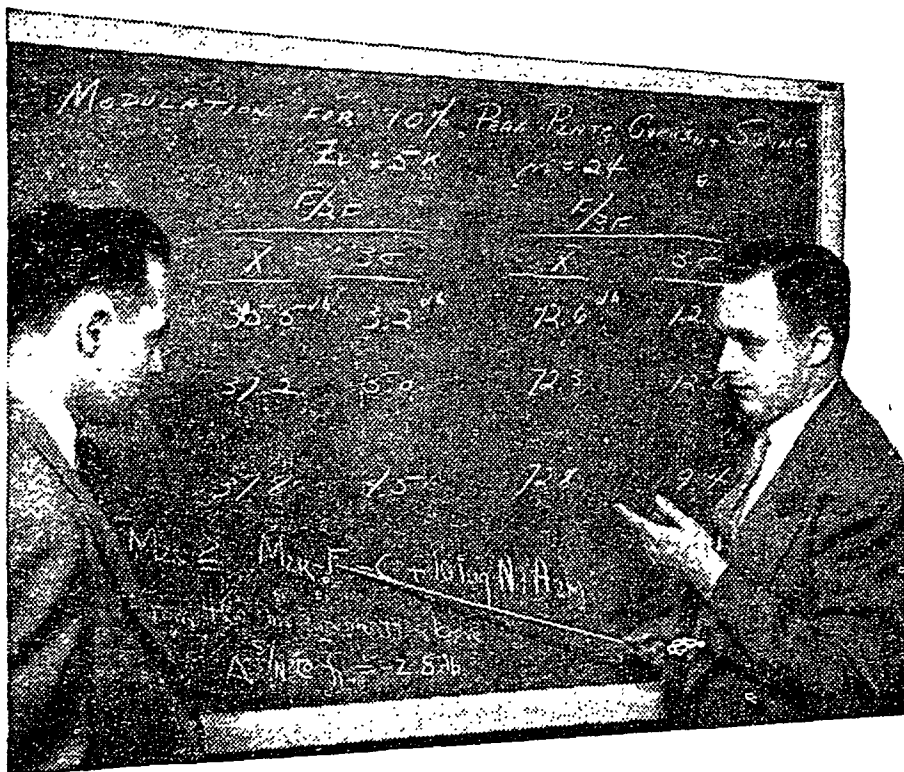

Here's what happens: Unlike independent electric light and power companies, federal government power systems pay no federal taxes at all and pay little or no state and local taxes. This means that customers of these federal power systems don't pay the taxes on electricity that you pay. As a result, you have to be taxed more to make up the difference—and to build the federal power plants in the first place.

Shouldn't the basic unfairness of this kind of subsidy and tax exemption be given thorough study and discussion? We think so. That's why we bring you this message.

## A Campus-to-Career Case History

## Leader of an exploration

Owen Williams leads a team of research and development specialists at Bell Telephone Laboratories. His is one of many teams set up at the Labs to explore the frontiers of electronics and communications. In the picture above, Owen (right) discusses modulation problems in electron tubes with Robert Leopold, M.S., Electrical Engineering, University of Michigan, 1949.

Owen himself is thirty-one, and a B.E.E. from Rensselaer Polytechnic Institute, class of '49. He joined the Labs upon graduation, and was assigned to communications development training—the equivalent of a two-year postgraduate course in communications. Mixed with his classes were various assignments in

the Chem Lab, the switching and wave filter departments, and work on transmission systems and coaxial cables.

In 1954 Owen was promoted to supervisor. He works with two electrical engineers, both systems analysts, and four technical assistants. Their current job is exploratory development of submarine cable systems, looking towards great new transoceanic communications links.

Owen is one of many engineers and scientists in the Bell System whose principal responsibilities include those of leadership. The work of improving telephone service in the Bell System is guided, and decisions are made, by men who understand the problems involved at first hand.

Many young men like Owen Williams are finding interesting and rewarding careers in the Bell System — at Bell Telephone Laboratories, in Bell Telephone Companies, Western Electric and Sandia Corporation. Your placement officer can give you more information about career opportunities in all Bell System companies.
