

All-U Candidates Face Collegian Press Confab

Similar Views Voiced by All

A harmony of views, void of a great deal of disagreement, seemed to prevail last night as the All-University party nominees faced the fourth annual Daily Collegian press conference.

Robert Steele, the Campus Party nominee for All-University president, and James Schry, the Lion Party nominee, reaffirmed their party platforms and appeared to land on the same side of most current campus issues in the question-and-answer discussion conducted by Collegian reporters.

The nominees expressed virtually no disagreement on issues which have been brought before All-University Cabinet in recent weeks.

Agreed With Cabinet

They did not disagree with Cabinet's action on such questions as the recently-approved compensations for next year's student government leaders and Cabinet's refusal to renew its membership in the National Student Association.

The nominees probably differed most in reaffirming their respective party platforms.

Schry backed the Lion Party plank calling for the removal of the Election Committee's power to withhold its approval of platform planks as "outside the scope of student government."

Objects to 'Veto Power'

He said the planks represent the will of the student and as such should not be subject to a "veto power" by the committee. He also expressed his support of a Lion Party plank in last fall's election which asked for longer telephone hours for women.

Steele said that, although he believes a nominee should lose his party identity once elected, he would back stronger use of the Cabinet Personnel Interviewing Committee and the class advisory boards, which he called Campus Party innovations.

Backs Voting Plan

Tyson Moyer, the Lion Party nominee for All-University secretary-treasurer, said he believed decentralized voting was of major importance in getting more students to the polls.

Moyer's opponent, Joseph Boehret, expressed the view that, while Cabinet should be concerned with more than "its own little world," it should not attempt to go beyond the realm of student government.

The two nominees for All-University vice president, John Rhodes, Campus Party, and Joseph Shea, Lion Party, also expressed their views at the conference.

Observatories to Open For Viewing of Jupiter

The University observatories will be open from 8 to 10 p.m. Friday and Saturday for persons to observe Jupiter.

Jupiter, the largest planet, will be in an especially good position for observation. Members of Alpha Nu, astronomical society, will operate the telescopes and answer questions.

THREE NOMINEES for All-University offices express their views on student government. The nominees (from left to right), Joseph Shea, Lion Party nominee for All-University vice president; James Schry, Lion Party nominee for All-University president, and Robert Steele, Campus Party nominee for All-University president, are questioned by Collegian reporter Robert Franklin.

Gorlow Says Man Freed From Tradition by Freud

By DAVE FINEMAN

Dr. Leon Gorlow, associate professor of psychology, said Sunday night that Sigmund Freud made a significant contribution to human freedom by "placing man in the context of actual events," thus liberating him from the judgments-of "tradition."

Dr. Gorlow, speaking as the sixth lecturer in the Hillel series, "The Structure of Freedom," said that Freud, through the "study of complex human behavior," placed man in a new light, producing an atmosphere of understanding.

Dr. Gorlow said that close scrutiny of personality aspects, hitherto unknown, made people aware of the causes behind behavior, thus making possible a better understanding of that behavior.

Aside from contributions to freedom, Dr. Gorlow said that Freud has had a great impact on the arts.

Through Freud, Dr. Gorlow said, the study of complex human behavior has been popularized in literature and drama. Thomas Mann, in literature, along with the Russian novelists, Dr. Gorlow said, has made this study a frequent subject.

In drama, Dr. Gorlow said, such American playwrights as Williams and Miller have explored the sub-

ject of complex human behavior. Education, religion and anthropology have also come under the influence of Freudian thought, Dr. Gorlow said.

Religion, he said, has found it necessary to "come to terms" with psychology, to modify dogma with reason.

Dr. Gorlow also discussed the subject of human maturity, describing it as one's goal after passing successfully through the rigors and frustrations of early life.

The ways to maturity, he said, were restricted by Freud to two—"a set of fortunate arrangements" in early life and "psychoanalysis."

Dr. Gorlow pointed out, however, that neither is open to most people, so that suitable substitutes must be found through psychology.

Directory Lists Summer Jobs

The Advancement and Placement Institute, professional advisory and advancement service in the field of education, has published the second edition of "The World-Wide Summer Placement Directory."

The directory was prepared to aid those who wish new ideas for ways to earn while they vacation and was so well received that a second edition in expanded form has been published.

The directory gives descriptions of the type of work available with names and addresses of employers regularly needing additional summer employees. Opportunities are presented from 48 states and more than 20 foreign countries.

A new section has been added for students who wish to use their summer in trainee programs for future career opportunities.

Additional information may be obtained by writing to the Institute, Box 99C, Greenpoint Station, Brooklyn 22, N.Y.

WSGA Screening Applications Due

Tomorrow is the final day to apply for screening for Women's Student Government Association Judicial and Freshman Regulations Boards.

Second or third-semester women may be screened for Freshman Regulations Board, and fourth or fifth-semester women for Judicial Board. All applicants must have a 2.5 All-University average and have no major judicial record.

Application forms are available in the dean of women's office.

Angel Flight Cancels Practices

Angel Flight drill and flight practice will not be held this week.

A Campus-to-Career Case History

After securing field data, Mac McLeran lays out plans for new and additional telephone services.

Figuring on the future

Thurston B. McLeran, called Mac by his friends, is an engineer with Southern Bell Telephone and Telegraph Company at Decatur, Georgia.

Much of his work is concerned with the future—planning for telephone service to meet predicted demands a year, or five years ahead.

"My biggest job to date," Mac says, "has been engineering additional communications facilities for an airbase and adjoining aircraft factory in our district. This means making field studies of the customer's requirements and planning how new telephone facilities can best meet them. Then I translate this in-

formation into working plans for our construction and installation people. It's a big job, and gives me a lot of responsibility. It's challenging work, too, for an engineer."

Figuring on his own future concerns Mac also. He graduated from Georgia Tech in 1952, with a B.S. in Electrical Engineering. He went with the telephone company because of the advancement opportunities it offered. Today, Mac is married and has one child. He looks forward to an interesting career in a growing business where individuals can advance as far as their abilities will take them.

There are many rewarding career opportunities in all Bell Telephone Companies, and at Bell Telephone Laboratories, Western Electric and Sandia Corporation. Your placement officer can give you more information about Bell System Companies.
