## Shortlidge Problem Is Back!

One of those seemingly age-old topics which have the habit of re-appearing periodically has once again come to the attention of All-University Cabinet.

However, the proposal to have one-way traffic on Shortlidge Rd. on Friday and Saturday nights has some travelling to do before it is put into effect.

This is one of those "continuing issues" which always spring before the attention of the students every few years if not every year.

Cabinet received the proposal as part of the parking and traffic report of the Sophomore Class Advisory Board and seemed to be happy with the idea, although they postponed action on it until a later date.

We are convinced that the idea is a good one. The Sophomore Class Advisory Board has designed a plan which we feel is a solution to a bad problem.

The traffic congestion—no one needs to be told—is nothing short of a circus on Friday and Saturday nights. Competition to get up and down Shortlidge Rd. is fierce and results in quite a few dented fenders, screeching brakes, and epithets hurled from automobile to automobile.

We aren't trying to convince anyone that the weekend traffic jams do not merit action of some sort. Everyone, including the Campus Patrol and the Physical Plant concedes that the

situation is a troublesome one.

But what to do about it?

Two years ago Cabinet passed a recommendation to make Shortlidge Rd one-way (downhill) and thought they had a pretty good plan until the Physical Plant squashed it by declaring the plan, "unfeasible."

The reasons given were that the rule would not be obeyed by student drivers, and that it would only add to the already-existing confusion. Two flimsy reasons at best.

Why this hasn't been brought before the attention of Cabinet before this, we can't understand. Sometimes we think that the idea men must be a little hard-pressed, judging by the projects which come up for consideration. This one seemed a natural.

The parking report of the Sophomore class advisory board has yet to be acted upon by Cabinet. When it is complete it will be taken to the Physical Plant. Perhaps some things have changed in relation to this situation in the last two years. This may mean that Physical Plant will have some very good reasons for nixing the plan.

However, if the reasons are the same as two years ago, we can see no reason for not putting the plan (including the provision for another road from the Grange parking lot) into effect so that one of the major traffic problems on campus may be eliminated.

## IFC-Panhel Sing

The Interfraternity Council-Panhellenic trophies loom ahead as great incentive for fraternities and sororities.

Tonight and tomorrow night the Interfraternity Council and Panhellenic Council will hold their annual sing in which any fraternity or sorority can compete for a trophy.

Most of the academic year is spent by fraternities working for one trophy or another, but this one has a little more prestige than most. Why? Because it is representative of a large participation and of weeks and weeks of work on the part of each group.

The sing trophy is one of the most representative of group spirit. A sing is a real test of a group's ability to work together as a group and not as individuals. Unity and harmony are musical expressions of the feeling within the group.

Competition will be keen for the much coveted trophy when the sororities and fraternities fill Schwab Auditorium tonight. Student who have sung in previous competitions will agree that Schwab will be a great improvement over the cramped conditions in Electrical Engineering. In past years the groups have been considerably hampered by a small stage, a small room for the audience, and narrow passageways which made it difficult for the groups to get in and out.

Several students have complained about the night when the sororities will be singing. Some have said that it conflicts with bluebooks be-

cause it is almost exactly in the middle of the semester. Others have complained because a music 5 bluebook is being given that night.

These inconveniences could happen on any night the committee might choose. Not everyone can find a convenient night. It does not take very long to sing two songs, so perhaps not very many students will fail bluebooks because of the IFC sing after all.

There has also been criticism of the song which was picked for the sororities to sing—"Moments to Remember." We must admit that the song has little positive value for a sing competition. We feel fortunate that we do not have to judge the sing and listen to the song about 20 times.

The fact that all of the sororities will be singing the same night and all the fraternities the other night is an improvement to the sing. Last year there were many hard feelings because two sororities and two fraternities were picked as finalists on each of the two nights of the preliminaries. Many people pointed out that the third best sorority could be eliminated from the finals if it sang on the same night as the first two. With all the sororities and fraternities singing on separate nights the judges will be better able to compare them with each other and pick the top four for the finals.

We hope that a spirit of cooperative competition prevails at the sing—thus bringing closer and better relations between IFC and Panhel. —Sue Conklin

## Little Man on Campus by Bibler

"It seems, Mr. Worthal, that you're late."

grasshoppers, worms, liver

## 'Most Anything

by pat hunter

This column originally began as the traditional "Welcome-Spring! Anyone-for-Whipples?" sort of thing. But a slight difference of opinion with the weatherman has changed the topic.

Therefore since the number-one Penn State complaint—namely the weather is nothing new but just the same ole' wet snow, I'll switch to the complaint ranked second among campus dwellers—the food service.

Hop-scotchin' the exchange papers we receive in the Collegian office, I came across several tips which may be helpful for the imaginative dormitory chefs.

The tips are the result of a recent fete which Wake Forest students attended at the home of their German instructor.

According to this German gourmet enthusiast, his menu was in strict agreement with those of the fashionable New York society set.

Included in the "feast" were french fried worms, fried grasshoppers and octopus meat.

In case the dormitory dieticians decide to replace the now all-time-popular liver meal with any of these tasty tidbits, I suggest these helpful hints mentioned by the German connoisseur.

● Always serve both the worms and grasshoppers with saltines.

● When buying, select only those delicacies imported from Japan and Mexico.

● Be sure you purchase the long, thin variety of agave worms.

● If the menu includes grasshoppers, they should be served complete with heads, eyes, legs and

antenna. ● Frozen walrus eyes, a favorite dish among the Eskimos, may be used if an added meal variety is desired.

And while we're talking about the unusual—the University of Illinois really had something to complain about recently. Three pranksters temporarily took over the job of the chimemaster and the campus was favored with 13 bells at midnight and "Three Blind Mice" at 11 a.m.

Any talented, daring music majors around?

When a group of Kent University students were asked the question, "Just why did you come to Kent?" they quickly replied, "It's (Continued on page eight)"
