

'Keep-Off-Grass-Or-Else' Attack Planned by APhiO

Alpha Phi Omega, national service fraternity, has begun planning its always humorous keep-off-the-grass signs for this spring.

When the 50-odd signs are completed, the division of landscape construction and maintenance will begin placing them in strategic locations.

Farm Prof Gets Leave To Aid UN

Dr. Jerome K. Pasto, associate professor of farm management, has been granted a leave of absence from April 15 to June 30, 1958, to join the Food and Agricultural Organization of the United Nations as senior farm management specialist.

He will serve with the UN at the FAO headquarters in Rome. His duties will deal primarily with the problems of rice production in the Far East.

Dr. Pasto will leave for Rome on March 31. After nine days of orientation in Rome, he will go to India for consultations to undertake farm management studies in the various member countries.

To Plan Farm Clinic
He will also make plans for a farm management development clinic to be held in India later this year.

Dr. Pasto will then visit other Far East countries in order to become acquainted with the economic problems of rice production.

He will continue around the world to State College, where he will meet his wife and two children in June. The Pastos will live in Rome during the leave of absence.

Graduated From Cornell
Dr. Pasto was graduated from Cornell University with a major in agronomy. He worked as a soil technologist with the Soil Conservation Service of the U.S. Department of Agriculture.

He completed work for his master of science degree at Cornell and worked as an extension specialist in farm labor. He also earned his doctor of philosophy degree at Cornell.

Dr. Pasto joined the University's Department of Agricultural Economics and Rural Sociology in 1950. He initiated the first course on farm appraisal here.

The signs, an annual project of the fraternity, should be effective, judging from their attention-getting effect on students last year.

Last year the signs bore such quips as "Please, We Nightcrawlerers Are Sleeping," "Ouch, Your Feet Are Killing Me" and "Please, I'm Young and Tender."

Stop Shortcuts
Walter W. Trainer, head of the landscape division, said the signs will be placed at points where unnecessary paths were beaten by students in a hurry to cut across lawns.

He admitted that some of the paths forged by students can be called necessary, since constant expansion of the University makes it difficult to get to new buildings using established concrete walkways.

He also said that many of these shortcuts will eventually be converted into concrete walks.

But many of the shortcuts are unnecessary, Trainer said. They will be seeded this spring and signs placed to discourage their further use.

Trainer's men have begun annual spraying of trees and shrubs on campus.

The spray is a DDT-type insecticide with an oil-emulsion base. Its purpose is to kill the elm bark beetle, a troublesome pest that eats into the bark of the English and American elms.

Spray Is Harmless
Trainer said the spray is not harmful to persons, clothing or automobiles, but the division will take care to spray during the hours when few people will be on campus streets.

He warned that if the spray gets onto an automobile, it should not be wiped off right away, but should be allowed to dry first. If wiped off immediately, it will smear and may cause damage to the finish.

Science Fiction Society

The regular Wednesday meeting of the Science Fiction Society has been cancelled this week. All members contributing material to "Ballast," the club magazine, will meet at 2 p.m. Saturday in the Lion's Den in Hetzel Union.

Froth to Parody 'Mademoiselle'

Froth will thrust itself into the "fashionable" world this month with a parody of "Mademoiselle" and all the trimmings.

On sale today, the March issue will attempt to reproduce the articles on fashion designers, new gadgets and a "memo to the editors."

Froth's photographer Forney Miller has outdone himself this month. Instead of one Froth girl, there will be a photographic series of a fashion show. The models are coeds.

Froth will be on sale at the Hetzel Union Building, Waring Hall, the Corner Room and the bulletin board on the Mall.

MIT Prof Will Give 5 Lectures

Dr. John Chipman, professor and head of the Department of Metallurgy at the Massachusetts Institute of Technology, will present the annual series of Priestley Lectures next week.

The general subject for the series by Dr. Chipman will be "Chemistry in the Metallurgy of Iron and Steel."

Series Named for Chemist
The lecture series is sponsored by Mu chapter of Phi Lambda Upsilon, honorary chemistry fraternity, and was established in honor of Joseph Priestley, English-born clergyman and chemist credited with the discovery of oxygen.

The lectures will be presented in Mineral Sciences auditorium at 8 p.m. Monday through Friday. However, Thursday's lecture will be presented at 4:30 p.m.

Joined MIT in 1937
Dr. Chipman is a graduate of the University of the South, with advanced degrees from the State University of Iowa and the University of California. He has served on the faculties of Illinois Wesleyan University and the Georgia School of Technology, and was associate director of the research laboratories at Armco Steel Corp. before joining the Massachusetts Institute of Technology in 1937.

During World War II, he was affiliated with the metallurgy division of the Manhattan project at the University of Chicago.

Dr. Chipman is a past-president of the American Society for Metals.

An All-American Actor

Engagements

Maier-Campbell

Mrs. Eline H. Roehren of Pittsburgh has announced the engagement of her niece, Marianne Maier, to Duane M. Campbell, son of Mr. and Mrs. William Campbell of Oakdale.

Miss Maier is a junior in secondary education and a member of the business staff of The Daily Collegian. She is a member of Pi Beta Phi sorority.

Mr. Campbell is a senior in business administration and treasurer of Sigma Phi Epsilon fraternity.

Wimmer-Clark

Mr. and Mrs. John Wimmer of 321 Nimitz Ave., State College, have announced the engagement of their daughter Margaret Ann to Richard R. Clark, son of Mr. and Mrs. Roland O. Clark of Sea Girt, N.J.

Miss Wimmer is a junior in arts and letters and a member of Delta Zeta sorority.

Mr. Clark is a senior in journalism and is a member of Phi Kappa Psi and Sigma Delta Chi, professional journalism fraternity.

Sociology Professor Defines Freedom

By PAULA MILLER
Edward Abramson, assistant professor of sociology, said Tuesday night that freedom is living not within the mores of society, but within your own criteria of mores.

At a meeting of the University Christian Association, Abramson discussed the freedom, commitment and power of man in a society.

Mr. Abramson centered his discussion on four conditions of behavior: power, negative power, authority and freedom. He said that the first three conditions are social conditions, but freedom is not.

"As soon as you transfer power into action, you are losing power," he said.

In defining power, Mr. Abramson said that power is open lines of action, all action is commitment, commitments entail penal-

ties; therefore, all action is penalty.

Mr. Abramson said that there are three kinds of penalties: self penalty which involves the conscience, social penalty and the penalty of the loss of power.

He described power as being dangerous, unpredictable and anti-social and in a society and it is desirable not to have power because society is a "mechanism for robbing you of power."

Something that is possible is not always suitable, said Abramson. He cited spitting on the sidewalk as an example of something that is possible but not suitable in a society.

"When someone is talking

about something that can't be done, he is usually talking about suitability."

In discussing freedom, Mr. Abramson said that freedom is not a social behavior. To be free, an individual does not feel that he must live within the mores of the society.

However, Mr. Abramson added that "freedom is not necessarily happiness." He said that living within the authority system would make a person more happy.

In talking about a man-God association, Abramson said that "just as you commit yourself to God, you receive penalties for these commitments. The real relationship with God is without authority system."
