

Elections Code Change To Go Before Cabinet

All-University Cabinet tonight will hear a proposed amendment to the All-University Elections Code which would rotate the senior class president between fraternity and independent affiliation.

The amendment will be proposed by John Morgan, president of the Association of Independent Men.

It provides that the senior class president and secretary-treasurer always be of the opposite affiliation of the All-University president and secretary-treasurer.

The senior class president during the past several years has been a fraternity man. The junior and freshman class presidents

All-University Cabinet will meet at 6:30 tonight in 203 Hessel Union. The meeting time was advanced from 7 p.m. because of the Spring Week All-Service Revue.

have been independents and the sophomore class president, fraternity.

The three underclass presidential affiliations would remain the same under Morgan's plan with the exception that the freshman class president is labeled "unaffiliated."

The Elections Code provides that no more than three of the five Cabinet members elected in the spring—the three All-Univers-

ity officers and the senior and junior class presidents—be of the same affiliation and rotate each year.

Under Morgan's amendment, the five posts would always be filled by three independents and two fraternity men.

The All-University vice president and the vice presidents of the senior, junior and sophomore classes are always of the opposite affiliation from the president.

In other business, John Sopko, sophomore class president, will present a report of a parking and traffic survey conducted by the sophomore class advisory board.

All-University President Robert Steele will make the following appointments, subject to Cabinet approval:

Peter Fishburn, chairman of the All-University Elections Committee; Edwin Henrie, National Student Association coordinator; and Ronald Ross, Cabinet public relations director.

Cost of Driveway Investigated

Walter H. Wiegand, director of the Department of Physical Plant, yesterday said his office is investigating the cost of constructing a driveway linking the parking lot behind Grange with Pollock Rd.

He said the project is subject to the approval and allocation of funds from the University administration. Employees of the Department of Physical Plant would do the work.

He could not give any definite time when the estimate would be available.

Wiegand's statement came as a result of the parking and traffic committee meeting Monday night when John Sopko, sophomore class president, said he was going to bring the plan before All-University Cabinet tonight.

Sopko said the sophomore class advisory board had conducted a spot check of the traffic congestion in front of the women's residence halls on Shortlidge Rd. from midnight to 1 on Friday and Saturday nights.

The group came to the conclusion that the jam-up was caused by "2-way traffic into and out of the lot." This could be alleviated by making the Shortlidge Rd. entrance one way and constructing a 1-way drive way to Pollock Rd., he said.

Wiegand said the proposed

driveway would only be used at special times, such as Friday and Saturday nights.

He said the congestion was caused mainly by violations of the parking regulations along Shortlidge Rd.

Cars are limited to 15-minute parking along the residence hall side. No parking is permitted on the other side of the street. He said regulations are being rigidly enforced in an attempt to prevent congestion.
