STATE COLLEGE, PA., TUESDAY MORNING, MAY 7, 1957

FIVE CENTS

## IFCPA to Present Plans, Recommendations to IFC

The Interfraternity Council Purchasing Association Executive Committee last night decided to hold an additional meeting tomorrow night to draw up organizational plans and recommendations in time to present them at the Interfraternity Council meeting Monday.

## Soph Board To Help In Traffic Count

Members of the Sophomore Class Advisory Board will assist in the traffic counts on Monday and Friday of next week as part of the University's traffic and parking survey.

John Sopko, sophomore class president, volunteered the services of the board after a meeting Friday with Calvin G. Reen, professor of civil engineering and head of the committee.

The members of the board signed up for hours at last night's meeting. They will be paid \$1.50 an hour for their services.

### Will Meet Tomorrow

A meeting for those who signed up will be held at 7:30 p.m. tomorrow in 1 Main Engineering.

The vehicular studies will be made Monday from 7:30 a.m. to 5 p.m. continuously at five stations manned by students and members of the Department of Physical Plant and at 14 stations where automatic counters will be installed with the cooperation of the Pennsylvania Department of Highways.

### 34 Other Stations

Counts will be made at 34 additional stations at the peak morning, noon and evening hours. The automatic counters will remain on campus during the week.

A pedestrian count will be made on the next Friday. Counts will be made at 25 stations during five periods of approximately 45 minutes each and at six additional stations all day. The survey will be made to record the direction as well as volume of pedestrian traffic.

## Phi Beta Kappa To Initiate 17 On May 15

Seventeen students have been elected to membership in Phi Beta Kappa, national scholastic honor society.

They will be initiated on May 15.

They are: Sidney Brindley, senior in arts and letters from State College; Joseph Eberly, senior in physics from State College; Darlene Rumbaugh, senior in medical technology from State College; John Moran, graduate guide from Scanton.

### Students Honored

Sheldon Amsel, senior in pre-medicine from Simpson; Lawrence Berkoben, ninth semester student in arts and letters from Altoona; Marjorie Blank, senior in medical technology from Greensburg.

Robert Detisch, senior in arts and letters from Erie; Thomas Dye, senior in arts and letters from Pittsburgh; Jane French, ninth semester student in psychology from Landsdowne.

### Other Students Named

Linda Gerber, senior in arts and letters from York; James Ifft, senior in chemistry from Stroudsburg; William Imler, senior in labor-management relations from Ganister.

John Kenemuth, senior in physics from Van; Muriel Moldawer, senior in pre-medicine from Elkins Park; Elizabeth Morrill, senior in labor-management relations from West Orange, N.J.; and Ruth Stafford, senior in psychology from Waynesburg.

The committee members expressed a desire to have definite plans to present at an IFCPA Board of Directors meeting Sunday night and the IFC meeting Monday to have the plans taken back to individual fraternities and give them a chance to act on the program before the semester ends.

### Service Charge Included

Features of the plan to be presented at the board of directors meeting Sunday include a service charge to be levied on fraternities in return for the service IFCPA could give them. This service charge would include original outlay, deposit and total expenses.

The committee also plans to present a method of hiring a staff—particularly a method of hiring a paid, permanent manager who might possibly be a graduate assistant and receive a salary equivalent to that of most graduate assistants.

David Tressler, chairman of the committee in charge of fraternity promotion, will present a method of presenting IFCPA's setup to individual houses at the meeting.

The committee will also present types of contracts that would exist between fraternities and IFCPA, and between IFCPA and vendors.

### 5 Per Cent Discount

Vendors, who have been contacted by members of the executive committee, have indicated that they will be willing to give members of IFCPA discounts up to five per cent. Committee members who had approached them said the vendors indicated that a discount exceeding five per cent would be too large and would cause a raising of prices or a loss of quality or both.

These committee members also said that the vendors expressed a desire that orders be received at least a day in advance.

Leslie Phillabaum, IFCPA president, will present the findings and recommendations of the executive committee at the IFC meeting Monday.

## Ogontz to Expand Nurses' Training

Facilities of the University's Ogontz Center will be expanded this summer to permit training of nearly 200 more student nurses in the Philadelphia area.

A new microbiology laboratory will be installed which will enable five additional hospitals to cooperate in the program.

The training program has been given for student nurses at Chestnut Hill Hospital for several years. The new hospitals to be included are Hahnemann, Episcopal, Frankfort, and Northeastern in Philadelphia and Abington.

## Bill OK'd Sans Anti-segregation Clause

WASHINGTON, May 6 (AP)—The House Education Committee today turned down a move to put an anti-segregation amendment in to the big federal school construction bill.

Rep. James Roosevelt (D-Calif.) reported the closed-session vote was 16-10 against the amendment. It was offered by Rep. Stuyvesant Wainwright (R-N.Y.) with backing from Roosevelt and Rep. Roy W. Wier (D-Minn.).

The amendment, similar to one proposed by Rep. Adam C. Powell (D-N.Y.), would have barred federal funds under the bill from going to school districts

# Sophomore Killed In Auto Accident

DEATH CAR—James R. Moore, driver of this automobile, died at 3 a.m. yesterday in Centre County Hospital after an accident Sunday night near Milesburg. James Robinson, a passenger, was reported satisfactory yesterday.

## Passenger's Condition Is Satisfactory

The gaiety of Spring Weekend was sobered abruptly Sunday night when one student was killed and another was injured in an automobile accident as they were returning from a picnic.

James R. Moore, 21, sophomore in the division of intermediate registration from New Kensington, died at 3 a.m. yesterday in Centre County Hospital from head injuries received when his car failed to negotiate a curve at Weaver's railroad crossing on Route 220, west of Milesburg.

James Robinson, 24, ninth semester student in arts and letters from Pittsburgh and a passenger in the car, is in the hospital with lacerations of the forehead and lips. His condition was listed last night as satisfactory.

### Returning From Picnic

Moore and Robinson were returning from a picnic at Sycamore Camp, near Wingate. State police said the students were traveling toward Milesburg at about 10:20 p.m. when their car went out of control on the curve past the crossing and crashed into a Pennsylvania Railroad relay box. The vehicle overturned and came to rest on its top, partly on the railroad tracks.

Police said the students had to be removed through the trunk as the car was demolished. They were taken to the hospital in a Logan community ambulance.

The accident was a recall of a fatality which occurred last year on Spring Weekend. Anne Elder, a junior from Cumberland, Md., was killed in an accident while returning from a fraternity picnic near Pleasant Gap.

### Member of Track Team

Moore was a member of the University track team and competed in three meets this season as a sprinter and broad jumper. In State College, he lived at 127 S. Barnard St.

He was a son of Mr. and Mrs. James Moore, 1224 Fourth Ave., New Kensington. He was graduated from New Kensington High.

## Starer to End 3-Month Stay

Ira Starer, graduate student in chemistry from Brooklyn, N.Y., who has been in the University Hospital since he was injured in a laboratory explosion on Feb. 13, will be discharged at the end of the week to finish his convalescence at home.

Mrs. Carol H. Burt, superintendent of the hospital, described Starer as "getting along well!" Starer was taken to the hospital nearly three months ago when an experiment on which he was working exploded, showering him with flaming liquids.

Robert Etter, graduate student in chemistry from Chambersburg, who was the only other person in the laboratory, extinguished the flames on Starer's body and clothing and those on the table and floor of the lab.

## Jersey Shore Boy Wins Science Fair Award

Roger Feil, 18-year-old senior from Jersey Shore Area Joint School, won the grand championship and a \$1000 scholarship in the fourth annual Central Pennsylvania Science Fair held on campus Saturday.

The Jersey Shore school and the College Area Joint School took most of the prizes in the fair.

## LA Coed's Seat To Be Filled

The coed who resigned last week from the Liberal Arts Student Council will be replaced by an alternate at a joint Council meeting of old and new members at 7:30 tonight in 214-215 Hetzel Union.

The coed resigned to "preserve the council's dignity" after she was accused of influencing voters at a polling place during student council elections. She denied the charges.

The alternate coed received the next highest number of votes in the elections.

The 1957 Orientation Program for incoming liberal arts freshmen, including the possibility of holding several mixers, will be discussed.

The Open House Program to be held May 18 will also be discussed. The program is held for high school students who are interested in the liberal arts. The students will visit the University that weekend under the auspices of the Kiwanis Clubs.

## Ag Council Postponed

The Agriculture Student Council meeting, which was originally scheduled for tonight, has been postponed until 7 p.m. tomorrow in 212-213 Hetzel Union.

## Lion Predicts Fair Weather

Seen going through strange contortions this morning, the Nittany Lion explained that while peering into his mirror yesterday, he discovered that his chest had dropped down a few inches toward his beltline.

Refusing to be nonplussed, he proceeded to Rec Hall, where he spent an hour observing the weightlifters going through their "dynamic tension" routines. Deciding that this was all he needed, he set up his outside mirror in preparation for today's workout.

Since he plans to receive the trophy for the "World's Most Perfectly Developed Lion," he was delighted to hear that today's prediction calls for good exercising weather, continued fair and cool and with a high of 65 to 70 degrees.
