

'Teahouse' Panned By Reds in Europe

"The Teahouse of the August Moon," which will open Thursday night in Schwab Auditorium, was once criticized by Communists as "a camouflage for the true activities of the Americans on Okinawa."

The 1954 Pulitzer Prize winning play by John Patrick will be presented by Players as their final show of the year.

After opening on Broadway in 1954, "Teahouse" played to capacity audiences throughout its run, and a month after the opening was earning Patrick \$2100 a week.

Touring companies in the United States and foreign productions in Europe and Asia have made it one of the most successful plays of the modern theatre.

Opens in Berlin
On Sept. 18, 1954, the play opened in Berlin with an all-German cast except for an American, Oscar Karlweis, as the mischievous and philosophical native interpreter Sakini. It was well-received by Western critics but the Russians panned it as "American propaganda."

Sample criticisms from the Red Army newspaper, Red Star, called it an "idealistic picture" of Americans who "came to Okinawa for the same reason they came to the other countries—to turn every bit of soil . . . into a beachhead for aggressive war."

Playwright Patrick constructed the comedy directly from the book of the same name by Vern

Prof to Direct 5 O'Clock Play

Warren F. Smith, assistant professor of theatre arts, will direct today's 5 O'Clock Theatre presentation entitled "Terminal," in the Little Theatre in Old Main.

The cast includes Sheila Stahl, sophomore in education from Sharon, Mary; Rodney Mott, sophomore in recreation education from State College, Clyde; Patricia Bilonick, junior in recreation from Latrobe, Dr. Hasso. Other players are Dion Weisend, junior in recreation education from Webster, N.Y., the trav-

Sneider. The story involves the American occupation of Okinawa in which the befuddled Capt. Fishby tries to convert a sleepy village into a thriving Americanized community.

Born in Kentucky
Patrick was born in 1906 in Louisville, Ky. His career began as a script-writer for the National Broadcasting Company. From there he turned to Hollywood where he wrote a dozen or more films. Among these films are "The President's Lady" and "Three Coins in the Fountain."

- IT'S HASSLINGER for racket stringing the No-Awl Way. Latest factory equipment. Prompt service; guaranteed work; longer life to string and racket. University Tennis Service, 614 E. Beaver Avenue.

Considering a Career As an Electronic Engineer?

WHY CHOOSE

Between Fast Growth and Long Term Security when a career with Federal Electric . . . the rapidly expanding I T & T Associate gives you both!

No doubt in launching your engineering career you're confronted with two alternatives:

- a** Immediate growth opportunities in a really "hot" small company which is expanding fast—or
- b** Long-range career stability in a large, firmly established company with tremendous diversification of activity.

Only once or twice in a lifetime can you expect an opportunity that offers the advantages of both. Yet Federal Electric Corporation offers just that. Here's why—

As an associate of International Telephone and Telegraph Corporation, Federal has all the stability you could ask for. And in its own right, Federal offers a new kind of career in a field that's expanding at a truly fantastic rate.

Federal Electric urgently needs field engineers to help maintain its rapid rate of growth. Originally occupied with the operation and maintenance of the vital DEW Line (Distant Early Warning System) and "WHITE ALICE" (Microwave communications system for Far North), Federal Electric is also engaged in scores of other government and civilian projects all over the world.

As a Federal Electric field engineer, you gain unusually diversified and valuable experience. You may work in any part of the world. You'll enjoy "residence" assignments, giving you time to participate in the community in which you work. Besides learning to solve technical problems right on the spot, you also get the chance to practice salesmanship and customer relations—all of which will stand you in good stead as you advance. You receive an excellent salary (plus a special bonus on overseas work) and liberal per diem and your advancement may be with Federal itself or with any of the other divisions of the vast IT&T system.

You've Got A Date to talk to the Federal Electric representative about a rewarding career as a field engineer. He will be on campus May 13th. For appointment or further information, contact your placement office.
